NO SUPERSEDING STANDARD

MATERIAL: [illegible] polypropylene, O-ring seal is made of fluoroelastomer. [illegible] and III caps shall be made of ethylenetetrafluoroethylene. [illegible]shall be autoclavable.

DESIGN: Type I cap shall provide a tight friction-fit for storing or transporting liquids and to prevent aerosols at low-speed centrifugation. These caps will not provide a liquid tight seal during high-speed centrifugation.

Types II and III caps seal centrifuge tubes and bottles for use at high speeds. Each assembly consists of a screw cap, a plug, and an O-ring. Type III cap has a shoulder support ring to prevent bending; shifting or collapse of bottle neck.

NOTE: Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements specified herein.
