SEDING STANDARD

	TYPES OF GAS USED
MS36278-1	Natural Artificial Liquefied Petroleum

MATERIAL: The burner shall be brass in accordance with Federal Specification QQ-B-626, Composition 11. The base shall be cast iron in accordance with Federal Specification QQ-I-652, Class 20.

FINISH: The base shall have a protective coating of baked black enamel. The burner shall have natural brass or nickel-plated finish.

DESIGN: The burner shall have a double brass tube, with a stopcock control for each. The burner shall be supplied with three tips.

NOTES:
1. For design feature purposes this standard takes precedence over procurement documents referenced herein.
2. Referenced documents shall be of the issue in effect on date of invitations for bid.

☆U.S. GOVERNMENT PRINTING OFFICE: 1979 — 603-121/221

22 JUN 1962 REVISED

NOTICE—When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility, nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

This military standard approved by the Department of Defense and is mandatory as all activities. Selection to new engineering and design applications and for repetitive use shall be made from its document.
