MIL-B-60410 (MU)
AMENDMENT 2
21 June 1972
SUPERSEDING
AMENDMENT 1
11 February 1972

MILITARY SPECIFICATION

BLASTING MACHINE, HANDLE OPERATED, METAL CASE, 10 CAP CAPACITY

This Amendment forms a part of Military Specification MIL-B-60410 (MU) dated 21 Sept 1966.

Page 5, paragraph 3.4.2: Delete reference to "52 ohms" and substitute "35 ohms". Add to end of last sentence: "when tested on a load of "35 ohms".

Page 8, paragraph 3.9: Add to end of paragraph the following: "The instruction plate shall indicate the maximum external resistance through which the blasting machine can fire as 'Maximum. ...35 ohms'. The NATO Symbol of Interchangeability shall be applied to the brass instruction plate in accordance with Figure I."

Page 17, paragraph 4.4.1: Add to end of paragraph - "(Destructive)".

Page 20, paragraph 5.3: Add to end of paragraph the following: ", and shall indicate the designation 'Maximum.....35 ohms'. The NATO Symbol of Interchangeability shall be applied to each unit interior and exterior shipping container in accordance with Figure I."

Page 21, paragraph 6.1: Delete 6.1.b, "Data Cards" in its entirety.

Page 24, paragraph 6.7: Add the following:
"6.7 International standardization agreement.-Certain provisions of this specification (sections 3 and 5) are the subject of international standardization agreement STANAG No. 2818. When amendment, revision or cancellation of this specification is proposed which will effect or violate the international agreement concerned, the preparing activity will take appropriate reconciliation action through international standardization channels including departmental standardization offices, if required."

Page 25, Add "Figure I".
