MILITARY SPECIFICATION SHEET

NUT, SELF-LOCKING, HEXAGON, NON-METALLIC LOCKING FEATURE, 250 DEG F, UNC/ UNF-2B

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and the issue of the following specification listed in that issue of the Department of Defense Index of Specification and Standards (DoDISS) specified in the solicitation: MIL-DTL-45913.

NOTES:
1. All dimensions are in inches.

FIGURE 1. NUT, SELF LOCKING, HEX, NON-METALLIC LOCKING FEATURE, UNC/ UNF-2B

DISTRIBUTION STATEMENT A. Approved for public release: distribution is unlimited.

Check the source to verify that this is the current version before use.

REQUIREMENTS:

1. MATERIAL.
Steel and alloy steel shall be in accordance with SAE J995 grade 5 or 8, as specified in part-number.
Corrosion resisting steel (stainless steel) grades 303 and 316, as specified, shall have a minimum ultimate tensile strength of 70 KSI and shall be non-magnetic.
Copper alloy (brass) shall have a minimum ultimate tensile strength of 58 KSI and be of a half hard temper.
Aluminum alloy shall have a minimum ultimate tensile strength of 62 KSI.

2. PLATING/FINISH.

Steel and alloy steel locknuts shall be cadmium plated per QQ-P-416 Type II, Class 2 or 3, or zinc plated per ASTM B633 Type II, Fe/Zn 8 or uncoated plain with a supplementary lubricant which is clean and dry to the touch.

Stainless steel locknuts shall be passivated per QQ-P-35 or black oxide finish per MIL-C-13924.
Brass locknuts shall be black oxide finished per MIL-F-495, nickel plated per QQ-N-290, Class 2, or uncoated plain with a brite finish.
Aluminum locknuts shall be anodized clear, no color per MIL-A-8625 (see TABLE II).

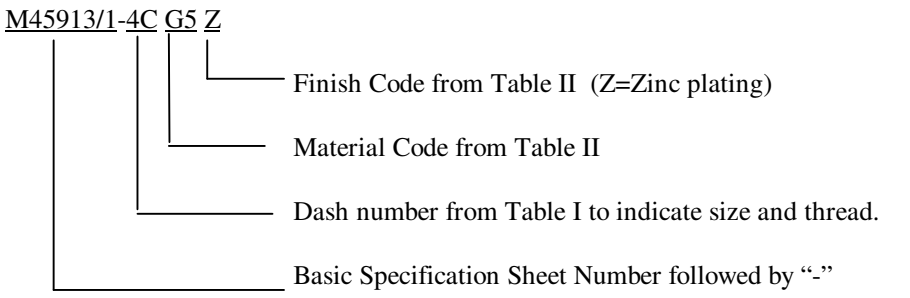

3. SURFACE TEXTURE. Shall be Ra 125 microinches in accordance with ANSI/ASME B46.1.

4. THREADS. Shall be coarse or fine threaded, class 2B, as specified in part-number, in accordance with ASME B1.1.

5. WORKMANSHIP. Parts shall be manufactured and processed with a level of care and workmanship befitting this type of product intended for general purpose military application. Parts shall be free from dirt, grease, loose or deposited foreign materials, sharp edges, burrs, chips, physical malformations or anything that might prevent the part from reliably performing its intended function.

6. PART NUMBER. The part number shall consist of the basic number of this specification sheet followed by a dash, a dash number from table I, a material code from table II, and a finish/plate code (when required) from table II.

EXAMPLE OF PART-NUMBER

M45913/1-4CG5Z = Nut Self-Locking Hexagon, non-metallic locking feature, .250-20 thread, Grade 5 steel, zinc plated.

TABLE II. MATERIAL AND FINISH CODING

MATERIAL CODE		FINISH CODE	
Steel Grade 5	G5	Cadmium	C
Steel Grade 8	G8	Zinc	Z
Stainless Steel 303	S3	Black Oxide	B
Stainless Steel 316	S6	Nickel	N
Brass	BB	Anodized	no code (aluminum only)
Aluminum	AA	Passivate	no code (stainless only)
		Uncoated	no code

NOTE: See requirement 2 for compatibility of material and finish.

NOTES:

1. Dimensions in inches, unless specified, tolerance: +/_ .016.

2. Interpret drawing in accordance with ASME Y14.5M.

3. Break all Sharp edged .003 to .005 and remove all burrs and slivers.

4. In the event of a conflict between the text of this document and the references cited herein, the text of this document shall take precedence.

5. Unless otherwise specified, issues of referenced documents are those in effect at the time of solicitation.
