COMMERCIAL ITEM DESCRIPTION

CASE, COMPUTER SUPPLIES, CARRYING

The General Services Administration has authorized the use of this commercial item description in preference to Military Specification MIL-C-52370.

This description covers a cotton duck carrying case intended for use carrying computer supplies for artillery and topographic surveys.

Salient characteristics:

Design: The carrying case shall approximate that shown in figure 1 and as specified herein. The case shall be made from cotton duck cloth with hard board backing. The case shall have sides and top opening through a rust-proof interlocking slide fastener. The case shall have two rope core handles with stitched cotton textile webbing. The handles shall have a minimum dimension of 2.50 inches (6.35 cm) high by 5.50 inches (13.97 cm) long. The case shall be provided with an adjustable carrying strap, 60 inches (152.4 cm) long, attached to the brass buckles. The case shall have 8 pockets with flap closures with rust-proof snap fasteners. The pockets shall be located approximately as shown in figure 1.

Materials:

Case: The case shall be made from an unbleached, hard texture cotton duck cloth with weight of 20.7 to 22.8 ounces (587 grams to 646 grams) per square yard.

Beneficial comments, recommendations, additions, deletions, clarifications, etc., and other data which may improve this document should be sent by letter to: Commander, U.S. Army Belvoir Research, Development and Engineering Center, ATTN: STRBE-TSE, Fort Belvoir, VA 22060-5606.

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T09:05Z
Check the source to verify that this is the current version before use.

Pockets: The pockets shall be made from an unbleached, hard texture cotton duck cloth with weight of 23.9 to 26.3 ounces (678 grams to 746 grams) per square yard.

Note: The cotton duck cloth and webbing shall be mineral dyed, color olive drab and shall be water-repellant and mildew-resistant after treatment.

Thread: Nylon thread shall be treated for mildew-resistance.

Rivets: Rivets shall be copper, tubular with oval head.

Rope: The rope shall be a three or four strand construction, fabricated from cotton fiber and shall be furnished with a mildew-resistant treatment.

Construction: Stitching shall conform to FED-STD-751, stitch type 301, eight stitches per inch. Stitches shall be tight and end of thread shall be securely fastened. Thread breaks shall be backstitched.

Workmanship: The quality of workmanship shall be such as to produce carrying cases that are in accordance with the requirements of this description and are so constructed as to ensure proper functioning of all parts of the unit. Finished cases shall be clean and free from abrasion marks, permanently imbedded creases or wrinkles, loopy or loose edges, dye stains, or streaks.

Certification of commercial item: The contractor shall certify that the product offered to the Government meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product as the manufacturer's current product offered by the contractor in the commercial marketplace for at least one year preceding the solicitation. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Metric products: Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within specified tolerances using conversion tables contained in the latest revision of FED-STD-376, and all other requirements of this commercial item description are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Regulatory requirements: In accordance with Federal Acquisition Regulation, section 23.403, the Government's policy is to acquire items composed of the highest percentage of recovered materials practicable, consistent with

maintaining a satisfactory level of competition without adversely affecting performance requirements or exposing the supplier's employees to undue hazards from the recovered materials.

Preservation, packing, and marking: Preservation, packing and marking shall be as specified in the contract or purchase order.

Quality assurance: The carrying case shall be examined for the following defects. Presence of one or more defects shall be cause for rejection.

1. Any part or components not in accordance with the requirements shown on figure 1.
2. Material not as specified.
3. Treatment not as specified.
4. Workmanship not as specified.

Notes: The procuring agency should specify the preferred options permitted herein and include the following information in procurement documents:

1. Title, number, and date of this item description.
2. When treatment, painting, and paint color other than the manufacturer's standard is required.
3. Certification that the model offered meets all requirements of this item description.
4. When this commercial item description is used for procurement, the commercial item certification clause must appear in the solicitation.

The following is a suggested source of supply for this item description (competition is not limited to this source):

a. Home Industries, P.O. Box 1040, Sanford, FL 32772-1040.

FED-STD-376 and FED-STD-751 are available from the Standardization Documents Order Desk, Building 4D, 700 Robbins Avenue, Philadelphia, PA 19111-5094.

The preparing activity for this item description is the U.S. Army Belvoir Research, Development and Engineering Center, ATTN: STRBE-TSE, Fort Belvoir, VA 22060-5606.
