a. A certification shall be submitted certifying that the company still has the capabilities and facilities necessary to produce the item as qualified. If during the reporting periods there has been a process or design change, the manufacturer may be required, at the discretion of the qualifying activity, to submit a representative product to testing in accordance with the inspection requirements.

Failure to submit the report within 30 days after the end of each 12-month period may result in loss of qualification for the product. In addition to the periodic submission of inspection data, the contractor shall immediately notify the qualifying activity at any time during the 24-month period that the inspection data indicates failure of the qualified product to meet the requirements of this specification.

In the event that no production occurred during the reporting period, a report shall be submitted certifying that the company still has the capabilities and facilities necessary to produce the item. If during three consecutive reporting periods there has been no production, the manufacturer may be required, at the discretion of the qualifying activity, to submit a representative product from each group to testing in accordance with the qualification inspection requirements."

* 6.3 Qualification. Delete and substitute (as shown in amendment 1):

* "6.3 Qualification. With respect to products requiring qualification, awards will be made only for products which are, at the time of award of contract, qualified for inclusion in Qualified Products List (QPL) whether or not such products have actually been so listed by that date. The attention of the contractors is called to these requirements, and manufacturers are urged to arrange to have the products that they propose to offer to the Federal Government tested for qualification in order that they may be eligible to be awarded contracts or order for the products covered by this specification.
