FOREWORD

1. This standard is approved for use by the Naval Sea Systems Command, Department of the Navy, and is available for use by all Departments and Agencies of the Department of Defense.

2. This standard describes general procedures and practices applicable to the construction of unit loads of ammunition, explosives, and associated items for shipping, handling, storage, and underway replenishment (transfer-at-sea).

3. Physical dimensions, weights, and types of loads vary greatly. Therefore, the MIL-STD general document addresses the general requirements. The MIL-STD dash numbered sheets provide specific approved instructions on constructing a unit load for a given item.

4. Comments, suggestions, or questions on this document should be addressed to Commander, Naval Sea Systems Command, ATTN: SEA 05S, 1333 Isaac Hull Avenue, SE, Stop 5160, Washington Navy Yard DC 20376-5160 or emailed to CommandStandards@navy.mil, with the subject line "Document Comment". Since contact information can change, you may want to verify the currency of this address information using the ASSIST Online database at https://assist.dla.mil.

1. SCOPE

1.1 Scope. This standard, consisting of a general document and dash numbered sheets, covers general and detail requirements for the construction of unit loads of ammunition, explosives, and associated items for shipping, handling, storage/stowage, and underway replenishment (transfer-at-sea).

2. APPLICABLE DOCUMENTS

2.1 General. The documents listed in this section are specified in sections 3, 4, or 5 of this standard. This section does not include documents cited in other sections of this standard or recommended for additional information or as examples. While every effort has been made to ensure the completeness of this list, document users are cautioned that they must meet all specified requirements of documents cited in sections 3, 4, or 5 of this standard, whether or not they are listed.

2.2 Government documents.

2.2.1 Specifications, standards, and handbooks. The following specifications, standards, and handbooks form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those cited in the solicitation or contract.

DEPARTMENT OF DEFENSE STANDARDS

MIL-STD-1320	-	Standard Practice for Designing Unit Loads, Truckloads, Railcar Loads, and Intermodal Loads for Ammunition and Explosives

(Copies of this document are available online at http://quicksearch.dla.mil.)

2.3 Order of precedence. Unless otherwise noted herein or in the contract, in the event of a conflict between the text of this document and the references cited herein, the text of this document takes precedence. Nothing in this document, however, supersedes applicable laws and regulations unless a specific exemption has been obtained.

3. DEFINITIONS

This section is not applicable to this standard.

4. GENERAL REQUIREMENTS

For general requirements, see MIL-STD-1320.

5. DETAILED REQUIREMENTS

For detailed requirements, see MIL-STD-1320.

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Intended use. This standard is intended for use by all personnel engaged in the construction of unit loads of ammunition, explosives, and associated items intended for underway replenishment (transfer-at-sea).

6.2 Acquisition requirements. Acquisition documents should specify the following:

a. Title, number, and date of this standard.

Source: https://assist.dla.mil -- Downloaded: 2026-10-23T23:55Z
Check the source to verify that this is the current version before use.

6.3 Subject term (key word) listing.

Batten
Cap
Dunnage
Edge protector
Overhang
Pallet
Shipping
Strapping
Transfer-at-sea
Underhang
UNREP

6.4 Changes from previous issue. Marginal notations are not used in this revision to identify changes with respect to the previous issue due to the extent of the changes.
