MIL-S-37352A
29 October 1976
SUPERSEDING
MIL-S-37352 (DSA-DM)
18 November 1975

MILITARY SPECIFICATION

SMALLPOX VACCINE, USP

This specification is approved for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 Scope. This specification covers Smallpox Vaccine, USP, Freeze-Dried, with separate colored diluent and scarifying needle.

1.2 Classification. The vaccine covered by this specification shall be of the following sizes (see 6.2):

Size 1 - 25 Doses
Size 2 - 100 Doses

2. APPLICABLE DOCUMENTS

2.1 Issues of documents. The following documents, of the issue in effect on date of invitation for bids or request for proposals, form a part of this specification to the extent specified herein.

SPECIFICATIONS

FEDERAL

PPP-C-186 - Containers, Packaging and Packing for Drugs, Chemicals and Pharmaceuticals. (see 6.3).

STANDARDS

FEDERAL

FED-STD-142 - Parenteral Preparations.

MILITARY

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129 - Marking for Shipment and Storage.

(Copies of specifications and standards required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Hq, Defense Personnel Support Center, ATTN: Directorate of Medical Materiel, DPSC-ATT, 2800 South 20th Street, Philadelphia, PA 19101, by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document, or by letter.

2.2 Other publications. The following documents form a part of this specification to the extent specified herein. Unless otherwise indicated, the issue in effect on date of invitation for bids or request for proposals shall apply.

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE,
FOOD AND DRUG ADMINISTRATION (FDA)

Federal Food, Drug, and Cosmetic Act and
Regulations Promulgated Thereunder.

(Application for copies should be addressed to the Food and Drug Administration, Washington, DC 20204.)

U. S. PHARMACOPEIAL CONVENTION, INC.

The United States Pharmacopeia(USP).

(Application for copies should be addressed to the Mack Publishing Company, Easton, PA 18042.)

The National Formulary (NF).

(Application for copies should be addressed to the Mack Publishing Company, Easton, PA 18042.)

3. REQUIREMENTS

(Applicable to Size 1 and Size 2, unless otherwise specified.)

3.1 Material. Shall be Smallpox Vaccine, USP, Freeze-Dried, with separate diluent and scarifying needle.

3.1.1 Smallpox Vaccine. Shall be Smallpox Vaccine, USP. in accordance with the applicable requirements of the Bureau of Biologics (B of B), Food and Drug Administration, and shall be in accordance with all applicable requirements of the FED-STD-142, and as specified herein:

S2. Classification. Shall be type IV, class 2, style A.

S5.4 The following is added to this paragraph:

Shall be Smallpox Vaccine, USP, of calf lymph origin.

S6.1.3 Added Substances. Shall contain a suitable stabilizer and other added substances as required by the B of B.

Check the source to verify that this is the current version before use.

S6.2.4.2 Suspensions of dry solids for injection. Paragraph S6.2.2 is not applicable.

S6.4 Dry solids in final container. Delete in its entirety and substitute:

"S6.4 Dry solids (Freeze-Dried Smallpox Vaccine). The dry solids (Freeze-Dried Smallpox Vaccine) in vial shall be of sufficient quantity so that when the dry solids are reconstituted with the specified quantity of diluent, the resulting suspension shall contain 25 immunizing doses for size 1, and 100 immunizing doses for size 2, of approximately 0.0025 ml per dose."

3.1.2 Diluent (for reconstituting the Freeze-Dried Smallpox Vaccine). The diluent for reconstituting the Freeze-Dried Smallpox Vaccine shall be in accordance with the requirements of the B of B, and shall be in accordance with all applicable requirements of FED-STD-142 and as specified herein:

S2. Classification. Shall be type I, class 1.

Shall be suitable for use in reconstituting the Freeze-Dried Smallpox Vaccine. Shall contain approximately 0.15 ml for size 1 and 0.25 ml for size 2.

S5.4 The following is added to this paragraph:

Shall be a 50% w/v concentration of Glycerin in Sterile Water for Injection, USP.

The Glycerin, Sterile Water for Injection, and the Phenol used in the manufacture of the diluent shall be in accordance with the tests, standards, and requirements of the USP.

S6.1.3 Added substances. Shall contain 0.25% Phenol as the preservative.

The diluent shall contain a sufficient amount (0.005 percent) of Brilliant Green to enable the reconstituted vaccine to be seen when placed on the arm. The amount of Brilliant Green shall not exceed that present in an equivalent amount of Fluid Glycerinated Smallpox Vaccine.

No other added substances shall be used.

S6.3 Delete in its entirety and substitute:

"S6.3 Volume in final container. Each immediate container of diluent shall contain sufficient diluent so that the final suspension contains 25 doses for size 1, and 100 doses for size 2."

3.2 Gill pins (scarifying needles).

3.2.1 Description. Gill pins (scarifying needles) shall be in accordance with the following:

Shall be fabricated of high carbon or stainless steel and shall be approximately 2-1/2 inches in length and shall have a thickness of 20 gage. The gill pins shall be brightly polished and shall have a bifurcation (two points) at one end. Twenty-five (25) gill pins for size 1, and one hundred (100) gill pins for size 2, shall be packaged in a suitable container with a plastic bottom and a plastic dispensing top. The plastic dispenser top shall be so constructed that when the plastic cover is removed, one (1) bifurcated needle may be dispensed at a time by shaking the container. The plastic needle case cover shall contain a suitable dry solid vial protective stopper cap suitable for use when the vaccine is to be stored for subsequent use.

The gill pins (scarifying needles) shall be sterile.

Shall be tested for sterility by the USP or B of B sterility test method.

3.3 Samples to be submitted.

3.3.1 To Walter Reed Army Institute of Research. The quality assurance representative, when inspection is at source, or the contractor, when inspection is at destination, shall send the following by fastest route directly to:

Division of Immunology
Walter Reed Army Institute of Research
Walter Reed Army Medical Center
Washington, DC 20012

(1) Six (6) samples of unit packages (including circulars) from each lot or batch, accompanied by appropriate document bearing the following information:

(a) National stock number
(b) Item identification
(c) Contract number
(d) Contractor's name and address
(e) Lot or control number
(f) Quantity of material represented by the sample.

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T10:30Z
Check the source to verify that this is the current version before use.

(2) One (1) copy of the protocol which the manufacturer has submitted to B of B , stating the essential manufacturing processes and results of tests for each lot or batch.

(3) One (1) copy of B of B release for each lot or batch.

Shipment of material shall not be withheld for a report from Walter Reed Army Institute of Research.

3.4 Inspection.

3.4.1 Source. When inspection is made at source, the cognizant quality assurance representative shall submit one (1) copy of the Bureau of Biologics release and certificate of sterility for each lot or batch, and two (2) copies of document, submitted with samples, directly to the Directorate of Medical Materiel, Technical and Quality Assurance Division, Defense Personnel Support Center, Attention: Quality Assurance Branch, 2800 South 20th Street, Philadelphia, PA 19101.

3.4.2 Destination. When inspection is made at destination, the contractor shall submit one (1) copy of the Bureau of Biologics release and certificate of sterility for each lot or batch, and two (2) copies of document submitted with samples, directly to the Defense Personnel Support Center, addressed as shown above, and one (1) copy of the Bureau of Biologics release shall also be forwarded with the shipment to the consignee.

3.5 Expiration dating period. The expiration dating period shall be 18 months.

4. QUALITY ASSURANCE PROVISIONS

4.1 Supplier responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T10:30Z
Check the source to verify that this is the current version before use.

4.1.1 Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government, upon the Government's request, at any time, or from time to time, during the performance of the contract and, (i) as to any expiration dated item, for the expiration dating period specified by the contractor for such item, or such longer period as may be required by regulations of any federal agency; or (ii) as to non-dated items, for not less than 3 years after delivery of the items to the Government.

4.1.2 No company supplying any ingredient(s) to the contractor will be considered an acceptable facility for the performance of any inspection requirements specified herein.

4.2 Sampling and examination. The sampling and examination as shown in FED-STD-142 shall be applicable.

4.3 Tests. Tests shall be performed to determine compliance with all referenced documents.

4.4 Packaging inspection. The inspection of the intermediate package, packing and marking for shipment and storage shall be in accordance with the quality assurance provisions of the applicable container specification and the marking requirements of MIL-STD-129.

4.5 Labeling inspection. Sampling shall be in accordance with MIL-STD-105 and the unit product shall be the unit of issue. The inspection lot shall be the number of units of issue of each batch, lot, control, etc., offered for inspection at one time. The inspection label for labeling shall be S-2 and the acceptance number shall be zero.

5. PACKAGING

5.1 Packaging requirements. The requirements for packaging shall be in accordance with all applicable requirements of PPP-C-186 (see 6.3) and as specified herein.

5.2 Packaging. Packaging shall be level A or C, as specified (see 6.1).

5.2.1 Unit of issue. One package containing one vial of vaccine and one vial of diluent, and one container of sterile bifurcated scarifying needles (gill pins) of the size specified, constitutes one unit of issue.

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T10:30Z
Check the source to verify that this is the current version before use.

5.2.2 Level A.

5.2.2.1 Immediate container. Immediate container shall be a commercially available vial considered acceptable by the Food and Drug Administration (FDA) for the product contained therein and shall be of such compatibility that neither the contents nor the container are altered in any way by each other.

5.2.2.2 Unit packaging. Each unit of issue shall be packaged as specified in 5.2.5 of PPP-C-186.

5.2.2.3 Intermediate package. Ten (10) units of issue of size 1 or size 2 shall be packaged as specified in 5.2.7.1 of PPP-C-186.

5.2.3 Level C. Units shall be packaged in standard commercial containers of the size and kind commonly used, which will afford the degree of protection required for shipment and use of the product for its intended purpose.

5.3 Packing. Packing shall be level A, B, or C as specified (see 6.1).

5.3.1 Level A. Twelve intermediate packages (120 unit packages) of size 1 or size 2 shall be packed as specified in 5.4.4 of PPP-C-186.

5.3.2 Level B. Twelve intermediate packages (120 unit packages) of size 1 or size 2 shall be packed as specified in 5.4.3.1.1 of PPP-C-186.

5.3.3 Level C. The subject commodity shall be packed in substantial commercial containers of the type, size, and kind commonly used for the purpose, so constructed as to insure acceptance and safe delivery by common or other carriers, at the lowest rate, to point of delivery called for in the contract or purchase order.

5.4 Marking.

5.4.1 Labeling. Labeling shall be in accordance with the requirements of the Federal Food, Drug and Cosmetic Act, and shall include the information required below:

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T10:30Z
Check the source to verify that this is the current version before use.

5.4.1.1 Immediate container. Each immediate container label shall bear the following information:

(a) label information in accordance with commercial practice.
(b) the expiration date.

5.4.1.2 Unit package. Each unit package label shall bear the following information:

(a) label information in accordance with commercial practice.
(b) the national stock number.

NOTES: (1) The National Stock Number shall not be preceded by any prefix.
(2) Strip labeling may be used.
(3) Label adhesion test shall not apply.

5.4.2 Intermediate package. Each intermediate package shall be marked as specified in 5.5.3 of PPP-C-186. In addition, Type I shelf life marking as specified in MIL-STD-129 shall be shown. Marking shall include the legend:

"STORE BETWEEN 2° - 8°C (35° - 46° F).

5.4.3 Exterior container. Exterior containers shall be marked as specified in 5.5.4 of PPP-C-186. Type I Shelf life marking as specified in MIL-STD-129 shall also be shown. Marking shall include the legend:

"STORE BETWEEN 2° - 8°C (35° - 46° F).

Note: The unrefrigerated shipping time for this item shall be not more than 7 days (168 hours).

6. NOTES

6.1 Ordering data. Procurement documents should specify the following:

(a) Title, number and date of this specification.
(b) the National Stock No.
(c) Selection of applicable levels of packaging and packing (see 5.2 and 5.3).

Source: https://assist.dla.mil -- Downloaded: 202610-21T10:30Z
Check the source to verify that this is the current version before use.

6.2 This specification covers the following item:

National Stock No.	Item Identification	Specification Designation
6505-00-406-9199	SMALLPOX VACCINE, USP, Freeze-Dried, 25 doses	Size 1
6505-00-903-8173	SMALLPOX VACCINE, USP, Freeze-Dried, 100 doses	Size 2

6.3 All reference to PPP-C-186 refers to PPP-C-00186B which is mandatory for use until superseded by a revision.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

OMB Approval
No. 22-R255

INSTRUCTIONS: The purpose of this form is to solicit beneficial comments which will help achieve procurement of suitable products at reasonable cost and minimum delay, or will otherwise enhance use of the document. DoD contractors, government activities, or manufacturers/vendors who are prospective suppliers of the product are invited to submit comments to the government. Fold on lines on reverse side, staple in corner, and send to preparing activity. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements. Attach any pertinent data which may be of use in improving this document. If there are additional papers, attach to form and place both in an envelope addressed to preparing activity.
