COMMERCIAL ITEM DESCRIPTION

CURETTE, ALVEOLAR, MILLER

The General Services Administration has authorized the use of this Commercial Item Description in preference to Federal Specification GG-C-1282C, dated 14 August 1985.

This commercial item description covers double-ended alveolar curettes of Miller's design suitable for use in dental surgical procedures.

Salient characteristics:

The curettes shall be of the following types as specified below:

Type I. - Miller No. 10

Type II. - Miller No. 11

Type III. - Miller No. 12

Material.

Operative ends. The operative ends and shanks of the curettes shall be class 4, type 440A martensitic stainless steel in accordance ASTM Standard F899.

Handles. Handles of the curettes shall be brass, as specified. Brass shall conform to copper alloy number C26000 or C33000 of ASTM B135 for chemical composition only. Handles shall be nickel plated or chromium-over-nickel plated.

Hardness. After proper stress relieving, the operative ends shall have a Rockwell hardness of C52 to C56 when tested as specified in ASTM E18 or E92. Handles and shanks shall have a hardness suitable for the purpose intended.

AMSC N/A FSC 6520

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Style, design and dimensions. The curettes shall be double-ended curettes of Miller design. The design and dimensions of the curettes shall conform to Defense Personnel Support Center (DPSC) Drawing No. 24449 for the applicable Miller number. Curettes shall be alveolar bone dental surgical curettes suitable for use in oral surgical procedures. Curettes shall be suitable for use as exploratory instruments and to remove tooth particles or debris from sockets, to enucleate cysts, dental granulomas and cystic neoplasms, and to remove small sequestra from sockets.

Construction. Curettes shall be of three piece construction. Curettes shall consist of a handle with an operative end (blade) and shank at each end. The shanks shall be permanently secured in the handle. The interface of the shank and handle shall be smoothly blended with no crevices evident. There shall be no movement, loosening, or separation between the operative end and the handle when the operative end is subjected to an 85 pound (minimum) pull out force.

Finish. The operative ends and shanks shall have a bright finish except for the inside surface and curetting edge of the spoon which shall have a fine honed finish. The operative ends shall have a sharp edge around the periphery of the blade and shall be free of defects such as coarse grind marks, cracks, burrs, deep pits, feathers, turned over edges, and other imperfections when viewed as specified herein. Handles shall have a longitudinal scratch, sandblast, or satin finish.

Corrosion resistance. Corrosion resistance tests in accordance with ASTM F1089 shall be applicable. The entire instrument shall meet the boil test requirement. Stainless steel parts shall meet the copper sulfate test requirement.

Identification marking. Curettes shall be permanently and legibly marked on the smooth front face of the handle. Marking shall include the name or registered trademark of the manufacturer and the word "stainless". Curettes of foreign manufacture shall bear the name of the country of origin. Curettes shall also be marked with the applicable Miller number.

Check the source to verify that this is the current version before use.

Workmanship. The curettes shall be free from defects which detract from their appearance or impair their serviceability.

Unit. Each (EA). One curette, as specified, constitutes one unit.

Unit package. Each curette shall be wrapped in neutral tissue or other suitable anti-corrosive material and in a close fitting container to prevent damage to the operative ends.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Sampling for inspection. Sampling for inspection shall be conducted in accordance with MIL-STD-105. Where feasible, the same sample shall be used for the determination of two or more inspection characteristics. The unit of product for inspection purposes shall be one curette. Unless otherwise specified, sampling for examination shall be conducted at inspection level II, except for dimensions, which shall be conducted at inspection level S-1, and sampling for tests (when applicable) shall be conducted at inspection level S-1. For tests, the acceptance number shall be zero (0) for all sample sizes.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

NOTE: The following National Stock Numbers are covered by this document:

National Stock Number	Item Identification
6520-01-125-6602	CURETTE, ALVEOLAR, Miller, No. 10
6520-01-126-4028	CURETTE, ALVEOLAR, Miller, No. 11
6520-01-125-6603	CURETTE, ALVEOLAR, Miller, No. 12

Ordering data. Intermediate/exterior package quantities, labeling and marking must be as specified in the contract and/or order.
