DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

Public reporting burden for this collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503.

1. TITLE	2. IDENTIFICATION NUMBER
Serialized Control Backshop Failure Report	DI-MISC-81484

3. DESCRIPTION / PURPOSE

3.1 The serialized control backshop failure report provides current and predicted reliability levels of serialized electronic components which are removed from a higher level assembly and routed to a back shop for failure resolution and repair. The purpose of the backshop failure report is to provide traceability between the various levels of repair.

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b. GIDEP APPLICABLE
950731	F/WR-ALC-LKGE		

7. APPLICATION / INTERRELATIONSHIP

7.1 This data item description (DID) contains the format and content preparation instructions for data product generated by the specific and discrete task requirement as delineated in the contract.

7.2 This DID is applicable to the acquisition and repair of military systems and equipment.

7.3 This DID supersedes DI-ILSS-80054.

APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
		F7157

10. PREPARATION INSTRUCTIONS

10.1 Format. Format shall be similar to the sample format shown in Figure 1.

10.2 Content. This report shall contain the following information:

10.2.1 Block 1. Original failure report number as specified in contract.
10.2.2 Block 2. Location of activity performing the backshop maintenance.
10.2.3 Block 3. Date of report in DDMMYY format.
10.2.4 Block 4. Part number of original failed section or assembly.
10.2.5 Block 5. Serial number of original failed section.
10.2.6 Block 6. Reference designator of unit being repaired.
10.2.7 Block 7. Part number of the module, circuit assembly, or unit being repaired.
10.2.8 Block 8. Serial number of the module, circuit assembly for the unit being replaced.
10.2.9 Block 9. Reference designator or circuit assembly for the unit being replaced.
10.2.10 Block 10. Malfunction code.
10.2.11 Block 11. Part number of the new item installed.

(Continued on page 2)

11. DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Block 10, Preparation Instructions (Continued)

10.2.12 **Block 12. Serial number of new item installed. If non-serialized, N/A.**
10.2.13 **Block 13. Detailed narrative cause of failure including general condition of unit as a whole, visual estimate of components condition, and evidence of contributing factors to unit or component failure.**
10.2.14 **Block 14. Name of individual performing repair.**
10.2.15 **Block 15. Date repair was completed.**

SERIALIZED CONTROL BACKSHOP FAILURE REPORT	1. ORIGINAL FAILURE REPORT NO	2. SITE/LOCATION CODE	3. DATE (DDMMYY)
4. FAILED COMP PART NO.	5. FAILED COMP SER NO.	6. FAILED COMP REF DSGN/LCN
