MIL-H-45520(WC)
Amendment 3
8 December 1964
SUPERSEDING
Amendment 2
14 May 1963

MILITARY SPECIFICATION

HEATING AND TIE-DOWN UNIT, TRUCK-MOUNTED
762MM ROCKET, M78A1

This amendment forms a part of Military Specification MIL-H-45520(ORD), dated 25 July 1961.

Page 1, paragraph 2.1. Under Federal Specifications add: "PPP-F-320 - Fiberboard; Sheet Stock and Cut Shapes."

Page 2, paragraph 2.1. Under Military Specifications add: "MIL-G-45512(ORD) - Generator Set, Gasoline Engine, M25 (With Spare Parts)." Under Military Standards delete: "MIL-STD-186 - Systems for Painting and Finishing Rocket and Guided Missile Materiel."

Page 4 - paragraph 3.3.4. Add to the end of the sentence: "and to Specification MIL-G-45512."
Paragraph 3.5. In the first sentence delete: "Standard MIL-STD-186" and substitute "Standard MIL-STD-171."

Page 7, paragraph 5.1. Add the following specification to packaging materials: "Type SF, Grade V35, class WR of Specification PPP-F-320."

Page 9, Table I, Engine, Generator and Housing Assembly. Delete the entire paragraph and substitute the following: "Level A. The generator engine shall be preserved in accordance with a Type III engine of Specification MIL-E-10062. The AC cable assembly with the electrical cap in place shall be coiled around the shutter housing and secured witn pressure sensitive tape. The lid of the housing assembly shall be closed and the latches secured. The shutter located on the end of the housing assembly shall be covered with Osnaburg cloth, secured with pressure sensitive tape, and oversprayed with sprayable plastic coating. All louvers on the engine generator housing assembly shall be covered with pressure sensitive tape."

"Level C. Preservation and packaging shall be same as Level A except as follows: "The shutter located on the end of the housing assembly shall be covered with a fiberboard disc and shall be secured with pressure sensitive tape. All louvers on the engine generator housing assembly shall be covered with pressure sensitive tape."

Table I, Fire Extinguisher. Delete the entire paragraph and substitute the following:

"Level A. The record card shall be secured to the fire extinguisher with wire. The remote control head and valve shall be wrapped with barrier material, covered with Osnaburg cloth, and the entire wrap sprayed with sprayable plastic coating."

"Level C. The record card shall be secured to the fire extinguisher with wire. The remote control head and valve shall be wrapped with Grade A barrier material and secured with pressure sensitive tape."

Table I, Saddle Assemblies. Delete the entire paragraph and substitute the following:

"Level A. The warhead and jato assemblies shall be disengaged from their respective base plates. The front and rear warhead saddle assemblies (8419390 and 8419396) and front and rear jato saddle assemblies (8419340 and 8419382) shall be packed in a Class 2, Style 2 nailed-wood box of Specification PPP-B-621. Barrier material shall be utilized as protective insulation where container contacts components of the saddle assemblies. Closure shall be effected in accordance with applicable requirements of Specification MIL-P-12841. Store with BII material."

"Level C. The warhead and jato saddle assemblies shall be left in position on their respective base plates. The saddle assemblies shall be shielded with a specifically prepared fiberboard cover to provide waterproof and mechanical protection. The fiberboard cover shall be secured to the saddle assemblies with pressure sensitive tape."

Following Saddle Assembly paragraph, add the following:

"Fin Box Assembly. The lid of the fin box assembly shall be closed and the latches secured."

Page 10. Add new paragraph.

"5.9. BII Equipment. BII (Basic Issue Item) shall be packaged and packed ~~in accordance~~ with Specification MIL-P-12841."
