INCH-POUND

MIL-C-39003H
AMENDMENT 1
7 May 1993

MILITARY SPECIFICATION

CAPACITORS, FIXED, ELECTROLYTIC (SOLID ELECTROLYTE), TANTALUM,
ESTABLISHED RELIABILITY, GENERAL SPECIFICATION FOR

This amendment forms a part of MIL-C-39003H, dated 20 March 1992, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 4

3.5.2.1, delete in its entirety and substitute: "3.5.2.1 Solder dip (retinning). The capacitor manufacturer or his approved category B distributor may solder dip/retin the leads of the capacitors supplied to this specification. The distributor's hot solder dip/retinning process shall be the same as the manufacturer's process, which shall be approved by the qualifying activity."

3.29, Last paragraph: Delete in its entirety.

PAGE 15

4.4.4.1.2, Line 4: Delete "be" and substitute "the".

4.5f, Before "The" add "(Exponential only)".

PAGE 19

TABLE VI, Inspection column, Subgroup 2: After "Mechanical examination" add "(physical dimensions only)".

TABLE VI, Subgroup 3: Delete the physical dimensions test and its associated Requirement paragraph number.

PAGE 20

TABLE VII, Subgroup 1, Surge current (styles CSR21 and CSR33 only) test: Move this test and its associated requirement and Test method paragraph numbers to below the Life (accelerated failure rate) test and its associated Requirement and Test method paragraph numbers.

TABLE VII, Inspection column, Subgroup 2: After "Mechanical examination" add "(physical dimensions only)".

TABLE VII, Subgroup 3: Delete the physical dimensions test and its associated Requirement paragraph number.

TABLE VII, Inspection column, Subgroup 4 heading: Add "4/".

TABLE VII, Bottom of table, add the following: "4/ Sampling need only conform to the requirements of 4.6.1.1.1 exponential distribution inspection lot.".

1/ If the manufacturer can demonstrate that this test has been performed five consecutive times with zero failures, the frequency of this test, with the approval of the qualifying activity, can be performed on an annual basis. If the design, material, construction or processing of the part is changed, or if there are any quality problems or failures, the qualifying activity may require resumption of the original test frequency.

2/ If the manufacturer can demonstrate that these tests have been performed five consecutive times with zero failures, these tests, with the approval of the qualifying activity, can be deleted. The manufacturer, however, shall perform these tests every three years after the deletion as part of long term design verification. If the design, material, construction or processing of the part is changed, or if there are any quality problems, the qualifying activity may require resumption of the specified testing. Deletion of testing does not relieve the manufacturer from meeting the test requirements in case of dispute.

3/ This failure shall not be for the shock (specified pulse) or the vibration, high frequency test."

4.6.2.1.1.2: Delete in its entirety.

4.7.4, add new subparagraph c: "c. Magnification: Not applicable.".
