MIL-B-36270B
AMENDMENT 1
6 June 1977

MILITARY SPECIFICATION

BANDAGE, GAUZE, CALAMINE-GELATIN-
ZINC OXIDE IMPREGNATED

This amendment forms a part of Military Specification MIL-B-36270B dated 3 May 1976, and is approved for use by all Departments and Agencies of the Department of Defense.

Page 2

3.1.1 Paste. In the second line change "170 grams" to "165 grams".

3.1.3 Microbial limit. Delete entirely and substitute:

"3.1.3 Microbial limit. Shall be in accordance with the microbial limit test in the USP for Zinc Gelatin Impregnated Gauze. The sample preparation procedure can be suitably modified."

Page 3

3.1.5 Moisture and adhesion test. Add the following to this paragraph:

"The requirement for the moisture and adhesion test may be waived, provided the offeror furnishes a copy of the test results for the moisture and adhesion test as performed on any product lot (previously or currently prepared by the offeror), composed of the same formula and manufactured identically as the product offered to the Government. In addition the offeror shall submit certification that the lots offered to the Government are composed of the same formula and manufactured identically as the material tested for the moisture and adhesion test."

Add the following new paragraph:

"3.1.5.1 One (1) bandage shall be wrapped around a suitable cylinder form and shall have sufficient moisture for smooth application and shall adhere to the area being wrapped and to itself when allowed to dry."
