FEDERAL STANDARD

TELECOMMUNICATIONS: SYNCHRONOUS SIGNALING RATES BETWEEN DATA TERMINAL EQUIPMENT AND DATA CIRUCIT-TERMINATING EQUIPMENT UTILIZING 4kHz CIRCUITS

This standard is issued by the General Services Administration pursuant to the Federal Property and Administration Services Act of 1949, as amended, and Public Law 89-306. This standard has also been published as an integral part of Federal Information Processing Standards (FIPS) Publication 22-1. The application of this standard to data processing systems and telecommunication systems is mandatory on all Federal agencies.

1. Scope. This standard specifies the standard signaling rates up to 9600 bit/s between Data Terminal Equipment (DTE) and Data Circuit-Terminating Equipment (DCE) utilizing nominal 4kHz circuits.

1.1 Purpose. Federal telecommunication standards are to facilitate interoperability between telecommunication facilities and systems and compatibility of these systems at the computer-communications interface with data processing equipment.

1.2 Application. This standard is to be used by Federal agencies with other Federal Standards or design specifications describing functional, mechanical and procedural characteristics as necessary to achieve interoperability. For data rates above 9600 bit/s, whether or not 4kHz circuits are utilized, FED-STD-1001 applies. Nothing in this standard precludes DTE-DTE application.

2. Reference document. This standard adopts the following American National Standards Institute (ANSI) document to the extent specified herein:

X3.1-1976 Synchronous Signaling Rates for Data Transmission

Copies may be obtained from ANSI, Inc., 1430 Broadway, New York, New York 10018. Federal agencies may obtain copies with FIPS Publication 22-1 from the National Technical Information Service, Document Processing Branch, 5285 Port Royal Road, Springfield, VA 22161

3. Changes. When a Federal agency considers that this standard does not provide for its essential needs, a statement citing inadequacies shall be sent in duplicate to the General Services Administration, Federal Supply Service, FMH, Washington, DC 20406, in accordance with provisions of Federal Property Management Regulations 41 CFR 101-29.3. The General Services Administration will determine the appropirate action to be taken and will notify the agency.

PREPARING ACTIVITY:

National Communications System (NCS)
Office of Technology and Standards
Washington, D.C. 20305

Records of coordination with affected Federal Agencies are maintained by the preparing activity.

This document is available from the General Services Administration (GSA), acting as agent for the Superintendent of Documents. A copy for bidding and contracting purposes is available from GSA Business Services Centers. Copies are for sale at the GSA, Specification Consumer Information Distribution Branch, Building 197 (Washington Navy Yard), Washington, DC 20407 for 25cents each.
