INCH-POUND

MIL-B-26195C
Amendment 1
March 31, 1994

MILITARY SPECIFICATION

BOXES, WOOD-CLEATED, SKIDDED, LOAD-BEARING BASE

This amendment forms a part of MIL-B-26195C, dated 15 May 1987, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 1

1.1, line 3: After "designed for", add "non-hazardous".

Add the following paragraph:

"1.1.1 Hazardous Materials Boxes. Boxes up to a maximum net mass of 882 pounds and intended for shipment or storage of regulated hazardous materials must meet all the requirements of this specification including the requirements of the Appendix."

PAGE 2

2.1.1 Under "SPECIFICATIONS, Federal:"

Delete "FF-B-584 Bolts, Finned Neck; Key Head; Machine. Ribbed Neck; Square Neck: Tee Head"

Delete "QQ-S-781 Strapping, Steel and Seals"

Delete "NN-P-530 Plywood, Flat Panel"

Add "A-A-55057 Panels, Wood/Wood Based; Construction and Decorative"

Add "FF-B-584 Bolts, Square Neck and Tee Head"

Under "SPECIFICATIONS, Military:"

Add "MIL-S-46163 Sealing, Lubricating and Wicking Compounds: Thread-Locking, Anaerobic, Single-Component"

FSC 8115

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

PAGE 3

2.2 Under "American National Standards Institute (ANSI):"

Delete "HP 1983 American National Standard for Hardwood and Decorated Plywood"

Add "HPMA MP-1983 Hardwood and Decorative Plywood"

Delete "American Society for Testing and Materials (ASTM)" and substitute "ASTM"

Add "ASTM D 3953 Standard Specification for Strapping, Flat Steel and Seals (DOD Adopted)"

Delete "ASTM E380" and substitute "ASTM E 380"

PAGE 4

3.1.2, line 7: Delete "NN-P-530" and substitute "A-A-55057".

Add as new paragraph 3.1.5.1:

"3.1.5.1 Commercial parts. Unless otherwise specified, commercial parts may be substituted to the maximum extent, consistent with reliability, maintainability, and performance. Commercial utility parts with suitable properties, such as nails, staples, lag bolts, carriage bolts and washers, may be used provided they can be replaced with standard parts (MS and AN) without alteration."

PAGE 7

Table I, note 1/: Delete "See 6.3" and substitute "See 6.3.1".

Table II, note 1/: Delete "See 6.3" and substitute "See 6.3.1".

PAGE 8

3.2.4, lines 1-6: Delete the first two sentences and substitute "Unless otherwise specified (see 6.2), rubbing strips of 3 inches (-1/8 inch) thickness shall be applied to skids to facilitate forklift entry. Rubbing strips shall be applied with two staggered rows of thirty penny nails spaced 12 inches apart in each row with a minimum of 5 nails required for each rubbing strip."

PAGE 9

3.3, line 2: Delete "FED-STD-731" and substitute "MIL-STD-731".

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T07:56Z
Check the source to verify that this is the current version before use.

3.3.1, lines 3 and 4: Delete "(outside of headers)" and substitute "(outside edge of headers)"

3.3.2.1, line 7: Add the following after "inside length": "(see figure 6)."

PAGE 10

3.3.2.3, line 11: Delete and substitute: "application of a thread-locking compound in accordance with MIL-S-46163".

PAGE 11

3.4.2.1, line 4: Delete sentence beginning with "Additional lag bolts shall" and substitute "Additional lag bolts shall be equally spaced between the two end bolts with no distance exceeding 12 inches on crates 60 inches or greater in length and 18 inches on crates 60 inches or less."

PAGE 12

3.4.2.4, lines 1-4: Delete and substitute "3.4.2.4 Corner straps. When specified (see 6.2), corner straps shall conform to ASTM D3953, Type 1 or 2, regular duty, Finish A, not less than 3/4 inch wide by 0.020 inch thick by 12 inches in length. Corner strapping shall be".

3.5, line 5: After "provided with a baffle", add "located on the inside of the box".

3.5, line 8: Delete and substitute "equally between the sides and ends of the box, and each of these areas must have a baffle."

PAGE 13

Add the following paragraph:

"3.8 Fire retardant markings. When fire retardant boxes are specified, the words 'FIRE RETARDANT' shall be marked, in minimum 1-inch high letters, on two sides of the box."

PAGE 19

6.2 (a), line 1: Delete the word "data" and substitute "date".

6.2 (o), line 2: Delete and substitute "(see 3.5)."

6.2 (q), line 1 and 2: Delete "(see 3.2)" and substitute "(see 3.3)"

PAGE 32

Figure 9, end view: The upper cleat should be shown on the opposite side of the panel rather than on the same side as the baffle. (This would change the upper cleat lines to hidden lines on the cut view.)

PAGE 33

Add an appendix to this specification as follows.

APPENDIX

HAZARDOUS MATERIALS REQUIREMENTS

10. SCOPE

10.1 Scope. This Appendix is a mandatory part of this specification. The information contained herein is intended for compliance if hazardous materials are to be shipped in the subject containers. **Hazardous Material Boxes with a maximum net mass of 882 pounds and intended for shipment or storage of regulated materials as defined in 49 Code of Federal Regulations (CFR), Part 173 or international transportation regulations (ICAO "Technical Instructions for the Safe Transport of Dangerous Goods by Air" or IMO "International Maritime Dangerous Goods Code") are herein referred to as "hazardous material boxes". Substitutions or deviations must be approved by the ordering activity and comply with 49 CFR 178.601 as different packaging. All Department of Defense shipments must meet the requirements for shipping by land, sea and air.**

20. APPLICABLE DOCUMENTS

20.1 Government documents.

20.1.1 Other government documents and publications. The following other Government documents and publications form a part of this Appendix to the extent specified herein. Unless otherwise specified, the issues are those cited in the solicitation.

DEPARTMENT OF TRANSPORTATION

49 Code of Federal Regulations, parts 100-199

(Applications for copies should be addressed to the Superintendent of Documents, U.S. Government Printing Office, Washington DC 20402).

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T07:56Z
Check the source to verify that this is the current version before use.

APPENDIX

20.2 Non-Government publications. The following documents form a part of this Appendix to the extent specified herein. Unless otherwise specified, the issues of the documents which are DOD adopted are those listed in the issue of the DODISS specified in the solicitation. Unless otherwise specified, the issues of documents not listed in the DODISS are the issues of the documents cited in the solicitation.

ASTM

D 4919 Standard Specification for Testing of Hazardous Materials Packagings

(Application for copies of the ASTM standards by serial designation and title should be made to ASTM, 1916 Race Street, Philadelphia PA 19103.)

INTERNATIONAL CIVIL AVIATION ORGANIZATIONS (ICAO)

Technical Instructions for the Safe Transport of Dangerous Goods by Air

(Applications for copies should be addressed to Labelmaster Division, American Labelmark Company, 5724 North Pulaski Rd., Chicago IL 60646.)

INTERNATIONAL MARITIME ORGANIZATION

International Maritime Dangerous Goods (IMDG) Code

(Applications for copies should be addressed to Labelmaster Division, American Labelmark Company, 5724 North Pulaski Rd., Chicago IL 60646.)

20.3 Order of precedence. Nothing in this Appendix supersedes applicable laws and regulations unless a specific exemption has been obtained in writing from their competent authority.

30. REQUIREMENTS

30.1 Hazardous materials boxes. Boxes, also known as packagings, for hazardous material storage and transportation shall conform to 49 CFR (Part 173 Subpart B and Part 178 Subpart L), IMDG, or ICAO Technical Instructions (Part 3, Chapter 1 and Part 7). The Department of Defense considers the variations to those outlined in 30.1.2.3 as mandatory.

30.2 Test requirements.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T07:56Z
Check the source to verify that this is the current version before use.

APPENDIX

30.2.1 Rough handling (drop) test. Samples shall not exhibit any damage to the outer packaging which might adversely affect safety during transport. In addition, the inner packages shall not allow any leakage of filling substances into the outer packaging (see 40.2.1).

30.2.2 Stacking test. Test specimens shall not leak. For composite or combination packages, the filling substance shall not leak from the inner receptacle or packaging. Test samples shall not show any deterioration which might adversely affect transportation safety or any distortion which might reduce their strength, cause instability in stacking, or cause damage to inner packaging (see 40.2.2).

30.2.3 Vibration test. At the conclusion of the vibration test, there shall be no rupture or leakage from any of the packages Test samples shall not show any distortion which could reduce packaging strength or any deterioration which might adversely affect transportation safety (see 40.2.3).

40 PERFORMANCE REQUIREMENTS

40.1 Specimen preparation. Properly assemble test load, including all internal configurations, place in box, and close as for transport. Complete all applicable preparation required by 49 CFR Part 178 Subpart M prior to initiation of testing. If an inner receptacle contains a liquid, the absorbent requirement shall conform to 49 CFR 173.27(e). Perform tests as required by 49 CFR 178 Subpart M using ASTM D 4919 guidance.

40.2 Performance tests. Hazardous materials boxes, as defined in paragraph 10.1 of this Appendix and domestic and international transportation regulations, shall pass the following tests.

40.2.1 Rough handling (drop) test. (See 30.2.1).

40.2.1.1 Test load. The test load shall consist of a properly assembled load configuration as for shipment. The actual test load shall consist of one of the following:

40.2.1.1.1 The actual item.

40.2.1.1.2 An accurate load simulation. (This includes, but is not limited to, accurate physical (i.e. fragility and mass) and dimensional characteristics.)

40.2.1.1.3 A simulated load per 49 CFR Part 178 Subpart M, which includes the approved variations.

Check the source to verify that this is the current version before use.

APPENDIX

40.2.2 Stacking test. Perform test per 49 CFR 178 Subpart M.

40.2.3 Vibration test. Perform test per 49 CFR 178 Subpart M.

50. TEST REPORTS

50.1 Hazardous material boxes test reports. The manufacturer or mark certifying activity, as defined in 49 CFR 178.2, shall supply two copies of the test report as required by the purchaser (see 70.1 (c)). The mark certifying activity's test report shall document packaging limitations as identified by 49 CFR 178.2; results of the box testing required by 49 CFR 173.24, 49 CFR 178, and ASTM D 4919; and shall include the test configuration assembly. The format of the test report shall comply with Data Item Description DI-PACK-81059.

60. MARKINGS

60.1 Hazardous materials boxes. The markings for hazardous materials boxes shall conform to 49 CFR Part 178 Subpart L and MIL-STD-129, Appendix E.

70. NOTES

70.1 Acquisition requirements. Acquisition documents must specify the following:

(a) Hazardous materials box.

(b) Physical characteristics of load including dimensions, weight, and density of contents.

(c) Distribution of test reports.
