MILITARY SPECIFICATION

RUBBER STAMP KIT, FOOD INSPECTION

This specification is mandatory for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 Scope.- This specification covers a food inspection stamping kit.

2. APPLICABLE DOCUMENTS

* 2.1 The following documents, of the issue in effect on date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein.

SPECIFICATIONS

FEDERAL

QQ-S-766 - Steel Plates, Sheets, and Strip, Corrosion-Resisting.
PPP-B-636 - Box, Fiberboard.

MILITARY

MIL-P-3578 - Pad, Inking, Hand Stamp (Food Inspection, Veterinary).
MIL-C-3592 - Can, Food Stamping Ink, (Veterinary).
MIL-R-3669 - Rubber Stamps, Fixed and Removable Types, Food Inspection, Veterinary.
MIL-N-3734 - Numeral Set (Rubber Type, Veterinary, For Food Inspection Stamp).

STANDARDS

MILITARY

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129 - Marking for Shipment and Storage.
MIL-STD-130 - Identification Marking of U.S. Military Property.

FSC 7520

DRAWINGS

ARMY NATICK LABORATORIES

6-1-1191 - Rubber Stamp Kit, Food Inspection.

(Miniature copy of Drawing 6-1-1191, identified as figure 1, is attached for information purposes only.)

(Copies of specifications, standards, and drawings required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

3. REQUIREMENTS

* 3.1 Preproduction sample.- When specified (see 6.2), before production is commenced, a sample rubber stamp kit shall be submitted or made available to the contracting officer or his authorized representative for approval in accordance with 4.2. Approval of the preproduction sample authorizes the commencement of production, but does not relieve the supplier of responsibility for compliance with all applicable provisions of this specification. The preproduction sample shall be manufactured in the same facilities to be used for the manufacture of the production items.

* 3.2 Materials.- The material specified shall conform to the applicable specifications and requirements specified hereinafter.

3.2.1 Steel plates, sheets and strip, corrosion-resisting.- Corrosion-resisting steel plates, sheets and strip shall conform to the mechanical properties and chemical composition requirements only of class 301 or 430, condition A, finish 4 of QQ-S-766.

3.3 Design and construction.- The design and construction of the rubber stamp kit shall conform to Drawing 6-1-1191, applicable detail drawing shown therein, and as hereinafter specified. The stamping kit shall consist of a metal case containing the following:

ITEM	UNIT	QUANTITY
Chart, Date Conversion, Food Inspectors, Veterinary.	Each	1
Can, Food Stamping Ink, (Veterinary).	Each	1
Numeral Set (Rubber Type, Veterinary, For Food Inspection Stamp).	Set	2
Pad, Inking, Hand Stamp (Food Inspection, Veterinary).	Each	1
Stamp, Partial Inspection Approval.	Each	1
Stamp, Complete Inspection Approval.	Each	1

Check the source to verify that this is the current version before use.

3.4 Detail of components.-

3.4.1 Case.- The case shall be made of 0.0329 inch nominal thickness corrosion-resisting steel specified in 3.2.1. All joints shall be spot welded with a maximum distance of 3/4 inch between welds. All fittings such as handle and closures shall be attached by spot welding with a minimum of three welds per contact surface. Spot welds shall be sound, smooth, and free from pits, burns or flashes.

3.4.2 Chart, date conversion, food inspectors, Veterinary.- The date conversion charts shall be printed in black on white paper, measuring 2-3/4 inches wide and 3-5/8 inches long. The quality and weight of the paper shall be applicable for fastening to the lid of the kit. The chart shall be designed for changing the days of the months to the corresponding days of the year. The chart shall conform to figure 2 and shall be firmly affixed to the inside of the lid in the position shown on Drawing 6-1-1191 by means of transparent cellulose type adhesive tape or self-sticking plastic sheet, applied in such a manner as to completely cover the chart.

3.4.3 Can, food stamping ink (veterinary).- The food stamping ink dispenser shall conform to MIL-C-3592.

3.4.4 Numeral set (Rubber type, veterinary, for food inspection stamp).- The rubber, food inspection stamp numeral sets shall conform to MIL-N-3734.

3.4.5 Pad, inking hand stamp (food inspection, veterinary).- The food inspection stamping pad shall conform to MIL-P-3578.

3.4.6 Stamp, partial inspection, approval.- The partial inspection approval stamp shall conform to type I, class A of MIL-R-3669.

3.4.7 Stamp, complete inspection approval.- The complete inspection approval stamp shall conform to type I, class B of MIL-R-3669.

3.5 Assembly.- The component parts of the stamping kit shall be assembled in the proper compartment of the case (see figure 1).

* 3.6 Identification marking.- The top of the case shall be marked with the letters "US" in accordance with MIL-STD-130.

* 3.7 Workmanship.- The finished kit shall conform to the quality and grade of product established by this specification. The case shall be free from burrs and sharp edges.

4. QUALITY ASSURANCE PROVISIONS

* 4.1 Responsibility for inspection.- Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified,

Source: https://assist.dla.mil -- Downloaded: 2026-10-16T21:46Z
Check the source to verify that this is the current version before use.

the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

* 4.2 Preproduction sample inspection.- When a preproduction sample is required, it shall be examined for defects listed in table II and specified dimensions.

* 4.3 Sampling for inspection and acceptance.- Sampling for inspection and acceptance shall be performed in accordance with the provisions set forth in MIL-STD-105, except where otherwise indicated.

* 4.3.1 Component and material inspection.- In accordance with 4.1 above, components and materials shall be inspected and tested in accordance with all the requirements of referenced specifications, drawings, and standards unless otherwise excluded, amended, modified or qualified in this specification or applicable purchase document.

4.3.1.1 Visual examination of cases.- Examination shall be made of the cases for the defects set forth in table I. The inspection level shall be II with an acceptable quality level (AQL) of 2.5 defects, expressed in terms of defects per hundred units.

TABLE I. - Defects

Examine	Defect
Construction and workmanship	Weld burnt through. Metal damaged in welding. Spot weld missing, or evidence that spot weld is not sound. Spot welds are not smooth.
Marking	Missing, illegible or incorrect.

4.3.1.2 Dimensional examination of cases.- Examination shall be made of the cases to determine compliance with dimensional requirements specified on the drawing. Any dimension not within the established requirements shall be classified a defect. The inspection level shall be S-2 with an AQL of 4.0 defects, expressed in terms of defects per hundred units.

* 4.3.2 Inspection of the end product.- The lot shall be all the kits offered for inspection at one time. The sample unit shall be one completely assembled kit.

Source: https://assist.dla.mil -- Downloaded: 202610-16T21:46Z
Check the source to verify that this is the current version before use.

* 4.3.2.1 Visual examination.- Examination shall be made of the kits for defects in table II. The inspection level shall be II with an AQL of 2.5 defects, expressed in terms of defects per hundred units.

TABLE II. - Defects

Examine	Defect
Assembly	Any component of kit missing. Component does not fit compartment.

* 4.3.3 Examination of preparation for delivery.- An examination shall be made of packaging, packing and marking to determine compliance with section 5 of this specification. Defects shall be scored as specified in table III. The sample unit shall be one shipping container fully prepared for delivery except that it need not be sealed. The lot shall be the number of containers offered for delivery at one time. The inspection level shall be S-2 with an AQL of 4.0 defects, expressed in terms of defects per hundred units. Examination for closure and strapping shall be on containers fully prepared for delivery.

TABLE III. - Examination of preparation for delivery

Examine	Defect
Markings (exterior and interior)	Omitted; incorrect; illegible; of improper size, location sequence or method of application.
Materials	Any component missing or damaged.
Workmanship	Inadequate application of components, such as incomplete closure of container flaps, loose strapping, inadequate stapling. Bulging or distortion of containers.
Contents	Number per container is more or less than required.

5. PREPARATION FOR DELIVERY

* 5.1 Packaging.- Packaging shall be level A or C as specified (see 6.1).

* 5.1.1 Level A.- Each kit shall be securely closed and packaged in a snug-fitting fiberboard box conforming to style RSC, type CF, variety option, or type SF, class domestic of PPP-B-636. Box closure shall be in accordance with the appendix of the box specification (see 6.3).

Source: https://assist.dla.mil -- Downloaded: 2026-10-16T21:46Z
Check the source to verify that this is the current version before use.

* 5.1.2 Level C.- Kits shall be packaged to afford adequate protection against damage during shipment from the supply source to the first receiving activity. The supplier may use his standard practice, when it meets this requirement.

5.2 Packing.- Packing shall be level A, B or C as specified (see 6.1).

* 5.2.1 Level A.- Twelve kits, packaged as specified in 5.1, shall be packed in a snug-fitting fiberboard shipping container conforming to style RSC, V3c or V3s of PPP-B-636. Closure, waterproofing by means of tape and reinforcing with flat steel strapping or tape banding shall be in accordance with the appendix of the container specification.

* 5.2.2 Level B.- Unless otherwise specified (see 5.2.2.1), twelve kits, packaged as specified in 5.1, shall be packed in a snug-fitting fiberboard shipping container conforming to style RSC, type CF, variety optional, or type SF, class domestic of PPP-B-636. Closure shall be in accordance with method II of the appendix of the container specification.

* 5.2.2.1 When specified (see 6.2), shipping containers shall be made from weather-resistant fiberboard specified in 5.2.1.

* 5.2.3 Level C.- Kits shall be packed in a manner to insure carrier acceptance and safe delivery at destination at the lowest transportation rate for such supplies. Containers shall be in accordance with rules or requlations of carriers applicable to the mode of transportation.

5.3 Marking.- In addition to any special marking required by the contract or order, interior packages and shipping containers shall be marked in accordance with MIL-STD-129.

6. NOTES

* 6.1 Intended use.- The rubber stamp kit, covered by this specification is intended to be used to contain equipment necessary to accomplish the marking of foods accepted for use and consumption by the Armed Services.

* 6.2 Ordering data.- Procurement documents should specify the following:

(a) Title, number and date of this specification.
(b) When preproduction sample is required (see 3.1).
(c) Selection of applicable levels of packaging and packing (see 5.1 and 5.2).
(d) When weather-resistant class fiberboard shipping containers are required for level B shipment (see 5.2.2.1).

6.3 Packaging.- The method of packaging referred to in 5.1.1, is similar to method III of MIL-P-116.

SPECIFICATION ANALYSIS SHEET

Form Approved
Budget Bureau No. 119-R004

INSTRUCTIONS

This sheet is to be filled out by personnel either Government or contractor, involved in the use of the specification in procurement of products for ultimate use by the Department of Defense. This sheet is provided for obtaining information on the use of this specification which will insure that suitable products can be procured with a minimum amount of delay and at the least cost. Comments and the return of this form will be appreciated. Fold on lines on reverse side, staple in corner, and send to preparing activity.
