DATA ITEM DESCRIPTION
Title: PRODUCT SUPPORT ANALYSIS PACKAGE

Number: DI-PSSS-82353
AMSC Number: N10252
DTIC Applicable: No
Preparing Activity: SH
Applicable Forms: N/A

Approval Date: 20210930
Limitation: N/A
GIDEP Applicable: No
Project Number: PSSS-2021-004

Use/Relationship: Product Support Analysis is the analysis required to create the package of support functions required to field and maintain the readiness and operational capability of major weapon systems, subsystems, and components, including all functions related to weapon system readiness. All functionally significant items, systems, equipment, components, will be subject to Product Support Analysis. All Product Support Analysis Candidates are assigned a Product Support Analysis Control Number in order to index and identify all of the Functionally Significant Items undergoing Product Support Analysis.

The product support package includes the array of product support functions required to deploy and maintain the readiness and operational capability of major weapon systems, subsystems, and components, including all functions related to weapon systems readiness. The package of product support functions includes the tasks associated with the 12 Integrated Product Support Elements.

MIL-HDBK-502A, Department of Defense Handbook: Product Support Analysis shall be used as a guide for executing Product Support Analysis activities and repeat Product Support Analysis tasks in an iterative manner as required and identify refine product support requirements. The Product Support Analysis data shall be updated to reflect changes in support requirements.

This Data Item Description contains the format, content, and intended use information for the data deliverable resulting from the work task described in the solicitation.

Requirements:

1. Reference Documents. The applicable issue of the documents cited herein, including their approval dates and any applicable amendments, notices, and revisions shall be as specified in the contract.

2. Format. The Product Support Analysis Package shall be in contractor's formats in accordance with TA-HB-0007-1, TA-STD-0017, and GEIA-STD-007B into the program's data repository as specified in the Statement of Work.

3. Content. The Product Support Analysis Package shall contain the following:

   i. Product Support Strategy and updates
   ii. Product Support Analysis Planning and updates
   iii. Program and Design Reviews

a. Product Support Analysis Technical Interchange Meetings

iv. Support System Standardization
- a. Support Standardization Constraints
- b. Standardization Costs
- c. Hardware and Software Standardization Approaches
- d. Standardization Risks

v. Supportability and Supportability Related Design Factors
- a. Key Performance Parameters

vi. Functional Analysis
- a. Identify Functions
- b. Unique Item Function
- c. Function Drivers
- d. Function Risks
- e. Failure Mode, Effects, and Criticality Analysis
- f. Functional Block Diagram
- g. Functional Failure Analysis
- h. Fault Tree Analysis
- i. Reliability Centered Maintenance Analysis
- j. Task Inventory
- k. Design Alternatives
- l. Function Updates

vii. Support System Alternatives
- a. Viable Support Plans
- b. Updated Viable Support Plans
- c. Support Plan Risks

viii. Evaluation Of Alternatives and Tradeoff Analysis
- a. Tradeoff Analysis
- b. New and Critical Support Tradeoffs
- c. Design and Support Tradeoffs
- d. Job and Duty Tradeoffs
- e. Level of Repair Analysis
- f. BCS/New System Tradeoffs
- g. Energy Tradeoffs
- h. Damage/Repair Tradeoffs

ix. Task Analysis
- a. Document Task Analysis
- b. New and Critical Resources
- c. Training Requirements
- d. Design Influence
- e. Risk Reduction
- f. Transportability Analysis
- g. Supply Support
- h. Logistics Products
- i. Task Analysis Updates
- j. Parts Screening

x. Early Distribution Analysis

Check the source to verify that this is the current version before use.

a. New Product Impacts
b. Impacts on Manpower
c. Readiness Impacts
d. Survivability Analysis
e. Impact Solutions

xi. Diminishing Manufacturing Sources and Material Shortages and Obsolescence SystemSupport Analysis
a. Diminishing Manufacturing Sources and Material Shortages and Obsolescence

xii. Field Feedback
a. Feedback Sources
b. Feedback Analysis

xiii. Disposal Analysis
a. Component Disposal
b. Product Disposal

xiv. Operational Suitability Test, Evaluation, Verification and Validation
a. Test Strategy
b. Product Support Package
c. Test Objectives and Resources
d. Tests
e. Test Results Analysis
