REQUIREMENTS

Design and configuration: See figure 1 and table I.

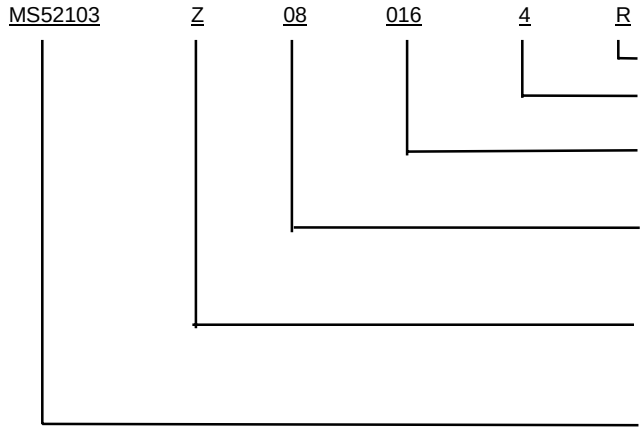
Hose material: The hose used in these assemblies shall be in accordance with MIL-DTL-13444, type III.

Fitting material:

A - Carbon steel cadmium plated.
B - Brass.
Z - Carbon steel zinc plated.

Fittings: Fitting shall be in accordance with SAE J516 female 37°, flared type.

Part or Identifying Number (PIN). The PIN's to be used for hose assemblies acquired to this specification are created as shown in the example below.



Type of fitting. R = Reusable, P = Permanent

Fractional length in eighths of an inch. (0 thru 7)

Length of hose assembly in inches. (Always use 3 digits. Use leading zeros as required.)

Dash number from table I. (Do not include the "dash". Use a leading zero for single digit dash numbers, ie. 03 for -3, etc.)

Fitting material: Z = Carbon steel, zinc plated.
A = Carbon steel, cadmium plated. (Not for new design.)
B = Brass

Prefix for all PIN's.

The old MS number is used in the PIN to maintain backwards compatibility with existing parts and higher level drawings. Some existing MS PIN's do not completely fit the above layout, but they should continue to be used without change.
