MILITARY SPECIFICATION

WARHEAD, GUIDED MISSILE, INERT, XM10E3, LOADING, ASSEMBLING AND PACKING

1. SCOPE

1.1 This specification covers the quality assurance provisions for loading, assembling and packing Warhead, Guided Missile, Inert, XM10E3.

2. APPLICABLE DOCUMENTS

2.1 The following documents of the issue in effect on date of invitation for bids form a part of this specification to the extent specified herein.

SPECIFICATIONS

MILITARY

MIL-A-2550 - Ammunition and Special Weapons, General Specification for
MIL-I-45208 - Inspection Requirements, General Specification for
MIL-I-45607 - Inspection Equipment, Supply and Maintenance of

STANDARDS

MILITARY

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-109 - Inspection Terms and Definitions.

(Copies of specifications, standards, drawings and publications required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer).

3. REQUIREMENTS

3.1 Material.-Materials shall be in accordance with applicable drawings and specifications.

3.2 Warhead assemblies.-The warhead assemblies shall comply with all requirements specified on Drawing (dwg.) 8862439 and with all requirements specified in applicable specifications.

3.3 Painting and marking.-Painted surfaces and marking shall be restored by the loading contractor when such surfaces or marking have been damaged or obliterated.

3.4 Workmanship.-Loading and assembly shall be accomplished in a thorough, workmanlike manner. All parts shall be free of any foreign matter. The cleaning method used shall not be injurious to any part nor shall the parts be contaminated by the cleaning agent. Surface coatings shall be continuous except for a few light scratches not exposing base material. All required marking shall be neat and sharply defined.

4. QUALITY ASSURANCE PROVISIONS

4.1 General quality assurance provisions.-The supplier is responsible for the performance of all inspection requirements specified herein. Except as otherwise specified, the supplier

Check the source to verify that this is the current version before use.

may utilize his own or any other inspection facilities and services acceptable to the Government. Inspection records of the examinations and tests shall be kept complete and available to the Government as specified in the contract or order. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements. Reference shall be made to Standard MIL-STD-109 in order to define terms used herein. The provisions of Specification MIL-A-2550 shall apply.

4.1.1 Contractor quality assurance system.-The contractor shall provide and maintain an effective quality assurance system in compliance with the requirements of Specification MIL-I-45208.

4.1.2 Submission of product.-At the time the completed lot of product is submitted to the Government for acceptance the contractor shall supply the following information accompanied by a certificate which attests that the information provided is correct and applicable to the product being submitted:

a. A statement that the lot complies with all quality assurance provisions of the approved current written description of the system.
b. Number of units of product inspected.
c. Results obtained for all inspection performed.
d. Drawing, specification number and date, together with an identification and date of changes.
e. Certificates of analysis on all material procured directly by the contractor.
f. Number of items in the lot.
g. Date submitted.

The certificate shall be signed by a responsible agent of the certifying organization. The initial certificate submitted shall be substantiated by evidence of the agent's authority to bind his principal. Substantiation of the agent's authority will not be required with subsequent certificates unless, during the course of the contract, this authority is vested in another agent of the certifying organization.

4.1.3 Government verification.-Using the contractor's written quality assurance procedure, this detail specification, the applicable drawings and other contractual documents as a guide, the Government inspector shall verify at unscheduled intervals all quality assurance operations performed by the contractor. Verification will be in accordance with Specification MIL-I-45208 and

Check the source to verify that this is the current version before use.

will be performed to the extent necessary to assure compliance with the contractual requirements. Severity of Government inspection of individual characteristics will be directly related to the seriousness of the classification assigned. In no instance will a characteristic classified "critical" be accepted solely on the basis of the contractor's records.

4.2 Inspection provisions.

4.2.1 Lot formation.-A lot shall consist of loaded warhead assemblies produced by one manufacturer in one unchanged process, in accordance with the same drawing, same drawing revision, same specification, and same specification revision. Drawing, specification, and process changes not affecting safety, performance or fit, as determined by the Government shall not necessitate changing the lot number.

4.2.2 Examination.-Sampling plans and procedures for the following classifications of defects shall be in accordance with Standard MIL-STD-105 except that inspection for critical defects, when listed, shall be 100 percent. Continuous sampling plans in accordance with Handbook ORD-M608-11 may be used if approved by the procuring activity. Also, at the option of the procuring activity, AQL's and sampling plans may be applied to the individual characteristics listed using an AQL of 0.25 percent for each major defect and an AQL of 0.40 percent for each minor defect.

4.2.2.1 Warhead, prior to loading (see dwg. 8862440).

Categories	Defects	Method of Inspection	Code No. (see 6.3)
Critical:	None defined		
Major:	AQL 0.40 percent		
101.	Body cracked or otherwise damaged	Visual	01001
102.	Insert damaged	Visual	01002
103.	Handling or S&A insert above flush	Visual	01003
Minor:	AQL 0.40 percent		
201.	Evidence of poor workmanship (see 3.4)	Visual	01004

4.2.2.2 Assembly, prior to bonding closure (see dwg. 8862439).

Categories	Defects	Method of Inspection	Code No.
Critical: None defined			
Major: None defined			
Minor:	AQL 1.50 percent		
201.	Cavity not filled	Visual	02001
202.	Funnel mark not leveled	Visual	02002
203.	Cushion Missing	Visual	02003

4.2.2.3 Loading assembly (see dwg. 8862439).

Categories	Defects	Method of Inspection	Code No.
Critical: None defined			
Major:	AQL 0.40 percent		
101.	Total length,max	Gage	03001
102.	Outside diameter,max	Gage	03002
103.	Closure insecurely bonded	Visual-Manual	03003
104.	Paint in threads, fuze cavity or aft insert cavity	Visual	03004
Minor:	AQL 0.40 percent		
201.	Marking and data misleading or unidentifiable	Visual	03005
202.	Evidence of poor workmanship (see 3.4)	Visual	03006

4.2.2.4 Shipping container, prior to sealing (see dwg. 8830879).

Categories	Defects	Method of Inspection	Code No.
Critical: None defined			
Major:	AQL 0.65 percent		
101.	Cushioning pad on base missing	Visual	04001
102.	Warhead not seated properly	Visual	04002

103.	Hold down strap missing or insecure	Visual-Manual	04003
Minor:	AQL 0.65 percent		
201.	Foreign matter inside crate	Visual	04004

4.2.2.5 Shipping container, sealed (see dwg. 8830879).

Categories	Defects	Method of Inspection	Code No.
Critical:	None defined		
Major:	AQL 1.00 percent		
101.	Strapping missing, broken or loose	Visual-Manual	05001
102.	Board broken, split or curled	Visual	05002
103.	Skid missing or damaged excessively	Visual	05003
104.	Contents exposed	Visual	05004
105.	FSC number misleading or unidentifiable	Visual	05005
Minor:	AQL 2.50 percent		
201.	Fastener missing or loose	Visual-Manual	05006
202.	Strapping improperly assembled	Visual	05007
203.	Nail protruding	Visual	05008
204.	Marking missing, misleading or unidentifiable	Visual	05009

4.2.3 Testing

4.2.3.1 Assembly weight (see dwg. 8862439) - Major defect - Code No. 03005.-This determination shall be made 100 percent using a scale accurate to within 0.01 pound. Any assembly failing to comply with the drawing requirement shall be classed defective and removed from the lot.

5. PREPARATION FOR DELIVERY

5.1 Packing and marking.

5.1.1 Level C."The loaded warhead assemblies shall be packed

Check the source to verify that this is the current version before use.

and marked in accordance with dwg. 8830879.

5.2 Data cards.-Data card information shall be as specified in Specification MIL-A-2550.

6. NOTES

6.1 Ordering data.-Procurement documents should specify the title, number, and date of this specification.

6.2 Inspection code numbers.-The five-digit code numbers assigned to the inspection herein are to facilitate future data collection and analysis by the Government.

Notice.-When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.
