MILITARY SPECIFICATION

CLEANER, BURNER SLOT, FOR RANGE, FIELD, M-1937

This specification is approved for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 Scope. This document covers one type and size of burner slot cleaner for the accessory outfit of the gasoline field range outfit.

2. APPLICABLE DOCUMENTS

2.1 Government documents. Unless otherwise specified, the following documents of the issue in effect on date of invitation for bids or request for proposal form a part of this document to the extent specified herein.

SPECIFICATIONS

FEDERAL

PPP-B-621	- Boxes, Wood, Nailed and Lock-Corner
PPP-T-60	- Tape: Packaging, Waterproof

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to U.S. Army Natick Research, Development, and Engineering Center, Natick, MA 01760-5014, by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

STANDARDS

FEDERAL

FED-STD-66 - Steel; Chemical Composition and Hardenability

MILITARY

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes

MIL-STD-129 - Marking for Shipment and Storage

DRAWING

U.S. ARMY NATICK RESEARCH, DEVELOPMENT, AND ENGINEERING CENTER

5-11-907 - Cleaner, Burner Slot, for Field Range, M-1937

(Copies of documents required by contractors in connection with specific acquisition functions should be obtained from the contracting activity or as directed by the contracting officer.)

* 2.2 Other publications. Unless otherwise specified, the following document of the issue in effect on date of invitation for bids or request for proposal forms a part of this document to the extent specified herein.

AMERICAN SOCIETY FOR TESTING AND MATERIALS (ASTM)

D 3951 - Standard Practice for Commercial Packaging

(Application for copies should be addressed to the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.)

(Technical society and technical association documents are generally available for reference from libraries. They are also distributed among technical groups and using Federal agencies.)

* 2.3 Order of precedence. In the event of conflict between the text of this document and the references cited herein, (except for associated detail specifications, specification sheets, or MS standards), the text of this document shall take precedence. Nothing in this document, however, shall supersede applicable laws and regulations unless a specific exemption has been obtained.

Check the source to verify that this is the current version before use.

3. REQUIREMENTS

* 3.1 First article. When specified in the contract or purchase order, a sample shall be subjected to first article inspection (see 4.3, 6.2, and 6.3).

* 3.2 Materials. The materials shall conform to applicable document requirements specified herein. Recycled material may be used (see 6.4).

3.2.1 Steel, sheet or strip, CRES. The corrosion-resisting sheet or strip shall be 1/2 hard, AISI 301, 302, 303, or 430 in accordance with FED-STD-66. The sheet or strip shall have a commercial mill finish.

3.3 Design and construction. The construction of the burner slot cleaner shall conform to the requirements specified herein and to the design, details, and dimensions shown on Drawing 5-11-907.

3.4 Finish. The fabricated burner slot cleaner shall have a natural finish in accordance with industry practice.

3.5 Workmanship. The burner slot cleaner shall be free from breaks, cracks, malformations, sharp edges or corners, nicks, and burrs.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the document where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

* 4.1.1 Responsibility for compliance. All items must meet all requirements of sections 3 and 5. The inspection set forth in this document shall become a part of the contractor's overall inspection system or quality program. The absence of any inspection requirements in the document shall not relieve the contractor of the responsibility of assuring that all products or supplies submitted to the Government for acceptance comply with all requirements of the contract. Sampling in quality conformance does not authorize submission of known defective material, either indicated or actual, nor does it commit the Government to acceptance of defective material.

Check the source to verify that this is the current version before use.

4.2 Classification of inspection. The inspection requirements specified herein are classified as follows:

a. First article inspection (see 4.3).
b. Quality conformance inspection (see 4.4).

4.3. First article inspection. When a first article is required (see 6.2), the cleaner shall be examined as specified in 4.4.2.1 and 4.4.2.2. Any nonconformance shall be cause for rejection of the first article.

4.4 Quality conformance inspection. Unless otherwise specified, sampling for inspection shall be made in accordance with MIL-STD-105.

4.4.1 Component and material inspection. In accordance with 4.1, components and materials shall be inspected in accordance with all the requirements of referenced documents unless otherwise excluded, amended, modified, or qualified in this document or applicable purchase document.

4.4.2 End item inspection. A lot shall consist of all burner slot cleaners offered for inspection at one time. The sample unit shall be one completely fabricated burner slot cleaner.

* 4.4.2.1 Visual inspection. The burner slot cleaners shall be examined for the defects listed in table I. The inspection level shall be II, and the acceptable quality level (AQL), expressed in terms of defects per hundred units, shall be 6.5.

TABLE I. Classification of visual defects

Examine	Defect	Classification	
		Major	Minor
Finish	Not as specified		201
Construction and workmanship	Not as specified		202
	Breaks, cracks, malformations, sharp edges or corners, nicks, or burrs	101	

Source: https://assist.dla.mil -- Downloaded: 2026-10-16T13:18Z
Check the source to verify that this is the current version before use.

* 4.4.2.2 Dimensional examination. Inspection shall be made of the end item for compliance with dimensions specified on Drawing 5-11-907. Any deviation from specified requirements shall constitute a defect. The inspection level shall be S-2, and the AQL, expressed in terms of defects per hundred units, shall be 4.0.

4.4.3 Packaging inspection. An inspection shall be made to determine that preservation, packing, and marking comply with section 5 requirements. Defects shall be scored as specified in table II. The lot shall be the number of containers offered for inspection at one time. The sample unit shall be one shipping container fully packaged. The inspection level shall be S-2, and the AQL, expressed in terms of defects per hundred units, shall be 4.0.

TABLE II. Packaging inspection

Examination	Defect
Markings	Omitted; incorrect; illegible; of improper size, location, sequence, or method of application
Materials	Any component missing or damaged, defective, or not as specified
Contents	More or less than required

5. PACKAGING

5.1 Preservation. Preservation shall be level A or Commercial as specified (see 6.2).

5.1.1 Level A. One hundred cleaners shall be nested and secured around the center with one band of tape having a minimum width of 1 1/2 inches, conforming to type I or II, class 3 of PPP-T-60 to form a uniform bundle.

* 5.1.2 Commercial. Cleaners shall be preserved in accordance with ASTM D 3951.

5.2 Packing. Packing shall be level A or Commercial, as specified (see 6.2).

Source: https://assist.dla.mil -- Downloaded: 2026-10-16T13:18Z
Check the source to verify that this is the current version before use.

5.2.1 Level A packing. Three thousand cleaners, preserved as specified in 5.1.1, shall be packed in the most compact manner in a snug-fitting, nailed wood shipping container conforming to class 2, style 4, type 3 load of PPP-B-621, except that lumber throughout shall be minimum 3/4-inch thick and cleats shall be minimum 2 5/8 inches wide. Closure and strapping shall be in accordance with the appendix of PPP-B-621.

* 5.2.2 Commercial packing. Cleaners, preserved as specified in 5.1, shall be packed in accordance with ASTM D 3951.

* 5.3 Marking. In addition to any special marking required by the contract or purchase order, shipping containers shall be marked in accordance with MIL-STD-129 or ASTM D 3951, as applicable.

6. NOTES

6.1 Intended use. The burner slot cleaner is intended for use in cleaning the burner slots of the burner unit for the M-1937 field range.

* 6.2 Ordering data. Acquisition documents should specify the following:

a. Title, number, and date of this document.
b. When a first article is required (see 3.1).
c. Selection of applicable levels of preservation and packing (see 5.1 and 5.2).

* 6.3 First article. When a first article is required, it shall be inspected and approved under the appropriate provisions of FAR 52.209. The first article should be a preproduction sample. The contracting officer should specify the appropriate type of first article and the number of units to be furnished. The contracting officer should include specific instructions in all acquisition instruments regarding arrangements for inspection and approval of the first article.

* 6.4 Recycled material. The contractor is encouraged to use recycled material, provided that it meets the requirements of this document (see 3.2).

6.5 Changes from previous issue. The margins of this document are marked with an asterisk to indicate where changes (additions, modifications, corrections, deletions) from the previous issue were made. This was done as a convenience only, and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous issue.

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document*(s)* or to amend contractual requirements.
