MIL-N-23407B(AS)
AMENDMENT 1
31 July 1973

MILITARY SPECIFICATION

NAVIGATION SET, RADAR AN/APN-153(V)

This amendment forms a part of Military Specification MIL-N-23407B(AS) dated 1 April 1967 and has been approved by the Naval Air Systems Command, Department of the Navy.

Page 9, paragraph 3.4.6: Delete and substitute

"3.4.6 Sensitivity - The minimum Receiver-Transmitter sensitivity shall be - 88 dbm when measured by means of a test signal from an FM-CW source. Alternately, the minimum Receiver-Transmitter sensitivity shall be - 95 dbm when measured by means of a test signal from a pulsed FM source with approximately 25% duty ratio such as is used in the TS-2045."
