COMMERCIAL ITEM DESCRIPTION

PSYLLIUM HYDROPHILIC MUCILLOID WITH DEXTROSE

The General Services Administration has authorized the use of this commercial item description.

This commercial item description describes a Psyllium Hydrophilic Mucilloid with Dextrose.

Salient characteristics. Psyllium Hydrophilic Mucilloid with Dextrose shall be a uniform, powdered mixture containing approximately equal parts of the mucilaginous portion (outer epidermis) of Blond Psyllium Seeds (Plantago Ovataforsk) and of Powdered Dextrose, USP, and may contain other suitable ingredients including a suitable flavoring agent.

End item shall swell to between 25 and 35 ml when subjected to the swelling test specified below:

Swelling test for end item. Two (2) one-gram samples of the end item shall be tested as follows for swelling: Add a one (1.0) gram sample of the finished preparation to 100 ml of water in a 250 ml glass stoppered graduated cylinder. Shake for 5 minutes and then allow the sample to stand at room temperature for 24 hours with occasional shaking. The material shall then be allowed to settle undisturbed for an additional 12 hours. Readings shall then be taken at the top of the gel in determining the level of swelling. The average of the two samples shall be reported as the result.

All ingredients shall be of a pharmaceutical grade.

Workmanship. The product shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Can (CN). One can containing 397 grams to 454 grams, as specified, constitutes one unit.

FSC 6505

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract of purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the government. The government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and conforms to the producer's own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling and marking. Unless otherwise specified, preservation, packaging and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.
