VEHICULAR INTEGRATION FOR COMMAND, CONTROL, COMMUNICATION & COMPUTERS, INTELLIGENCE SURVEILLANCE, AND RECONNAISSANCE AND ELECTRONIC WARFARE (C4ISR/EW) INTEROPERABILITY (VICTORY)

Vehicular Integration for Command, Control, Communication & Computers, Intelligence Surveillance, and Reconnaissance and Electronic Warfare (C4ISR/EW) Interoperability (VICTORY) includes a framework of artifacts including:

- an Architecture providing the framework for integrating with C4ISR and EW systems and interfacing with vehicle systems;
- a Standard Specifications Document providing all the technical details of the systems, components, and interfaces outlined in the architecture document;
- a set of Initial Validation Artifacts including the documentation, data, and software developed to perform the initial validation experiment on each VICTORY standard specification;
- a Compliance Test Suite (CTS) for implementers to use to verify the compliance of a component product against VICTORY component type specifications;
- a Reusable Reference Software Library (reusable source code) providing example implementations of VICTORY standard specifications (both client and server sides) that can be used by developers as a starting point for creating VICTORY-compliant components; and
- Additional engineering support documentation like implementation guides, reference design documents, and engineering tools aiding adoption of VICTORY standard specifications.

The majority of VICTORY framework artifacts are controlled and releasable to U.S. Government agencies and their contractors. A copy of the latest revision can be obtained electronically from the VICTORY web portal https://portal.VICTORY-Standards.org/ which includes the following tabs:

- VICTORY Documents – access to the Architecture, Standard Specifications, Short Course, and Reference Designs documents
- Spec V1.8 Viewer – an online viewer for the Standard Specification Document
- Help Desk – an online support mechanism for Q&A
- Compliance Test Suite – access the latest Compliance Test Suite (CTS) for verification testing
- Reusable SW Tools – access to reusable reference software library, libVICTORY, and engineering tools.

Check the source to verify that this is the current version before use.

Requests for more information and/or questions regarding VICTORY can be sent via an electronic request to the Department of Army VICTORY Standards Support Office (VSSO) at VSSO@VICTORY-Standards.org, or by mailing a written request to 6590 Reconnaissance Street, Bldg 6010 Room 317L, Aberdeen Proving Ground, MD 21005. A subset of VICTORY framework products are publicly releasable and may be obtained from the VICTORY Public Site at http://www.VICTORY-standards.org.

Proposed changes by DoD and industry activities must be submitted to the VSSO electronically at VSSO@VICTORY-Standards.org, and all proposed changes will be prioritized and updates responding to the proposed changes will be vetted through the Government-led VICTORY Standards Body.

CONCLUDING MATERIAL
