MILITARY SPECIFICATION SHEET

ELECTRON TUBE, POWER

TYPE 7248

This amendment forms a part of Military Specification Sheet MIL-E-1/1512B (USAF) dated 29 January 1971.

Page 2

QCI Part 3, add:

"Method 1231 -- Peak Emission -- see Note 11"

Conditions	Symbol	Limits Min.	Limits Max.	Unit
ec_1 = oc_2 = eb = 400 v	ia	1.5	3.2	a
ec_1 oc_2 eb 2400 v	ia	5.0	---	a

QCI Part 3, delete: "Service Life Guarantee" and "See Note 11".

Page 3

Note 11: Delete present Note 11 and substitute new Note as follows:

11. The number of tubes to be tested shall be one percent of each month's production, but not less than one nor more than three tubes shall be tested.

Note 12: Delete present Note 12 and substitute new note as follows:

12. With respect to products requiring qualification, awards will be made only for such products as have, prior to the time set for opening of bids, been tested and approved for inclusion in the applicable Qualified Products List (QPL) whether or not such products have been so listed by that date. The attention of the suppliers is called to this requirement, and manufacturers are urged to arrange to have the products that they propose to offer to the Federal Government tested for qualification in order that they be eligible to be awarded contracts or order for products covered by this specification. The activity responsible for qualification is the Air Force Logistics Command, Engineering and Technical Support Division (AFLC/[illegible]GE) of Interservice/Interagency Support Office, Wright-Patterson AFB OH 45433.

Custodian:
Air Force - 85

Preparing activity:
Air Force - 85

Review activities:
