4.2.3.3, line 2: Add after FED-STD-601 "or ASTM D 1056".

4.2.3.4, line 2: Add after FED-STD-601 "or ASTM D 1056".

Page 9

4.3.3.2, line 2: Add after FED-STD-601 "or ASTM D 1056".

4.3.4.2, line 2: Add after FED-STD-601 "or ASTM D 1056".

Page 12

4.3.9.1: Delete heading and substitute "Burning time and char length."

4.3.9.1.2: Delete and substitute the following:

"4.3.9.1.2 Procedure. The specimen shall be clamped at one end in such a position that the long dimension forms a 45° angle with the horizontal and with the 1-inch width in the vertical position. A candle flame shall be applied for 15 seconds to the lower free end of the specimen. The middle of the flame shall be applied to the specimen, and the candle shall remain in this position for the entire 15 seconds. The candle shall then be removed, and the time that the specimen continues to burn shall be measured by means of a stopwatch and the time recorded as burning time. The length of the char shall be measured as follows: Prior to beginning the test, a 1-inch radius shall be marked off using a pencil compass and the corner of the specimen as the center. After the test the char length shall not extend beyond this 1-inch line or the specimen shall be considered as to have failed this test. The test shall be performed in a draft-free environment. The candle shall conform to C-C-91, Class B."

4.3.9.2: Delete heading and substitute "Char temperature, melt temperature, and ignition temperature."
