PAGE 3

Add new paragraph as follows:

"3.3.1.1 Reclaimed materials. The use of reclaimed materials shall be encouraged to the maximum extent possible without jeopardizing the intended end use of the item."

3.3.2.1: Delete "MS 33586" and substitute "MIL-STD-889".

3.3.3: Delete paragraph entirely and substitute:

"3.3.3 Elastomers. All elastomers shall be silicone materials and shall be free from foreign agents which may cause objectionable or intolerable odors."

PAGE 7

3.7.1: Delete "MIL-S-7742" and substitute "FED-STD-H28/2".

3.7.2: Add the following sentence at end of paragraph: "Sealing of pipe threaded joints shall be secured with tape conforming to MIL-T-27730, applied as directed on the dispenser.

3.10: Delete "MIL-D-5028" and substitute "DOD-D-1000".

3.11: Delete "might" and substitute "may".

3.12: Delete last sentence of paragraph.

PAGE 8

4.1.b: Delete "Preproduction" and substitute "First Article".

PAGE 9

4.3.2: Delete the first sentence and substitute "The high pressure gas used in testing the regulators shall be either oxygen conforming to MIL-O-27210, Type I, or nitrogen conforming to BB-N-411, Type I, Class 1, or air conforming to BB-A-1034, Grade A or C."

PAGE 11

4.5: Delete "Preproduction" and substitute "First Article".

4.5.1, title and line 2: Delete "Preproduction" and substitute "First Article".

4.5.2, title and line 2: Delete "Preproduction" in three instances and substitute "First Article". Line 3, delete "MIL-T-9107" and substitute "MIL-STD-831".

Check the source to verify that this is the current version before use.

Delete 4.5.3 and 4.5.4 entirely and substitute the following:

"4.5.3 First article tests. First article tests shall consist of all tests described under Test Methods."

Delete Section 5 entirely and substitute the following:

"5. PACKAGING

5.1 Preservation and packaging. Unless otherwise specified by the procuring activity, the regulators shall be packaged in accordance with MIL-STD-794, level A or C, as specified (see 6.2).

5.1.1 Level A. Each regulator shall be cleaned and packaged in accordance with method IA of MIL-P-116. The regulator shall be cleaned by an appropriate procedure of MIL-P-116 that does not employ petroleum or hydrocarbon products. Each regulator shall then be packaged within a bag fabricated of transparent flexible barrier conforming to type II of MIL-B-22191. The bag shall be closed by heat seal, taping, or twist seal. Cushioning material shall be clean, dry, and of a composition that does not have dusting characteristics.

5.1.2 Level C. Each regulator shall be packaged in a manner that will afford adequate protection against corrosion, deterioration, and physical damage during shipment from supply source to the first receiving activity for immediate use. This level may conform to the supplier's commercial practice provided the latter meets the requirements of this level.

5.2 Packing. Packing shall be level A, B, or C as specified (see 6.2).

5.2.1 Level A. Regulators preserved and packaged as specified in 5.1.1 shall be packed in exterior type shipping containers conforming to PPP-B-576, PPP-B-585, PPP-B-591, PPP-B-601, PPP-B-621, or PPP-B-636. As far as practical, exterior containers shall be of uniform shape and size, be of minimum cube and tare consistent with the protection required, and contain identical quantities. The gross weight of each pack shall be limited to approximately 200 pounds. Containers shall be closed and strapped in accordance with the applicable container specification or appendix thereto. Containers shall be provided with a case liner conforming to MIL-L-10547 and shall be sealed in accordance with the appendix thereto. The case liner shall not be required when the unit, intermediate, or exterior container conforms to PPP-B-636 and is sealed at all joints and seams, including manufacturer's joint, and tape conforming to PPP-T-60.

5.2.2 Level B. Regulators preserved and packaged as specified in 5.1.1 or 5.1.2 shall be packed in domestic type exterior containers conforming to PPP-B-576, PPP-B-585, PPP-B-591, PPP-B-601, PPP-B-621, or PPP-B-636. Exterior containers shall be of minimum cube and tare consistent with the protection

required. As far as practical, exterior containers shall be of uniform shape and size and shall contain identical quantities. The gross weight of each pack shall be limited to approximately 200 pounds. Containers shall be closed and strapped in accordance with the applicable container specification or appendix thereto. When fiberboard containers are used, the fiberboard shall meet the special requirements table of PPP-B-636, as applicable.

5.2.3 Level C. Packages which require overpacking for acceptance by the carrier shall be packed in exterior type shipping containers in a manner that will insure safe transportation at the lowest rate to the point of delivery. Containers shall conform to Consolidated Freight Classification Rules or regulations of other common carriers as applicable to the mode of transportation.

5.3 Precautionary Marking. The following precautionary marking shall appear on each package: CAUTION: DO NOT ALLOW CONTAMINANTS OF ANY KIND TO BE USED ON OR ABOUT THE OXYGEN REGULATORS."

6.2,b: Delete "Preproduction" and substitute "First article".
