DATA ITEM DESCRIPTION

Title: As-Designed Parts, Materials, and Processes List (ADPMPL)

Number: DI-SESS-82356
AMSC Number: 102
DTIC Applicable: No
Preparing Activity: MDA
Applicable Forms: None

Approval Date: 20210715
Limitation: N/A
GIDEP Applicable: No
Project Number: SESS-2021-018

Use/relationship: The As-Designed Parts, Materials, and Processes List (ADPMPL) is a complete listing of: the electrical, electronic, electromechanical, and mechanical parts; materials; Commercial Off-The-Shelf (COTS) products; modified COTS products; and processes used in the manufacture of a complete end item. The ADPMPL Data Item Description (DID) describes this requirement for a piece of equipment or system that is approved and selected for design. Unless stated otherwise by the work task described in the contract, the government intends to use the ADMPL to track potential impacts due to, but not limited to, supply chain issues, product change notices, and non-conformance or potential non-conformance information from the Government Industry Data Exchange Program (GIDEP), industry, or program alerts and advisories.

This DID contains the format, content, and intended use information for the data deliverable resulting from the work task described in the contract.

Definitions
Commercial Off-The-Shelf (COTS) Products: Commercial items that typically require no unique government modifications or maintenance to meet the needs of the procuring agency, during the life cycle of the product. Examples include Versa Module Eurocard (VME) boards, hard drives, and computers. If a source control drawing has been developed with specific requirements for an item, it is not considered COTS.
Electrical, Electronic, and Electromechanical (EEE) Parts: The term "electronic" part is used in a broad sense and includes electrical, electromagnetic, electromechanical, and electro-optical parts. This definition includes any part that can carry, store, or transmit electrical current, or electromagnetic or optical waves in the intended application. EEE parts include capacitors, connectors, crystal oscillators, diodes and transistors, fiber optics, filters, fuses, hybrid microcircuits, monolithic microcircuits, magnetics, relays, resistors, thermistors, wire, and cable.
Material: Material is a metallic or nonmetallic element, alloy, mixture, or compound used in a manufacturing operation that becomes a permanent portion of the manufactured item, or which can leave a remnant, residue, coating, or other material that becomes or affects a permanent portion of a manufactured item.
Mechanical Part: The term mechanical piece parts (non-electrical parts) is used in a broad sense and includes such simple mechanical items as nuts, bolts, washers, pins, terminals, and discrete parts (other than required as an accessory in EEE Parts herein), that cannot be disassembled into their component sections without rendering them unfit for their intended use. Such mechanical piece parts have a single, non-electrical function (other than electrical grounding) and contain one or more necessary material items. Formed, machined, shaped or otherwise fabricated items such as brackets, enclosures, etc., and processed portions of packages used by electronic assemblies, with no electrical circuitry, ground plane, or thermal functions are considered mechanical parts.
Part: A hardware element that is not normally subject to further subdivision or disassembly without destruction of functional use. Examples include resistor, integrated circuit, relay, connector, bolt, and gasket.
Process: An operation, treatment, or procedure used as a step in the manufacture of an item.

Requirements:

Check the source to verify that this is the current version before use.

1. Reference Documents.

This DID has no reference documents.

2. Format.

The ADPMPL data shall be in electronic spreadsheet workbook format in accordance with the ADPMPL Cover Page and its instructions for use (see Tables 1 and 2 below). Three data spreadsheets within the same workbook shall be used to enter all of the data. These spreadsheets shall be labeled "EEE Parts", "Materials and Processes", and "Mechanical Parts". The proper spreadsheet, pertinent to each specific part type, shall be used to enter the data.

Only data for one part shall be entered in each spreadsheet row. For example, data for identical parts from more than one manufacturer shall be entered in separate rows, one row for each part manufacturer. Electronic media (email, electronic files, computer compact discs, etc.) shall comply with DoD Instruction 8320.02 (“Sharing Data, Information, and Information Technology (IT) Services in the Department of Defense,” August 5, 2013) and be readable by approved Government systems.

3. Content.

ADPMPL data shall include all the parts, materials, processes, COTS products, modified COTS products, and the corresponding data fields identified as being required in Tables 1, 3, 4 and 5 below. The data fields and their values shall be in accordance with the corresponding Data Field Description in Table 1 below. The word “parts” refers to electrical, electronic, and electromechanical (EEE) parts and mechanical parts.

Table 1 - ADPMPL Cover Page		
Data Field	**Is Data Field Required or Optional?**	**Data Field Description**
Title	Required	The words " [agency or activity] Name (for example, Missile Defense Agency (MDA)) As Designed Parts, Materials, and Processes List (ADPMPL)" as the title on top of the cover page.
Program Name	Required	The name of the [agency or activity] program on contract corresponding to the parts data provided.
Prime Contractor Name	Required	The name of the prime contractor corresponding to the [agency or activity] program. **Valid Value:** Name as presently subscribed in the Defense Logistics Agency's (DLA) Commercial And Government Entity (CAGE) or the United States government System for Award Management (SAM) program.
Date	Required	The date the [agency or activity] ADPMPL data is prepared or submitted to the [agency or activity] program office.
Contract Data Requirements List (CDRL) Number	Required	The [agency or activity] CDRL number corresponding to the ADPMPL requirement.
Contract Number	Required	The [agency or activity] program contract number.
Prime Contractor Point(s) of Contact (POCs): Name	Required	The name of the ADPMPL primary POCs at the prime contractor.
Prime Contractor POCs: Telephone Number	Required	The telephone number for the ADPMPL primary POCs at the prime contractor.
Prime Contractor POCs: E-mail address	Required	The electronic mail address for the ADPMPL primary POCs at the prime contractor.

Table 2 - Instructions For Use
CAGE codes shall be in text format following the DLA's CAGE or the United States government SAM valid values. One of the following valid values shall be used for each data field: - Enter *** for data fields where there is no data available from the part manufacturer. This value is not allowed for required fields. - Enter "Not Applicable" for data fields not applicable to the specific part. - Enter a value from the **Valid Value** list found under the corresponding Data Field Description, if applicable. Otherwise, an appropriate entry in text format is acceptable.

Check the source to verify that this is the current version before use.

Table 3 - EEE Parts		
Data Field	**Is Data Field Required or Optional?**	**Data Field Description**
Prime Contractor	Required	The name of the [agency or activity] prime contractor corresponding to the [agency or activity] Program. **Valid Value:** Name as presently subscribed in the DLA's CAGE or the United States government SAM program.
Subcontractor(s)	Required	The name of the [agency or activity] prime's subcontractor(s) corresponding to the [agency or activity] Program. **Valid Value:** Name as presently subscribed in the DLA's CAGE or the United States government SAM program.
Technical POCs	Optional	The name of the designated contractor or subcontractor technical POCs for the EEE part.
Part Sub-Type	Required	Is the part an EEE piece part, an EEE COTS product, an EEE modified COTS product, or other? **Valid Values:** "Piece Part", "COTS Product", "Modified COTS Product", "Other".
Procurement Specification(s) - Number and Title	Required	The contractor or subcontractor specification number and title used to purchase the part. For example, if the specification is a Source Control Drawing (SCD) or Altered Item Drawing (AID), enter the drawing number and drawing title.
Description of Part	Required	A brief description of the part.
Part Manufacturer	Required	The name of the Original Component Manufacturer (OCM) or, for COTS and modified COTS products, the name of the Original Equipment Manufacturer (OEM). **Valid Value:** Name as presently subscribed in the DLA's CAGE or the United States government SAM program.
Part Manufacturer CAGE	Required	The OCM or, for COTS and modified COTS products, the OEM CAGE code corresponding to the part manufacturing location. **Valid Value:** Five alphanumeric characters assigned by the DLA's CAGE or the United States government SAM program.
Manufacturer Part Number	Required	The part number used by the OCM or, for COTS and modified COTS products, the OEM. For parts procured with a contractor or sub-contractor part number, enter the made-from OCM or OEM part number here and the contractor part number in the "Contractor Part Number" field.
Supplier (if required)	Optional	The name of the supplier the final part is purchased from. **Valid Value:** Name as presently subscribed in the DLA's CAGE or the United States government SAM program.
Supplier CAGE	Optional	The supplier CAGE code corresponding to the supplier location the part is purchased from. **Valid Value:** Five alphanumeric characters assigned by the DLA's CAGE or the United States government SAM program.

Table 3 - EEE Parts		
Data Field	**Is Data Field Required or Optional?**	**Data Field Description**
Contractor Part Number	Required	The part number used by the contractor or subcontractor to purchase the part. This number may be related to or be the same as the procurement specification number used to purchase the part by the contractor or subcontractor.
Operational/NonOperational Temp Range	Optional	The minimum and maximum, operational and non-operational ambient temperature in degrees Celsius (°C) for the given part. For example: Op: -40 °C to +85 °C, Non-Op: -55 °C to +125 °C
Sole Source? (Yes or No)	Required	Is this part sole sourced? A sole source part is one that is unique and only produced by one manufacturer. **Valid Values:** "Y" for Yes, "N" for No.
Destructive Physical Analysis (DPA) required? (Yes or No)	Optional	Does this part require DPA? **Valid Values:** "Y" for Yes, "N" for No.
Part Qualification Status	Optional	The current part qualification status. Status definitions shall be in accordance with the program's Parts, Materials, and Processes Mission Assurance Plan. **Valid Values:** "Qualified", "Qualified by Similarity", "Unqualified", or "Pending".
Prohibited or Restricted Item? (Yes or No)	Optional	Is the part prohibited or restricted in accordance with the program's Parts, Materials, and Processes Mission Assurance Plan? **Valid Values:** "Y" for Yes, "N" for No.
Severity Rating (0, 1, 2, or 3)	Optional	The program's Parts, Materials, and Processes Mission Assurance Plan prohibition or restriction severity level. Enter "Not Applicable" when there are no prohibitions or restrictions for this part. **Valid Values:** 0, 1, 2, 3, "Not Applicable"
Limited Life Part (Yes or No)	Optional	Is this a limited life part? A limited life part is one that does not meet the service life requirement for the end item. **Valid Values:** "Y" for Yes, "N" for No.
Diminishing Manufacturing Sources and Material Shortages (DMSMS) Rating (1-5)	Required	The current DMSMS rating according to the following lifetime phases: 1 = Introduction, 2 = Growth, 3 = Mature, 4 = Phase-Out, and 5 = Discontinued. **Valid Values:** 1, 2, 3, 4, 5.
Radiation Test Specification (if applicable)	Optional	The document number for the applicable radiation test specification.
Supplier on Approved Source List? (Yes or No)	Optional	Is the supplier listed on the contractor's or subcontractor's Approved Source List (ASL)? **Valid Values:** "Y" for Yes, "N" for No.
Applicable GIDEP Alerts (if any)	Optional	GIDEP Alert(s) document number applicable to the part.

Check the source to verify that this is the current version before use.

Table 3 - EEE Parts		
Data Field	**Is Data Field Required or Optional?**	**Data Field Description**
Plastic Encapsulated? (Yes or No)	Optional	Is the part a plastic encapsulated device? **Valid Values:** "Y" for Yes, "N" for No.
External Lab Performing Particle Impact Noise Detection (PIND), DPA, or Other	Optional	The name of the laboratory, external to the contractor's or subcontractor's laboratory facilities, performing PIND, DPA, or any other testing.
PIND Required? (Yes or No)	Optional	Is PIND testing required for this part? **Valid Values:** "Y" for Yes, "N" for No.
Lead Finish or Part Finish	Required	The part lead or connector pin termination finish. If the part is leadless, enter the electrical contact termination finish.
Lowest Assembly Where Used Description	Required	The name or a short description of the lowest assembly where the part is used.
Lowest Assembly Where Used Number	Required	The drawing or assembly number associated with the Lowest Assembly Where Used.
Description of Application and Environment	Optional	A brief description of the application type, its environmental extreme temperatures (°C), relative humidity levels, and other applicable parameters such as pressure. For example: Satellite, -30 °C to +40 °C, 0% humidity, near 0 pounds per square inch (psi)
Technical Justification and Submitter Comments	Optional	Comments related to technical justification such as Qualified Product List (QPL) status, part qualification, part shortages, part restrictions, part usage, special screening requirements, limited application, documentation status, long lead time, and health and safety considerations.
Product Change Notifications	Optional	Applicable Product Change Notifications (PCNs). **Valid Values:** PCN number(s) when applicable; otherwise, enter "Not applicable".
Standard or Non-Standard	Required	Is the part standard or non-standard as defined by the Program's Parts, Materials, and Processes Mission Assurance Plan? **Valid Values:** "Standard", "Non-Standard".
Critical Item	Required	Is this part mission critical or safety critical? The definition of mission critical or safety critical shall be in accordance with the program's Parts, Materials, and Processes Mission Assurance Plan. **Valid Values:** "Y" for Yes, "N" for No.
Non-Standard Part Approval Request (NSPAR) Number	Required	The NSPAR number associated with this non-standard part. **Valid Values:** NSPAR number when applicable; otherwise "Not Applicable".
Bond Wire Material	Required	The metal composition and coating (if applicable) of the wire bond material. **Valid Values:** Standard chemical element symbol(s).

Table 4 - Materials and Processes		
Data Field	**Is Data Field Required or Optional?**	**Data Field Description**
Prime Contractor	Required	The name of the [agency or activity] prime contractor corresponding to the [agency or activity] program. **Valid Value:** Name as presently subscribed in the DLA's CAGE or the United States government SAM program.
Subcontractor	Required	The name of the [agency or activity] prime's subcontractor corresponding to the [agency or activity] program. **Valid Value:** Name as presently subscribed in the DLA's CAGE or the United States government SAM program.
Technical POCs	Optional	The name of the designated contractor's or subcontractor's technical POCs for the process or material.
Sub-Type	Required	Is this is a material or a process? **Valid Values:** "Material", "Process"
Material or Process Specification(s) - Number and Title	Required	The number and title of the material or process specification(s).
Description of Material or Process	Required	A brief description of the material or process.
Manufacturer	Required	The name of the original material or process manufacturer. **Valid Value:** Name as presently subscribed in DLA's CAGE or the United States government SAM program.
Manufacturer CAGE	Required	The manufacturer CAGE code corresponding to the material or process manufacturer location. **Valid Value:** Five alphanumeric characters assigned by the DLA's CAGE or the United States government SAM program.
Manufacturer Material or Process Identification Number	Required	The identification number used by the manufacturer for the material or process.
Supplier (if required)	Required	The name of the supplier the final material or process is purchased from. **Valid Value:** Name as presently subscribed in the DLA's CAGE or the United States government SAM program.
Supplier CAGE	Required	The supplier CAGE code corresponding to the supplier location where the final material or process is purchased from. **Valid Value:** Five alphanumeric characters assigned by the DLA's CAGE or the United States government SAM program.
Supplier Material or Process Identification Number	Required	The identification number used by the contractor(s) or subcontractor(s) to purchase the material or process. This number may relate to the Material or Process Specification.
Material Safety Data Sheet (MSDS) Number	Optional	The Chemical Abstracts Service (CAS) Number found on either the applicable MSDS or Safety Data Sheets (SDSs) for the material. If a process, enter "Not Applicable"

Table 4 - Materials and Processes		
Data Field	**Is Data Field Required or Optional?**	**Data Field Description**
Critical Process or Material? (Yes or No)	Required	Is this a mission critical or safety critical process or material? **Valid Values:** "Y" for Yes, "N" for No.
Hazardous Material (HAZMAT) or Safety Issue? (Yes or No)	Optional	Is this a HAZMAT or are there any safety issues associated with this process or material? **Valid Values:** "Y" for Yes, "N" for No.
Indicate Metallic or NonMetallic	Optional	Is the material metallic or non-metallic? **Valid Values:** "Metallic", "Non-metallic", or if a process "Not Applicable"
Prohibited or Restricted Item? (Yes or No)	Optional	Is the process or material prohibited or restricted in accordance with the program's Parts, Materials, and Processes Mission Assurance Plan? **Valid Values:** "Y" for Yes, "N" for No.
Severity Rating (0, 1, 2, or 3)	Optional	The program's Parts, Materials, and Processes Mission Assurance Plan prohibition or restriction severity level. Enter "Not Applicable" when there are no prohibitions or restrictions for this process or material. **Valid Values:** 0, 1, 2, 3, "Not Applicable"
Limited Life Material? (Yes or No)	Optional	Is this a limited life material? A limited life material is one that does not meet the service life requirement for the end item. **Valid Values:** "Y" for Yes, "N" for No, or if a process "Not Applicable".
Outgassing Data	Optional	Outgassing Data, including % Total Mass Loss (TML) and % Collected Volatile Condensable Mass (CVCM), and state if corrosive or reactive products. If a process, enter "Not Applicable". For example: 1% TML, .1% CVCM, Non-corrosive/reactive product
Materials And Processes Technical Information System (MAPTIS) Material Code	Optional	The MAPTIS Material Code. If a process, enter "Not Applicable".
Weight of Material in Application	Optional	The weight and specify its unit. If a process, enter "Not Applicable".
Applicable GIDEP Alerts (if any)	Optional	GIDEP Alert(s) document number applicable to the material or process.
Indicate Flammable or Toxic	Optional	Is the material flammable or toxic? Include the MAPTIS flammability rating and SDS toxicity rating. **Valid Values:** "Flammable" and its rating; "Toxic" and its rating; or if a process "Not Applicable"
Material Stress or Corrosion Rating	Optional	The Material Stress Corrosion Rating in accordance with MSFC-STD-3029 (https://standards.nasa.gov/public-center-specific-standards). If a process, enter "Not Applicable".
Material Cure or Heat Treatment Process Description	Optional	A brief description of the material cure or heat treatment process or the applicable standard or process used.

Table 4 - Materials and Processes		
Data Field	**Is Data Field Required or Optional?**	**Data Field Description**
Surface Coating Type and Thickness	Optional	If coating present, the material surface coating type and thickness. Measurement units shall be included for thickness. If no coating, enter "Not Applicable".
Lowest Assembly Where Used Description	Required	The name or a short description of the lowest assembly where the material or process is used.
Lowest Assembly Where Used Number	Required	The drawing or assembly number associated with the Lowest Assembly Where Used.
Description of Application and Environment	Optional	A brief description of the application type, its environmental extreme temperatures (°C), relative humidity levels, and other applicable parameters such as pressure. For example: Satellite, -30 °C to +40 °C, 0% humidity, near 0 psi
Technical Justification and Submitter Comments	Optional	Any comments related to technical justification such as QPL status, part qualification, part shortages, part restrictions, part usage, special screening requirements, limited application, documentation status, long lead time, and health and safety considerations.
Standard or Non-Standard	Required	Is the part standard or non-standard as defined by the program's Parts, Materials, and Processes Mission Assurance Plan? **Valid Values:** "Standard", "Non-Standard".
Material and Process Approval Request (MPAR) Number	Required	The MPAR number associated with this non-standard material or process. **Valid Values:** MPAR number when applicable; otherwise "Not Applicable".
DMSMS Rating (1-5)	Required	The current DMSMS rating according to the following lifetime phases: 1 = Introduction, 2 = Growth, 3 = Mature, 4 = Phase-Out, and 5 = Discontinued. **Valid Values:** 1, 2, 3, 4, 5. If a process, enter "Not Applicable".

Table 5 - Mechanical Parts		
Data Field	**Is Data Field Required or Optional?**	**Data Field Description**
Prime Contractor	Required	The name of the [agency or activity] prime contractor corresponding to the [agency or activity] program. **Valid Value:** Name as presently subscribed in the DLA's CAGE or the United States government SAM program.
Subcontractor	Required	The name of the [agency or activity] prime's subcontractor corresponding to the [agency or activity] program. **Valid Value:** Name as presently subscribed in the DLA's CAGE or the United States government SAM program.

Table 5 - Mechanical Parts		
Data Field	**Is Data Field Required or Optional?**	**Data Field Description**
Technical POC	Optional	The name of the designated contractor('s) or subcontractor('s) technical POCs for the mechanical part
Part Sub-Type	Required	Is the part a mechanical piece part, a mechanical COTS product, a modified mechanical COTS product, or other? **Valid Values:** "Piece Part", "COTS Product", "Modified COTS Product", "Other".
Procurement Specification(s) - Number and Title	Required	The contractor or subcontractor number and title of the specification used to purchase the part. For example, if the specification is a Source Control Drawing (SCD) or Altered Item Drawing (AID), enter the drawing number and drawing title.
Description of Part	Required	A brief description of the part.
Part Manufacturer	Required	The name of the OCM or, for COTS and modified COTS products, the name of the OEM. **Valid Value:** Name as presently subscribed in the DLA's CAGE or the United States government SAM program.
Part Manufacturer CAGE	Required	The OCM or, for COTS and modified COTS products, the OEM CAGE code corresponding to the part manufacturing location. **Valid Value:** Five alphanumeric characters assigned by the DLA's CAGE or the United States government SAM program.
Manufacturer Part Number	Required	The part number used by the OCM or, for COTS and modified COTS products, the OEM. For parts procured with a contractor or sub-contractor part number, enter the made-from OCM or OEM part number here and the contractor part number in the "Contractor Part Number" field.
Supplier (if required)	Required	The name of the supplier the final part is purchased from. **Valid Value:** Name as presently subscribed in the DLA CAGE or the United States government SAM program.
Supplier CAGE	Required	The supplier Commercial and Government Entity (CAGE) code corresponding to the supplier location the part is purchased from. **Valid Value:** Five alphanumeric characters assigned by the Defense Logistics Agency's (DLA) Commercial And Government Entity (CAGE) or the United States government System for Award Management (SAM) program.
Contractor Part Number	Required	The part number used by the contractor or subcontractor to purchase the part. This number may be related to or be the same as the procurement specification number used to purchase the part by the contractor or subcontractor.
Radiation Test Specification (if applicable)	Optional	The document number for the applicable radiation test specification.
Sole Source? (Yes or No)	Required	Is this part sole sourced? A sole source part is one that is unique and only produced by one manufacturer. **Valid Values:** "Y" for Yes, "N" for No.

Table 5 - Mechanical Parts		
Data Field	**Is Data Field Required or Optional?**	**Data Field Description**
Prohibited or Restricted Item? (Yes or No)	Optional	Is the part prohibited or restricted in accordance with the program's Parts, Materials, and Processes Mission Assurance Plan? **Valid Values:** "Y" for Yes, "N" for No.
Severity Rating (0, 1, 2, or 3)	Optional	The program's Parts, Materials, and Processes Mission Assurance Plan prohibition or restriction severity level. Enter "Not Applicable" when there are no prohibitions or restrictions for this part. **Valid Values:** 0, 1, 2, 3, "Not Applicable"
Limited Life Item? (Yes or No)	Optional	Is this a limited life mechanical part? A limited life mechanical part is one that does not meet the service life requirement for the end item. **Valid Values:** "Y" for Yes, "N" for No.
Part Qualification Status	Optional	The current part qualification status. **Valid Values:** "Qualified", "Qualified by Similarity", "Unqualified", or "Pending".
Material (type)	Optional	The materials specification.
Applicable GIDEP Alerts (if any)	Optional	GIDEP Alert(s) document number applicable to the part.
Supplier on Approved Source List? (Yes or No)	Optional	Is the supplier listed on the contractor's or sub-contractor's ASL? **Valid Values:** "Y" for Yes, "N" for No.
Material Corrosion Rating	Optional	The corrosion specification and resulting rating.
Heat Treatment Process Description	Optional	The heat treatment specification and strength or hardness level.
Stress Corrosion Rating	Optional	The Material Stress Corrosion Rating in accordance with MSFC-STD-3029.
Surface Treatment Coating Type and Specification	Optional	The surface treatment coating type and specification.
Lowest Assembly Where Used Description	Required	The name or a short description of the lowest assembly where the part is used.
Lowest Assembly Where Used Number	Required	The drawing or assembly number associated with the Lowest Assembly Where Used.
Description of Application and Environment	Optional	A brief description of the application type, its environmental extreme temperatures (°C), relative humidity levels, and other applicable parameters such as pressure. For example: Satellite, -30 °C to +40 °C, 0% humidity, near 0 psi
Technical Justification and Submitter Comments	Optional	Any comments related to technical justification such as QPL status, part qualification, part shortages, part restrictions, part usage, special screening requirements, limited application, documentation status, long lead time, and health and safety considerations.

Table 5 - Mechanical Parts		
Data Field	**Is Data Field Required or Optional?**	**Data Field Description**
Standard or Non-Standard	Required	Is the part standard or non-standard as defined by the program's Parts, Materials, and Processes Mission Assurance Plan? **Valid Values:** "Standard", "Non-Standard".
Critical Item	Required	Is this part mission critical or safety critical? **Valid Values:** "Y" for Yes, "N" for No.
Non-Standard Form Number (if applicable)	Required	The Non-Standard Form number, in accordance with the program's Parts, Materials, and Processes Mission Assurance Plan form revision on contract, associated with this non-standard part.
