ZZ–H–0141a
AMENDMENT–1
4 AUGUST 1952

EMERGENCY FEDERAL SPECIFICATION

HEELS; RUBBER

This amendment which forms a part of Emergency Federal Specification ZZ–H–0141a, dated 2 August 1951, was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

Page 2, paragraph 3.4.2: Add the following at the end of the paragraph: "Washers shall be located in two planes, relative to the tread surface of the heel, exclusive of the buttons and the ridges, using the center back washer as the single plane of reference for the five back washers, and the corner breast washers as the single plane of reference for the eight forward washers. The center back and corner breast washers shall measure ¼ ± 1/32 inch in rubber thickness between the attaching surface and the inside bottom cup of the washers. Heels shall be stamped on the attaching surface at the center breast with the letter 'W' not less than ¼ inch in height."
