MIL-A-50210 (AR)
AMENDMENT 1
10 April 1981

MILITARY SPECIFICATION
ACID, MIXED
(For Use in Nitration of Explosives)

"This amendment forms a part of Military Specification MIL-A-50210 (MU), dated 6 December 1968."

Page 1

Add the following Preamble underneath the title: "This specification is approved by U.S. Army Armament Research and Development Command, and is available for use by all Departments and Agencies of the Department of Defense."

Page 2

3.2 Delete in its entirety and substitute the following: "Residue on evaporation. - 0.5 percent, maximum."

3.3 Delete in its entirety.

Page 5

4.3.1 Delete in its entirety and substitute the following: 4.3.1 Residue on evaporation - Major Defect, Code No. 01001 (see 6.2) - Transfer approximately 40 grams of the well mixed sample to a glass stoppered weighing bottle. Stopper the bottle, weigh and pour most of the contents into a tared platinum or silica dish. Reweigh the bottle and consider the difference between the weights to the sample weight. Place dish in a hood and heat slowly and gently, to avoid spattering, until the evolution of fumes has ceased and then heat to a dull red for 3-5 minutes. Cool in a desiccator and weigh. Calculate the increase in weight of the dish as percentage of residue."

4.3.2 Delete in its entirety.
