COMMERCIAL ITEM DESCRIPTION

LAMP, INCANDESCENT
(SEALED BEAM, TRADE NO. 4863)

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification W-L-50.

This description covers a sealed beam two filament military automobile incandescent lamp.

Salient characteristics:

PAR 56, 178 mm (7 inch) diameter bulb
Design volts - 28 for each beam
Watts - 80 watts for higher beam, 60 watts for lower beam
Base - waterproof terminals
Filament designation - CC 6 for each filament
Maximum overall length - 5 inches (127 mm)
Rated average life - 400 hours for each beam
Lower beam filament is shielded

Workmanship. The lampshall not have bent contacts, slight or complete discoloration of the lens or reflective coating, small bubbles in the glass, cracked glass, peeled reflective coatings, and open or shorted filaments.

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

Preservation, packaging, packing, labeling, and marking. The preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.

Note: NSN is 6240-00-686-4168

MILITARY INTERESTS:

None. DoD has waived coordination to this commercial item description until further notice.
