INTERIM AMENDMENT

FEDERAL SPECIFICATION

PLUM BOB

This Interim Amendment was developed by the Standardization Division, Federal Supply Service, General Services Administration, Washington, D. C. 20407, based upon currently available technical information. It is recommended that Federal agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above. The General Services Administration has authorized Federal agencies to use this Interim Amendment as a valid exception to Federal Specification GGG-P-501c, dated August 26, 1963.

Page 7, after paragraph 3.8.2.6: Add the following:

"3.9 Sheath. - When specified (see 6.2), plumb bobs shall be supplied with a leather sheath of suitable size and substantial construction to withstand long, hard use. The sheath shall be equipped with a flap, which is fitted with a strong brass or corrosion-resistant steel snap fastner, to prevent accidental loss or removal. All seams shall be sewn and reinforced at each end with brass or corrosion-resistant steel rivets. Each sheath shall be equipped with a belt loop or two formed slits approximately 1-5/8 inches long, so that it may be carried on a belt."

Page 7, paragraph 3.9 Workmanship: Change paragraph numbering to "3.10."

Page 8, add to Table V, after Category 114:

"116 Sheath when specified, missing, damaged, nonconforming or not of required material."

Page 10, paragraph 6.2: Add "(e-1) If sheath is required (see 3.9)."

Page 10, after paragraph 6.2.1: Add the following:

"6.2.2 Replacement sheaths. - Procurement document should specify the following:

(a) Type and size (weight) of plumb bob that replacement sheaths are for.
(b) Quantity of sheaths required."
