COMMERCIAL ITEM DESCRIPTION

BLADES, BAND SAW, CARBON STEEL, MEAT CUTTING

The General Services Administration has authorized the use of this commercial item description in preference to the type I, style 2, class B band saw blades of Federal Specification GGG-B-421c.

1. SCOPE

1.1 Scope. This description covers carbon steel band saw blades of the standard commercial type that are used for cutting meat, bone, and fish.

1.2 Classification. The saw blades shall be of the sizes listed in table I. The size to be furnished shall be as specified (see 6.2).

2. APPLICABLE DOCUMENTS

2.1 Documents. The following documents of the issue in effect on the date of invitation for bids or request for proposals, form a part of this description to the extend specified herein. The documents should be obtained from the contracting activity or as directed by the contracting officer.

Federal Specification PPP-T-1150	- Tools and Tool Accessories for Power Driven, Metal and Wood-working Machinery, Packaging and Packing of.
Federal Standard FED-STD-376	- Preferred Metric Units for General Use by the Federal Government.
American National Standard Institute, Standard ANSI B94.51	- Specifications for Band Saw Blades (Metal Cutting).
American Society for Testing and Materials Standards ASTM D 3951	- Standard Practice for Commercial Packaging.

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

TABLE I. Blade sizes and characteristics.

Size	Characteristics			
	Width (inches)	Thickness (inches)	Pitch (teeth/inch)	Tooth set
1	0.500	0.016	3	Standard
2	0.500	0.016	4	Standard
3	0.500	0.016	5	Standard
4	0.500	0.016	6	Standard
5	0.500	0.020	3	Standard
6	0.500	0.020	4	Standard
7	0.500	0.020	5	Standard
8	0.500	0.025	3	Standard
9	0.500	0.025	4	Standard
10	0.500	0.025	5	Standard
11	0.500	0.025	6	Standard
12	0.625	0.016	3	Standard
13	0.625	0.016	4	Standard
14	0.625	0.016	5	Standard
15	0.625	0.016	6	Standard
16	0.625	0.020	3	Standard
17	0.625	0.020	4	Standard
18	0.625	0.020	5	Standard
19	0.625	0.025	3	Standard
20	0.625	0.025	4	Standard
21	0.625	0.025	5	Standard
22	0.625	0.025	6	Standard
23	0.750	0.020	3	Standard
24	0.750	0.020	4	Standard
25	0.750	0.020	6	Standard
26	0.750	0.025	4	Standard
27	0.750	0.025	6	Standard
28	0.750	0.032	3	Standard
29	0.750	0.032	4	Standard
30	0.750	0.032	6	Standard

2.2 Order of precedence. In the event of conflict between the text and this document and the references cited herein, the text of this document shall take precedence.

3. SALIENT CHARACTERISTICS

3.1 Design. The band saw blades shall be new and of the manufacturer's standard commercial design in effect on the date of the solicitation. The band saw blades shall be of the hard edged, flexible back, skip tooth style, and shall conform to the sizes and characteristics specified in table I.

3.2 Material. The band saw blades shall be manufactured of a carbon-steel composition that meets the requirements of this description.

3.3 Measurement system. All dimensions in this description are given in US units. These measurements may be converted to SI units through the use of conversion factors and methods specified in FED-STD-376.

3.4 Regulatory requirements. The offeror/contractor is encouraged to use recovered materials to the maximum extent practical.

3.5 Dimensions and tolerances. Band saw blades shall conform to the dimensional requirements contained in table I.

3.5.1 Tolerances. Tolerances for the dimensions specified in table I shall be as listed below. All tolerances not specified herein shall conform to ANSI B94.51.

Width	Tolerances
0.500 inch	+0, -0.016 inch
0.625 inch	+0, -0.020 inch
0.750 inch	+0, -0.020 inch

Thickness	Tolerances
0.016 inch	$\pm$0.0010
0.020 inch	$\pm$0.0010
0.025 inch	$\pm$0.0010
0.032 inch	$\pm$0.0011

3.6 Hardness. Band saw blades shall have a tooth hardness of not less than 62 Rockwell C and not greater than 66 Rockwell C. Blade body hardness shall be not less than 24 Rockwell C and not greater than 38 Rockwell C.

3.7 Length. Unless otherwise specified, band saw blades shall be furnished in coils of 100 feet. When specified (see 6.2.), band saw blades shall be furnished in coil lengths of 250 feet, 500 feet, or in the welded length specified. When coils are supplied, there shall be no more than two welds each. When welded lengths are supplied, there shall be no more than one weld each.

Check the source to verify that this is the current version before use.

3.8 Workmanship. Workmanship of the band saw blades shall be of a quality equal to that of comparable products furnished to the commercial market.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection, examination, and test requirements specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any other facilities suitable for the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.2 Sample inspection. The supplier shall randomly select one sample blade from each lot of blades offered for acceptance to determine conformance with the examination in 4.3, the dimensional inspection in 4.4, and the hardness test in 4.5. If the sample blade passes all examination, inspection, and test requirements specified, the entire lot shall be accepted and considered suitable for shipment. If the sample blade fails to pass all examination, inspection, and test requirements specified, the supplier shall select two additional sample blades from the same lot. The two additional sample blades shall be subjected to the same examination, inspection, and test requirements to which the failed blade was subjected. If both additional sample blades pass all examination, inspection, and test requirements specified, the supplier shall replace the defective blade with a blade that meets all the requirements specified herein, and the entire lot shall be accepted and considered suitable for shipment. If either of the two additional sample blades fail to pass all examination, inspection, and test requirements specified, the entire lot shall be rejected and considered unsuitable for shipment. A lot is defined as all blades of the same size presented at one time for acceptance.

4.3 Examination. Each band saw blade submitted for sample inspection shall be visually examined to determine conformance with all requirements in this description.

4.4 Dimensional and tolerance inspection. Each sample band saw blade shall be inspected to assure conformance with all dimensional and tolerance requirements specified herein.

4.5 Hardness test. Each sample band saw blade shall be subjected to a hardness test to determine conformance with the applicable requirements in 3.6. If the hardness test is destructive, the blade used for the hardness test shall not be considered as part of the procurement order.

4.6 Packaging inspection. Packaging shall be inspected for conformance with section 5.

5. PACKAGING

5.1 Preservation, packing, and marking. Unless otherwise specified in the contract or purchase order, preservation, packing, and marking shall be in accordance with ASTM D 3951. When specified (see 6.2), preservation, packing, and marking shall be in accordance with Federal Specification PPP-T- 1150, level as specified.

6. NOTES

6.1 Intended use. Band saw blades covered by this description are intended to be used for sawing meat, bone, and fish.

6.2 Acquisition requirements. Acquisition documents should specify the following:

a. Title, number, and date of this description.

b. Size and quantity required (see 1.2).

c. Length, if different (see 3.7).

d. Packaging in accordance with PPP-T-1150 if required, specify level required (see 5.1).

6.3 Cross reference data. Items covered by Federal specification GGG-B-421c are cross referenced to items covered by this CID as follows:

GGG-B-421c	A-A-51148
Type I - Style 2 - Class B	Sizes 1 through 22.

6.3.2 Military standard cross reference. Items covered by Military Standard MS 17009 are cross referenced to items covered by this CID as follows:

MS 17009	A-A-51148
MS 17009-2	Size 5
MS 17009-4	Size 13
