# COMMERCIAL ITEM DESCRIPTION

## DICTIONARY, ENGLISH, TYPE II (MINIMUM 150,000 ENTRIES)

The General Services Administration has authorized the use of this Commercial Item Description, for all Federal agencies.

Scope. This description covers single volume, hard cover dictionaries which are used as reference sources for English language words.

1. **SALIENT CHARACTERISTICS:**

A. The dictionary shall:

1. Identify the publisher and those individuals or organizations having major editorial and contributory responsibilities.

2. Be the publisher's latest copyrighted edition.

3. Have had entries added and updated within the 3-year period prior to the Invitation for Bid.

4. Have been rewritten (revised) on a page-by-page basis at least once in the 12-year period prior to the Invitation for Bid.

5. Have no less than the indicated number of entries, each entry including main entry words, each defined part of speech of the main entry, inflected forms of the main entry word, run-on entries, variant spellings, idioms, and words with affixes.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: General Services Administration, Federal Supply Service, Engineering Branch, 26 Federal Plaza, New York, NY 10278

Distribution Statement A:
Approved for public release;
distribution is unlimited.

FSC 7610

Check the source to verify that this is the current version before use.

6. Contain clear, precise definitions of a level compatible with general office use.

7. Include a guide for its proper use, a key to pronunciation, general rules of punctuation and capitalization (either as a separate section or contained in the main body), a table of U.S. customary units of weights and measures and their metric equivalents, place names, and names of famous people.

8. Have not less than 12 cutout thumb indices.

9. Lie flat when opened.

B. **Entries**:

1. Main entry words shall be syllabified or hyphenated and the part of speech label or labels identified.

2. Pronunciation of the main entry word shall be indicated using a defined system of phonetic transcription and stress marks. Key words used for pronunciations shall appear throughout the dictionary.

3. In addition to definitions, the entry shall include etymologies when known, pictorial illustrations when needed, and/or examples of how the main entry word is used, when helpful.

4. Synonyms and antonyms shall be included in the entry when useful.

C. **Printing**:

1. Page format shall be 2 columns, justified, and shall be conducive to easy reference in accordance with normal commercial practice.

2. Printing of main entry words shall contrast with other forms in the entry.

3. Type shall be clear and sufficiently leaded.

4. Maps and illustrations shall be of a good quality and complement the text effectively.

Check the source to verify that this is the current version before use.

D. **Paper and Binding**:

1. The paper stock shall meet the requirements of Table 1 when tested in accordance with paragraph 4.C.(3).

Table 1

| Characteristic | Requirement |
|---|---|
| Bursting strength | 9 points, minimum |
| Basis weight - 500 (60.50 cm x 96.52 cm) (25 in x 38 in) | 12.70 kg ± 5 percent (28 lbs, ± 5 percent) |
| Tearing resistance (average grams each direction) | 18 minimum |
| Opacity | 80 percent minimum |
| Brightness | 75 percent minimum |

2. The binding, coverboard, and cover shall be in accordance with good commercial practice.

3. The type of binding shall be either Smith-sewn, side sewn, press pasted adhesive or perforation-notch adhesive. For the purpose of this document, press pasted adhesive binding shall mean that adjacent pages of each signature are bonded together using a flexible, durable adhesive and that signature spines are not cut off. The gathered signatures shall also be joined using a flexible, durable adhesive. The adhesive shall be one such that bonded areas cannot be separated without causing damage to those areas. For the purpose of this document, perforation-notch adhesive binding shall mean that the pages in each signature are bonded together using a flexible, durable adhesive which has been applied through special press perforation in the backbone of the signature. In perforation-notch binding, a small amount of paper is removed from the signature spines in the binding process.

E. **Bleaching**: To obtain an acceptable brightness, a chemical bleaching process may be used. When specified in the ordering data (See Section 6), the bleaching process shall not include the use of

chlorine, chlorine dioxide, hypochlorite or other chlorine containing compounds. Certification of compliance shall be made available upon request by the Government.

**F. Workmanship**: The dictionary shall be free from any defects which affect appearance or serviceability.

2. **APPLICABLE DOCUMENTS AND DOCUMENT SOURCES**: The following documents form a part of this Commercial Item Description to the extent specified herein. Unless otherwise indicated, the issue in effect on the date of invitation for bids or request for proposal shall apply:

**Federal Standard**:

Fed. Std. No. 123, Marking for Domestic Shipment (Civil Agencies)

Single copies of this Commercial Item Description, or other Commercial Item Descriptions required by activities outside the Federal Government for bidding purposes are available without charge from General Services Administration Business Serv Centers in Boston; New York; Philadelphia; Washington, D.C.; Atlanta; Chicago; Kansas City, MO; Fort Worth; Houston; Denver; Los Angeles; San Francisco; and Auburn, WA.

**Federal Regulations**:

Copies of the Federal Acquisition Regulation (FAR) can be obtained from Commerce Clearing House, Inc. 4025 W. Peterson Ave., Chicago, Ill 60646, Phone (312) 583-8500. Ask for Par. 23.403, Policy.

**Military Standards**:

MIL-STD-105, Sampling Procedures and Tables for Inspection by Attributes

MIL-STD-129, Marking for Shipment and Storage

Copies of Military Specifications and Standards required by contractors in connection with specific procurement functions should be obtained from Standardization Documents Order Desk, Building 4D, 700 Robbins Avenue, Philadelphia, PA 19111-5094

**Industry Standard**:

TAPPI test methods are available from the Technical Association

the Pulp and Paper Industry, One Dunwoody Park, Atlanta, Georgia 30341.

**Executive Order 12873**:

Copies of Executive Order 12873, dated October 20, 1993 may be obtained from:

The White House Publications Office
New Executive Office Building
White House
Att: Publications
Washington, DC. 20500
(202) 395-7332

3. **REGULATORY REQUIREMENT**:
The contractor shall certify that the minimum content standard of the paper shall be no less than 50% recovered materials including 20% postconsumer materials in accordance with Executive Order 12873, section 504 (b), dated October 20, 1993 (See definition of postconsumer materials and recovered materials in sections 203 and 205). As an alternative to meeting the standards of section 504(b) for all printing and writing papers, the minimum content standard shall be no less than 50% recovered materials that are a waste material byproduct of a finished product other than a paper or textile product which would otherwise be disposed of in a landfill, as determined by the State in which the facility is located, in accordance with Executive Order 12873, section 504 (c), dated October 20, 1993. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

For the binding, cover and coverboard, the offerer/contractor is encouraged to use recovered materials to the maximum extent practicable in accordance with paragraph 23.403 of the Federal Acquisition Regulation.

3.1 **Labeling of recycled content:** The recycled content shall be marked on the product or unit pack.

4. **QUALITY ASSURANCE**:

A. **Responsibility for Inspection**: Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all the inspection requirements of this CID. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The

Government reserves the right to perform any of the inspections set forth in the Commercial Item Description, where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements (See Section 6, Ordering Data).

B. **Sampling**: All sampling shall be in accordance with MIL-STD-105.

(1) **Sampling for Visual Inspection**. A random sample of dictionaries shall be taken from each lot. The inspection level shall be S-4 with an Acceptable Quality Level (AQL) of 4.0 percent defective. The sample unit shall be one dictionary.

(2) **Sampling for Dimensional Inspection**. A random sample of dictionaries shall be taken from each lot. The inspection level shall be S-3 with an AQL of 4.0 percent defective. The sample unit shall be one dictionary.

(3) **Sampling for Tests**. A random sample of dictionaries shall be taken from each lot in accordance with each respective TAPPI test method. The sample unit shall be one dictionary.

C. **Inspections**.

(1) **Visual Examination**. Samples taken in accordance with paragraph 4.B.1. shall be examined to verify that the superficial product requirements are in compliance with Section 1.

(2) **Dimensional Examination**. Samples taken in accordance with paragraph 4.B.2. shall be examined to verify that all dimensionally measurable product requirements are in compliance with Section 1.

(3) **Tests**. Samples taken in accordance with paragraph 4.B.3. shall be subjected to the following tests to demonstrate consistency in product functionality, durability, and performance expectations.

(a) For bursting strength use TAPPI test method T-403.

(b) For basis weight use TAPPI test method T-410.

(c) For tearing resistance use TAPPI test method T-414.

(d) For opacity use TAPPI test method T-425.

(e) For brightness use TAPPI test method T-452.

5. **Packaging, Packing and Marking.** Packaging, packing and marking shall be as specified in the contract or order.

6. **NOTES.**

**A. Ordering Data**: Purchasers should select the preferred options permitted herein, and include the following information in procurement documents:

(1) Title, number, and date of this Commercial Item Description.

(2) If non-chlorine bleaching is desired.

(3) Arrangement for inspections and inspection facilities, if different than provisions under Quality Assurance.

(4) Special packaging and packing, if different than provisions in Packaging and Packing.

(5) Special marking, if different than provisions in Marking.

(6) Specify, only if Bar Code marking is not required.

MILITARY INTEREST:

NONE: DoD has no registered interest in revisions and amendments to this Commercial Item Description until further notice.
