NOTICE—When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility, nor any obligation whatsoever, and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

FED. SUP CLASS
6640

PART NUMBER	RESERVOIR CAPACITY oz
MS36344-1	6

MATERIAL: Burner shall be brass in accordance with Federal Specification QQ B-626, Composition 11.

DESIGN: The burner shall consist of a tank, preheating and filling cap, generator tube with flame tip, wick and vent inside the generator tube, burner tube, and a handle for adjusting the flame. The burner shall be of the self-generating type, capable of vaporizing and burning alcohol with a continuous flame up to 5 inches in height, similar to that produced by blast.

NOTES:
1. For design feature purposes, this standard takes precedence over procurement documents referenced herein.
2. Referenced documents shall be of the issue in effect on date of invitations for bid.

APPROVED 28 JUN 1962 REVISED

This military standard is approved by the Department of Defense and is mandatory on all activities. Selection for all new engineering and design applications and for repetitive use shall be made from this document.
