COMMERCIAL ITEM DESCRIPTION

PACK, PETROLATUM GAUZE

The General Services Administration has authorized the use of this Commercial Item Description.

Salient Characteristics:

Shall be a sterile petrolatum-impregnated gauze pack 1/2 ± 1/16 inch wide by 72 inches long (70 inches minimum) suitable for use as a surgical packing. The pack shall be folded to permit easy dispensing from its container. The pack shall be sterile when tested in accordance with the USP.

The gauze tape shall be first quality bleached cotton gauze, plain weave, having a minimum warp thread count of 28 yarns full width and a minimum of 25 filling yarns per inch. The gauze tape shall have woven selvage edges and a minimum tensile strength (full width) of 13 pounds in the length direction when tested in accordance with Method 5100 of Federal Test Method Standard No. 191. The gauze tape shall conform to the chemical and purity requirements of Absorbent Gauze, USP.

The petrolatum shall meet the requirements of White Petrolatum, USP, except the melting range shall be 125° to 140°F (52° to 60°C) and the consistency range shall be between 150 to 240 as determined by a penetrometer.

The gauze shall be evenly and uniformly impregnated so that not less than 6.0 grams of white petrolatum remain in the pack after removal from the container when tested by the assay method for Petrolatum Gauze, USP. The finished pack shall be of one continuous piece free from loose threads and ravelings.

AMSC\NA FSC 6510

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Workmanship. The impregnated packs shall be free from defects which detract from their appearance or impair their serviceability.

Unit. Package (PG). Each pack shall be folded and packaged in a suitable plastic container or tube, or a peel-open type package, and heat sealed. The container, tube or package shall permit easy dispensing and shall retain sterility of contents unless package is damaged or manually opened. One package containing 12 individually packaged petrolatum gauze packs, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplied and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual and auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Sampling for examination. Sampling for examination shall be conducted in accordance with MIL-STD-105 and as specified herein. Unit of product for examination purposes shall be one pack. Sampling shall be Inspection level II with an acceptable quality level (AQL) of 2.5 (percent defective).

Examination. Examination shall be conducted to determine compliance with specification requirements.

Sampling for tests. Sampling for tests shall be conducted in accordance with MIL-STD-105 and as specified herein. Unit of product for test purposes shall be one pack. Sampling shall be Inspection level S-1 with an AQL of 2.5 (percent defective).

Check the source to verify that this is the current version before use.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Metric Products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerance specified using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this document are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerance specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Number is covered by this document:

NSN	ITEM IDENTIFICATION
6510-01-098-5804	PACK, PETROLATUM GAUZE, 1/2 by 72 Inches, 12s

Ordering data. Intermediate/exterior package quantities and labeling and marking must be specified in the contract and/or order.
