# COMMERCIAL ITEM DESCRIPTION

## STORAGE UNIT, PHARMACEUTICALS

The General Services Administration has authorized the use of this Commercial Item Description.

This Commercial Item Description covers a free-standing, single-sided, pharmaceutical storage rack.

Salient Characteristics:

The storage unit shall be free-standing and single-sided, suitable for the storage of pharmaceuticals with the following approximate dimensions:

Width: 36 inches (91.4 cm)
Height: 64 inches (162.6 cm)

The storage unit shall support a total of 54 high-density polyethylene bins on 10 evenly spaced horizontal rails. The bins shall have the following approximate dimensions:

| Number of Bins | Dimensions |
|---|---|
| 42 | 5 inches x 9-1/4 inches x 5-3/4 inches |
| 12 | 5 inches x 9-/14 inches x 8-3/4 inches |

Each bin shall have a molded slot on the front surface for an identification card.

The frame of the storage unit shall include a minimum of two diagonal braces and all necessary hardware for assemblage.

The storage unit shall be supported by two flanged, triangular floor mounts, each approximately 8 inches (20.3 cm) high and 12 inches (30.5 cm) from front to back with a 1-1/2 inch (3.8 cm) flange.

Regularly spaced holes in the two upright supports shall allow the storage unit to be secured to a wall.

AMSC/NA FSC 6530

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

The supporting frame uprights, floor mounts, diagonal braces and horizontal rails, shall be fabricated of cold-rolled steel, suitably protected against corrosion by zinc-plating or an equally effective means. The uprights and floor mounts shall not be less than 12 gauge. The diagonal braces and rails shall not be less than 16 gauge (manufacturer's standard gauge).

The rack shall be capable of being assembled easily without the use of special tools or equipment. When fully assembled the rack shall be free of wobble or distortion, whether empty or filled with a maximum of 810 lb (367. 7 Kg).

Each bin, whether 5-3/4 inches or 8-3/4 inches wide, shall be capable of supporting 15 lbs (6.8 Kg) of contents.

All storage unit components including hardware shall be corrosion-resistant.

Where painting or plating is used, appropriate cleaning and priming shall be performed prior to finishing. Finish shall provide a pleasing professional appearance and be free of gaps, scratches, chips, and other imperfections.

Two sets of instructions for assembly and maintenance shall be supplied with each unit of issue.

Workmanship. The pharmaceuticals storage unit shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Each (EA). One pharmaceuticals storage unit, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Sampling for tests. Sampling for tests shall be conducted in accordance with MIL-STD-105 and as specified herein. The unit of product for test purposes shall be one pharmaceuticals storage unit.

Examination. The shelving shall be examined to determine compliance with requirements of this description in accordance with the following classification of defects. Examination shall include, but shall not be limited to the classified possible defects listed below:

Table I. Classification of Defects.

| Catagories | Defects |
|---|---|
| Major | |
| 101 | Any component part missing, broken, or otherwise unusable. |
| 102 | Exposed edge not free of burrs or sharpness. |
| 103 | Two sets of instructions not furnished with unit. |
| 104 | Storage unit not packaged as a single unit. |
| Minor | |
| 201 | Finish not free of chips, cracks, scratches and other appearance defects. |
| 202 | Unit not clean. |

Tests. The shelving shall be completely assembled in its operating configuration and tested to determine compliance with this description. Testing shall include the following:

Source: https://assist.dla.mil -- Downloaded: 202610-26T09:02Z
Check the source to verify that this is the current version before use.

The fully asembled rack shall be tested with the load of 810 pounds. Failure to be free from wobble and distortion shall constitute a major defect.

The fully asembled rack shall be tested with an empty load. Failure to be free from wobble and distortion shall constitute a major defect.

Each storage bin on the assembled rack shall be tested to support a load of 15 pounds each. Any cracking or breakage of a bin shall constitute a major defect.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurdisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580, as amended, and as implemented by Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.
