**DATA ITEM DESCRIPTION**
**Title:** CONTRACTOR LIFE CYCLE SUSTAINMENT PLAN (LCSP)

**Number:** DI-MGMT-82363
**AMSC Number:** 10278
**DTIC Applicable:** No
**Preparing Activity:** MDA
**Applicable Forms:** N/A

**Approval Date:** 20220119
**Limitation:** N/A
**GIDEP Applicable:** No
**Project Number:** MGMT-2021-016

**Use/Relationship:** The Contractor Life Cycle Sustainment Plan (LCSP) describes the contractor's technical approach to life cycle sustainment planning to ensure sustainment considerations are integrated into all planning, implementation, management, and oversight activities associated with the acquisition, development, production, fielding, support, and disposal of a system across its life cycle. The goal of life cycle sustainment planning is to maximize readiness by delivering the best possible product support at the lowest Operations and Sustainment cost.

This Data Item Description (DID) contains the format, content, and intended use information for the data deliverable resulting from the work task described in the solicitation.

**Requirements:**

1. Reference documents: The applicable issue of the documents cited herein, including your approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

2. Format.

   a. The LCSP, all Sections, and Annexes shall be in a digital format and if printed fits standard letter size paper (8 ½" x 11").

   b. Sections, Annexes, and Attachments (if Attachments are used) shall be identified and referenced in the text.

3. Content. The Contractor LCSP shall include the following:

   a. Section 1: Shall be in accordance with Office of the Assistant Secretary of Defense (OASD) Logistics and Materiel Readiness Life-Cycle Sustainment Plan Outline Version 2.0 (https://www.dau.edu/tools/t/Life-Cycle-Sustainment-Plan-(LCSP)-Outline). Provide Annexes as described in paragraph 10 of the LCSP outline.

   b. Section 2: Product Support Analysis (PSA) and Logistics Product Data (LPD) Plan. Identify the Contractor's approach to PSA management and PSA Activities to be performed in accordance with (IAW) SAE TA-STD-0017, Product Support Analysis, (https://www.sae.org/standards/content/tastd0017/ ), and documented IAW GEIA-STD-

Check the source to verify that this is the current version before use.

0007, Logistics Product Data, (https://www.sae.org/standards/content/geiahb0007/ ), consistent with the acquisition phases included by the contract.

MIL-HDBK-502A, Product Support Analysis, (https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=201462 ); GEIA-HB-0007, Logistics Product Data Handbook, (https://www.sae.org/standards/content/geiahb0007/ ); and, TA-HB-0007-1, Logistics Product Data Reports Handbook, (https://www.sae.org/standards/content/tahb0007_1/ ), used as references.

The Product Support Analysis Plan (PSAP) is PSA Activity 2.1 (SAE TA-STD-0017). It shall identify and integrate all Product Support Analysis activities, identify management responsibilities, and outline the approach toward accomplishing PSA activities to meet program requirements. Refer to MIL-HDBK-502A, paragraph 5.2.3.3, PSAP Content Requirements, for additional guidance.

The PSAP shall also identify how results of PSA shall be documented and delivered (e.g., the LPD database itself as well as reports, such as Logistics Support Analysis Reports (TA-HB-0007-1), Data Item Documents for specific PSA activities, and appropriate Data Item Descriptions, such as DI-PSSS-81872A, Level of Repair Analysis (LORA) Report (https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=279089 )).

c. Section 3: Planning by Integrated Product Support (IPS) Elements not covered in the LCSP Outline. Address IPS elements not already discussed as part of the OASD Logistics and Materiel Readiness Life-Cycle Sustainment Plan Outline Version 2.0. Integrated Product Support elements shall include maintenance planning and management; manpower and personnel; supply support; support equipment; technical data; training and training support; computer resources support; facilities and infrastructure; packaging, handling, storage, and transportation; design interface; sustaining engineering; and product support management.

d. Section 4: Item Unique Identification (IUID) Implementation Plan. Reference DI-MGMT-81803, IUID Marking Plan, (https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=278262 ) and DoD Instruction 8320.04, Item Unique Identification (IUID) Standards for Tangible Personal Property (https://www.esd.whs.mil/Portals/54/Documents/DD/issuances/dodi/832004p.pdf?ver=2019-08-27-131820-793 ). The IUID Implementation Plan shall include the following:

1.0 Objective.

2.0 References. MIL-STD-130, Identification Marking of U.S. Military Property, (https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=35521 ). DoD Instruction (DoDI) 5000.64, Accountability and Management of DoD Equipment and Other Accountable Property, (https://www.acq.osd.mil/pepolicy/pdfs/500064p.pdf );

Defense Federal Acquisition Regulation Supplement (DFARS) 252.211-7003, (https://www.acq.osd.mil/dpap/dars/dfars/html/current/252211.htm ), etc.

3.0 Applicable Material.

3.1 Exemptions and Approvals.
Address Contractor's process for marking legacy parts (if applicable), Government Furnished Property, Property in Possession of Contractor, including tooling, etc.

4.0 IUID Implementation including:

4.1 IUID Implementation Team and Responsibilities.
Identify how and when the IUID is being executed, and identify roles, responsibility(ies) and verification of subcontractor IUID markings (if applicable). For example, Engineering shall write Change Notices for affected drawings; explain Configuration Management's role; identify responsibilities of Boards (and their composition), Drafting, Quality Assurance (QA) (to include QA of Suppliers as well), Manufacturing, etc.

4.2 Marking Methodology/Strategy.
Describe minimum item marking requirements, procedures, etc.

4.3 Marking Specifications.
Define construct number or method, Enterprise Identifier (e.g., Commercial and Government Entity (CAGE), DoD Activity Address Code (DoDACC), etc.), level of serialization, additional information based on construct type, specific layout of the mark (size, makeup of each line if more than one, with example), quality parameters, etc.

5.0 Data Management.
Describe contractor's processes to include those used in the assignment of Unique Items Identifiers and inputting identifiers into the DoD IUID Registry.

6.0 Metric Measures of Success.
IUID Implementation Metric(s) shall be reported. Examples include:
a. Number of total items requiring IUID and percent completed;
b. Percent of items assigned a Unique Item Identifier (UII) reported to the IUID Registry.

e. Section 5: Technical Manual Development Plan. The Technical Manual Development Plan shall include the following:

1.0 Scope and Purpose.

2.0 Applicable Documents and Standards.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T11:02Z
Check the source to verify that this is the current version before use.

3.0 Contractor's Technical Manual Publication Plan and Process including:

3.1 Identify Technical Manuals to be delivered (e.g., operations, maintenance, Peculiar Support Equipment/Special Test Equipment Operator/Maintenance manuals and make-up of each (e.g., number and specific sections, appendices, and classification.)

3.2 Contractor's organizational structure, assignment of functions, etc., related to the task.

3.3 Include a flow chart of the contractor's in-house technical manual development process; include role of PSA (i.e., Logistics Support Analysis) process.

3.4 Describe standardization, configuration control, quality assurance, etc. of manuals during development process.

3.5 General guidelines (general style, format, reading grade level, use of illustrations, line drawings, etc.)

3.6 Repair Parts and Special Tools and Equipment Lists.

4.0 Technical Manuals shall be delivered and method of delivery.

5.0 Commercial Documentation and Manuals.

5.1 Validation and verification: Reference the Technical Manual Validation Plan. Use Data Item Description DI-TMSS-81818, Technical Manual Validation Plan, (https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=277224 ). Describe verification process.

6.0 Milestones and interfaces with other activities (e.g., PSA Activity 11.7, LORA; PSA Activity 12, Task Analysis; Logistics Demonstration, etc.) including:

a. Describe how and when a Technical Manual Outline is going to be developed and reviewed with the customer.

b. In Process Reviews (IPRs): Describe number and appropriate content to be completed (e.g., three IPRs at 30%, 60%, 90% complete or two at 45% and 90%).

7.0 Describe update process prior to final delivery and delinquencies after manuals are delivered.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T11:02Z
Check the source to verify that this is the current version before use.

8.0 Technical Manual Delivery schedule.

f. Section 6: Technical Manual Validation Plan. Refer to Data Item Description DI-TMSS-81818, Technical Manual Validation Plan, (https://quicksearch.dla.mil/qsDocDetails.aspx?ident_number=277224 ).

g. Section 7: Training Plan. The Training Plan shall include the following:

1.0 Scope and Purpose

2.0 Applicable Documents and Standards

3.0 Contractor's Training Concept / Strategy / Process including:

3.1 Roles and Responsibilities

3.2 Training Analyses
Description of Analysis to be conducted and results, including PSA activities (Training system trade-off studies (TA-STD-0017, Activity 11.6, Job/Duty Tradeoffs); TA-STD-0017, Activity 12.1, Task Analysis; TA-STD-0017, Activity12.4, Training Requirements; training needs analysis, etc.) shall be included.

3.3 Identification of Training Needs
Description of Contents of New Equipment Training Package (courses) as well as equipment, training dates, location of training, equipment required, presentation method, evaluation method, student materials, schedule, etc.

3.4 New Equipment Training Package Development and Delivery Schedule

3.5 Description of Training and Training Support Risks

h. Section 8: Acronym List.

End of DI-MGMT-82363
