32	2	2.500-12 UN-3B	2.675 (67.95)	.938 (23.83)	1.781 (45.24)	2.524 (64.11)		3.480 (88.39)	2.844 (72.24)	1.375 (34.93)

NOTES:
1. Dimensions are in inches.
2. Metric equivalents are given for information only.
3. Unless otherwise specified angular tolerances + .500°.
4. Finish: Surface texture symbols are defined in ASME Y14.36.
5. Measurements for surface finish: Roughness average is defined in ASME B46.1.

REQUIREMENTS:

Dimensions and configurations: See figure 1.

The countersink to diameter A and counterbore to diameter D shall be free from longitudinal and spiral tool marks.

Break all sharp edges, remove all hanging burrs and slivers, which might become dislodged under usage.

Certain provisions of this standard are subject of international standardization agreement STANAG 3323. ED.5(1) When revision or cancellation of this standard is proposed, the departmental custodians will inform their respective departmental standardization offices so that appropriate action may be taken respecting the international agreement concerned.

Changes from previous issue. The margins of this specification are marked with vertical lines to indicate where changes from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous issue."
