MILITARY SPECIFICATION SHEET

# METER, TIME TOTALIZING, MINIATURE, DIGITAL, 28 V DC

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirement for acquiring the meter described herein shall consist of this specification and the latest issue in effect of MIL-M-7793.

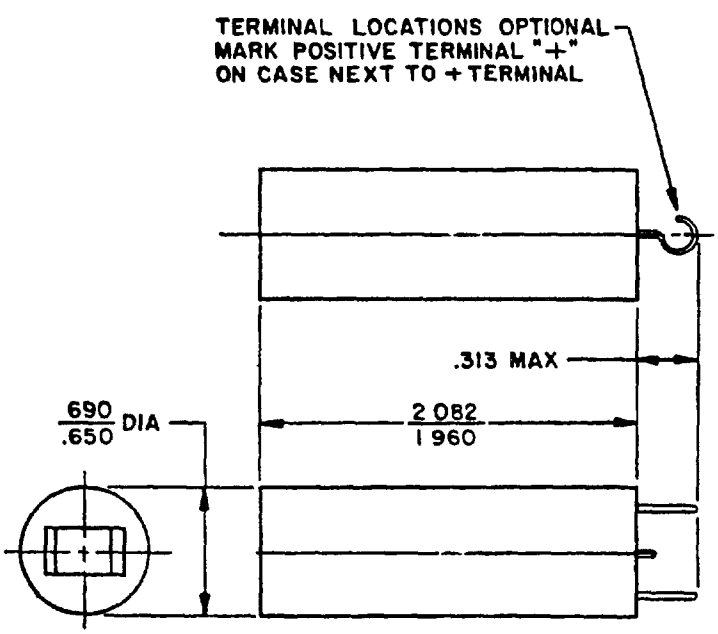

FIGURE 1. M7793/5-001 (without flange).

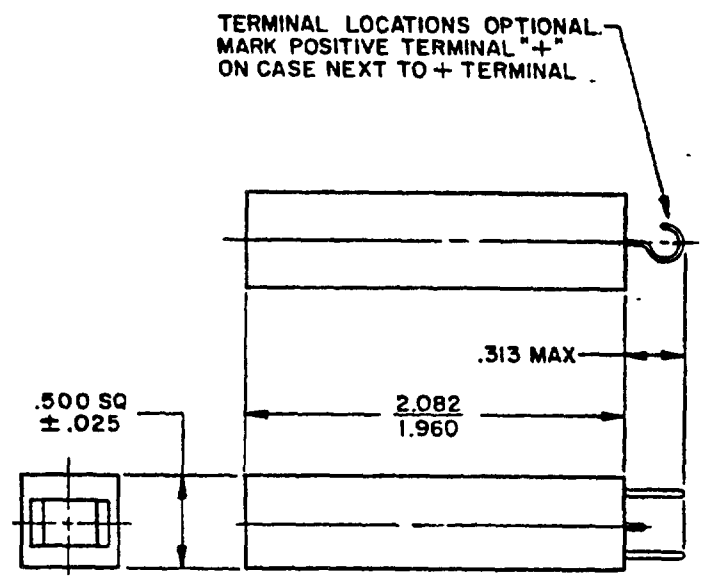

FIGURE 2. M7793/5-002 (without flange).

AMSC N/A

REQUIREMENT:

1. All dimensions are in inches. Unless otherwise specified, tolerances shall be ±.015.

Performance:

Life accuracy: ±1.0% from 23 to 29 V DC and -55 to +100°C.

Part numbers: The part number shall designate a round or a square meter and the associated mounting flange to be supplied packaged together.

| Part Number | Meter | Flange |
|---|---|---|
| M7793/5-001 | Round | MS3345-1 |
| -002 | Square | MS3345-2 |

Power consumption: Power consumption at 28 V DC shall not exceed 1.0 W.

Operating temperature range: -65 to +125°C.

Time range: Total readout of the meters shall be 9999 hours.

Transient protection: No temporary or permanent degradation shall be produced in the meter for the input voltage and time values shown in MIL-STD-704A, Figure 9, Curve 1 (80 V transients).

Transient generation: The meter shall not produce transients that exceed the limits of MIL-STD-704A, Figure 9, Curve 1 (80 V transients).

Voltage range: Operating voltage shall be from 23 to 32 V DC.

Weight: Weight shall be not greater than 2.0 ounces with MS3345 flange attached.

Dielectric test voltages: 350 Vrms (altitude)
600 Vrms (room)

Random vibration required.

NOTE:

1. M7793/5-001 supersedes and is a direct replacement for MS17321-9.
M7793/5-002 supersedes and is a direct replacement for MS17321-10.

Custodians:
Navy - AS
Army - AR
Air Force - 99

Preparing activity:
Navy - AS
