COMMERCIAL ITEM DESCRIPTION

JELLY, FRUIT

The U.S. Department of Agriculture has authorized the use of this Commercial Item Description in preference to Federal Specification Z-J-191.

Salient characteristics.

The product shall conform to one of the options in the following list, which shall be specified, as required in the contract or purchase order.

Types.

Type I - Standardized. Prepared from a single variety of fruit juice ingredients shown in list below.

Type II - Standardized. Prepared from a mixture of two or more varieties of fruit juice ingredients shown in list below.

Type III - Nonstandardized. Prepared from a single variety of fruit or nonfruit juice ingredients.

Type IV - Nonstandardized. Prepared from a mixture of two or more varieties of fruit and/or nonfruit juice ingredient(s), and which may include one or more of the fruits listed below.

Kinds (Standardized).

Apple
Apricot
Blackberry (other than dewberry)
Black Raspberry
Boysenberry
Cherry
Crabapple
Damson, damson plum
Dewberry (other than boysenberry, loganberry and youngberry)
Fig
Gooseberry
Grape
Grapefruit
Greengage, greengage plum
Guava
Loganberry
Orange
Peach
Pineapple
Plum (other than damson, greengage, and prune)
Pomegranate
Prickly pear
Quince
Raspberry, red raspberry
Red currant, currant (other than black currant)
Strawberry
Youngberry

FSC 8930

Grades.

U.S. Grade A
U.S. Grade B

Sweetening ingredients. Sweetening ingredients may be any of those permitted in quantities permitted by the Food and Drug Administration Standards of Identity for Fruit Jelly. Specific sweetening agent(s) may be designated in the contract or purchase order.

Chemical analyses. The finished product, on a lot average basis, when required by the purchaser, shall meet the minimum requirements listed in Table I, and the analyses shall be made in accordance with methods listed in Table II, as outlined in the Official Methods of Analysis of the Association of Official Analytical Chemists, as follows:

Table I. Minimum chemical requirements

Kind of fruit 1/ 2/	Ash (percent)	K_2O (mg per 100 grams)	P_2O_5 (mg per 100 grams)
Apple	0.109	59.0	6.4
Blackberry	0.126	60.0	11.2
Crabapple	0.143	82.0	9.0
Currant, red	0.174	91.0	7.9
Grape (Concord)	0.088		7.8
Guava	0.213	84.0	7.6
Loganberry	0.165	78.0	8.8
Pineapple	0.141	69.0	7.0
Plum, damson	0.206	112.0	9.0
Quince	0.179	91.0	11.1
Raspberry, black	0.156	90.0	9.4
Raspberry, red	0.145	75.0	15.9
Strawberry	0.158	82.0	9.8

1/ Chemical requirements are applicable only to the listed kinds of jelly.

2/ Type II shall contain the above constituents in amounts proportionate to the fruit juice in the mixture. Chemical requirements shall be disregarded if one or more of the fruit juices is not listed above.

Table II. Methods of analyses

Test	Source	Method
Ash, percent	Chapter: Fruit and Fruit Products Section: Ash	
Potassium oxide (K_2O mg/100g)	Chapter: Fruit and Fruit Products Section: Potassium	Rapid Flame Photometric
Phosphorus pentoxide (P_2O_5 mg/100g)	Chapter: Fruit and Fruit Products Section: Phosphorus	Volumetric

The fruit jelly shall conform to all applicable requirements of the United States Standards for Grades of Fruit Jelly.

Unless otherwise specified in the contract or purchase order, the fruit jelly shall be prepared and processed less than one year prior to purchase by the Federal Government.

Contractor's certification.

By submitting an offer, the contractor certifies that the product offered meets the specified salient characteristics of this Commercial Item Description; conforms to the producer's own specifications and standards, including product characteristics, manufacturing procedures, quality control procedures, and storage and handling practices; has a national or regional distribution from storage facilities located within the United States, its territories or possessions; and is sold on the commercial market. The Government reserves the right to determine proof of such conformance prior to the first delivery from point of origin, and any time thereafter, up to and including delivery at final destination, as may be necessary to determine conformance to the provisions of the contract.

Regulatory requirements.

The delivered product shall comply with all applicable Federal and State mandatory requirements and regulations relating to the preparation, packaging, labeling, storage, distribution, and sales of the product in the commercial marketplace. All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

Quality assurance.

When required in the contract or purchase order, the fruit jelly shall be graded and certified as to product grade and condition of containers by the Processed Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, as specified in the solicitation or contract. The product grade and condition of containers shall be determined in accordance with the applicable provisions of the U.S. Standards for Grades of Fruit Jelly, and the United States Standards for Condition of Food Containers currently in effect on the date of the solicitation and in accordance with the requirements in the applicable Regulations.

Preservation, packaging, packing, labeling, and marking (as appropriate and applicable).

The fruit jelly shall be preserved, packaged, packed, and case marked in accordance with good commercial practice. Commercial labeling and packaging, as may be augmented by the contract or purchase order, shall be acceptable. Shipping containers shall comply with National Motor Freight Classification or Uniform Freight Classification, as applicable.

For Department of Defense procurement.

The following requirements are applicable when specified by the contracting officer:

A. Commercial packaging. The product shall be packaged in a metal can, size 401 x 411, in a 2-pound capacity glass jar, or 1/2 ounce of jelly shall be unit packaged in an individual service size boat, cup or pouch in accordance with good commercial practice. Twenty boats or cups, or 200 pouches shall be intermediate packaged in a commercial carton, tray, or box. Alternatively, 500 pouches may be packaged in an intermediate fiberboard box.

B. Commercial packing. The product shall be packed in fiberboard containers complying with Uniform Freight Classification or National Motor Freight Classification, as applicable, except metal fasteners shall not be used in the final closure of fiberboard boxes. The quantity and arrangement of packages within the shipping container shall be as specified in Table I. Tiered cans shall be separated with a full length and width fiberboard pad fabricated of the same material as the box.

TABLE I. Quanitity and arrangement of packages within shipping container

Package	Quantity	Arrangement 1/ Length	Width	Depth
Metal can	24	4	3	2
Glass jar	12	4	3	1
Boats or cups	200	-	-	-
Pouches	1000	-	-	-

1/ Arrangement of intermediate packaged boats, cups, or pouches shall be at the option of the supplier.

C. Commercial unit loads. Shipping containers shall be arranged in unit loads in accordance with Type III, Class G of MIL-L-35078.

D. Export packaging. The product shall be packaged in accordance with (1), (2), or (3), as applicable.

(1) Metal cans. The product shall be packaged in an open top style, round metal can, size 401 x 411, with a soldered or welded side seam and compound-lined, double-seamed ends. The can shall be made throughout from not less than 0.50/0.25 pound per base box differential electrolytic tin plate. The can shall have a sufficient base plate weight and temper to protect the product during shipment and storage. The entire inside area of the can shall be enameled. The inside side seam of the can body shall be striped. The can shall be coated overall on the outside with a coating conforming to Type I or when specified, Type III of TT-C-495. The filled can shall be sealed under a vacuum.

(2) Glass jars. The product shall be packaged in a 2-pound capacity glass jar in accordance with good commercial practice.

(3) Boats, cups, or pouches. Same as for commercial packaging.

E. Export packing. The product shall be packed in a snug-fitting fiberboard box, constructed, closed, and reinforced in accordance with Style RSC or RSC-L, as applicable, Grade V3c, V3s, or V4s of PPP-B-636. The inside of each box packed with glass jars shall be fitted with a Grade V15c box liner in accordance with PPP-B-636. Each box packed with glass jars shall be provided with weather-resistant grade fiberboard inner packing to afford protection to the jars from physical damage while in transit or storage. When the product is in trays, the top dimensions shall be covered with a chipboard or nontest fiberboard pad having the same dimensions as the outer dimensions of the tray. The quantity and arrangement of packages within the box shall be as specified in Table I. For distribution to Navy, reinforcement shall be restricted to nonmetallic strapping or pressure-sensitive adhesive-filament reinforced tape in accordance with the appendix of PPP-B-636.

F. Export unit loads. Shipping containers shall be arranged in unit loads in accordance with Type I, Class A of MIL-L-35078.

G. Labeling (commercial and export). Labeling of packages shall be in accordance with good commercial practice and be in compliance with the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

H. Marking of intermediate packages and shipping containers (commercial and export). Commercial markings for intermediate packages and shipping containers are acceptable, provided the following information is included:

National Stock Number	Date of Packaging (month/year) 1/
Item Description	Contract Number
Quantity, Unit of Issue	Name, Address, and Zip Code of Contractor 2/

1/ Day of packaging is also required for intermediate packages and shipping containers of boats, cups, or pouches.

2/ Intermediate packages do not require this information.

Shipping containers packed with glass jars shall be imprinted on top in boldface type, preferably over two inches in height, as follows:

"FRAGILE - HANDLE WITH CARE"

(or similar precautionary marking)

and

"THIS SIDE UP"

Shipping containers packed with intermediate packages of boats, cups, or pouches shall be imprinted on top in boldface type between 1 and 1-1/2 inches in height, as follows:

"KEEP REFRIGERATED

(40°F or BELOW)

DO NOT FREEZE"

I. Marking of unit loads (commercial and export). Unit loads shall be marked in accordance with MIL-L-35078.
