TIER II ADOPTION NOTICE

ISO/IEC/IEEE 15939-2017, Systems and software engineering – Measurement process", was adopted on 01 June 2024 for use by the Department of Defense (DoD). Proposed changes by DoD activities must be submitted to the DoD Adopting Activity at OUSD(R&E), Systems Engineering and Architecture, Deputy Director, SE Policy and Guidance, 4800 Mark Center Drive, Suite 16F09-02, Alexandria, VA 22308.

ISO/IEC/IEEE 15939-2017 defines a measurement process applicable to system and software engineering and management disciplines. The process is described through a model that defines the activities of the measurement process that are required to adequately specify what measurement information is required, how the measures and analysis results are to be applied, and how to determine if the analysis results are valid. This process can be applied throughout all stages of the life cycle to aid the planning, managing, assessing, and decision-making. The measurement process is flexible, tailorable, and adaptable to the needs of different users.

ISO/IEC/IEEE/15939-2017 was prepared by Joint Technical Committee ISO/IEC JTC 1, Information technology, Subcommittee SC 7, Systems and software engineering, in cooperation with the Software & Systems Engineering Standards Committee of the IEEE Computer Society, under the Partner Standards Development Organization cooperation agreement between ISO and IEEE.
