AMENDMENT TO INTERIM

FEDERAL SPECIFICATION

CLOCKS, WALL (QUARTZ CRYSTAL - BATTERY OPERATED)

This amendment was developed by the General Services Administration, Federal Supply Service, Washington, DC 20406, based upon currently available technical information. The General Services Administration has authorized this amendment as part of GG-C-001072A (GSA-FSS), dated October 3, 1978.

PAGE 1

Paragraph 1.1 Delete in its entirety and substitute the following:

1.1 Scope. This specification covers quartz crystal wall clocks powered by one or two dry cell batteries, suitable for use in Government offices and/or activities. The clocks shall be capable of keeping accurate time within plus or minus 10 seconds per month (one second gain or loss in 72 hours).

PAGE 2

Paragraph 3.1 Delete in its entirety and substitute the following:

3.1 General. Clocks supplied under this specification shall be completely assembled and ready for operation, requiring only the insertion of the proper dry cell battery(s). It shall not be necessary to perform periodic movement adjustments to obtain the timing accuracy specified herein.

PAGE 3

Add new paragraph after 3.5.1, as follows:

3.6 Workmanship. A high degree of craftsmanship shall be exercised while performing the various operations of manufacture to eliminate imperfections; to insure that assemblies will not separate during shipping or normal use; and to produce a finished commodity that is satisfactory in function, serviceability and appearance.
