COMMERCIAL ITEM DESCRIPTION

BAG, LAUNDRY

The General Services Administration has authorized the use of this Commercial Item Description in preference to MIL-B-13842.

Abstract. This document covers two types of cotton duck bags for soiled clothes. The type II bag is used as a general all purpose laundry bag for hand-carry in those instances where the conveyor or casters are not indicated. The type III bag is used by the Navy for storing bedding and linens aboard ship and requires the mildew resistant and water repellent treatment.

Classification. The bag shall be in the following types:

Type II - Bag, Soiled Clothes, Large
Type III - Bag, Soiled Clothes, Intermediate

Salient Characteristics. The two types of cotton duck bags for soiled clothes shall conform in all respects to figures I, II and III and as specified herein.

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Defense Personnel Support Center, Clothing and Textiles Directorate, Attn: DPSC-FSSD, 2800 South 20th Street, Philadelphia, PA 19101-8419, by using the Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

Material.

Cloth, Duck, Cotton. The cloth shall conform to type I, No. 10 hard texture, 14.4 - 15.8 ounces per square yard of CCC-C-419. The cloth for type III shall be unbleached, desized, water-repellent and mildew-resistant treated in accordance with class B treatment of CCC-D-950.

Thread. The thread shall be polyester, natural in color, and shall conform to type I or II, class 1, subclass A, size FF of V-T-285.

Cord, Cotton. For type II bags, the cord shall conform to type I, class 1, No. 6, 3/16 inch diameter, of T-C-571. For type III bags, the cord shall conform to type I, class 3, No. 6, 3/16 inch diameter, of T-C-571.

Grommets, Metallic. For type II bags, the grommets with washers shall conform to type III, class 3, No. 4 of MIL-G-16491. For type III bags, the grommets with washers shall conform to type III, class 1, No. 4 of MIL-G-16491.

Markings. Identification markings shall conform to type IV, class 5 of DDD-L-20 and shall be applied in the location shown on the figures. The medical services symbol shall conform to type I of MS 16686 and shall appear on all type II and III bags in the size and locations indicated on the figures. The letters "US", and nomenclature of the item shall be applied in the size characters and in the location indicated on the figures and shall conform to type IV, class 9 of DDD-L-20. Class 9 markings shall be clearly legible after subjection to accelerated laundering. Markings are not required for type III bag when furnished for Naval shipboard use.

Sizes and Measurements. The finished bags shall conform to the sizes and measurements shown in figures I, II and III.

Workmanship. After completion, the finished bags shall be thoroughly cleaned, and all loose thread, lint, and foreign matter removed.

Product Demonstration Model. When required, offerers shall submit samples of their intended production. The Product Demonstration Model will consist of units independently developed. Product Demonstration Models will be analyzed and evaluated by the government. Evaluation criteria and basis for award are contained in the solicitation. Product Demonstration Models will be retained by the government. One (1) Product Demonstration Model approved by DPSC under the resultant contract will serve as a manufacturing standard for the corresponding production items delivered under this contract. Offerers are advised that the Product Demonstration Model does not relieve the

successful offerer of his responsibility to perform in accordance with the Commercial Item Description specified above.

Quality Assurance

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards and quality assurance practices. The government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for, under the provisions of the contract. Reliance on contractor QA systems shall not relieve the contractor of the responsibility of ensuring that all products or supplies submitted to the government for acceptance comply with all requirements of the contract.

Examination. Bag lots shall be inspected in accordance with "Sampling Procedures and Tables for Inspection by Attributes", ANSI/ASQC Z1.4, published by the American Society for Quality Control.

Visual Examination. The bags shall be examined for the defects listed below. The lot size shall be expressed in units of bags. The sample unit is one bag. The inspection level shall be II and the acceptable quality level (AQL), expressed in terms of defects per hundred units, shall be 10.0.

Defects. The bag shall be examined for the following defects: any hole, cut, tear, color not as specified; any broken or missing yarn; any cut, break or abrasion in the cord; grommets improperly set, clinched loosely, clinched excessively tight, cutting fabric; grommet or washer become disengaged; grommet has corroded area, burr or sharp edge; open seam; raw edges caught in stitching; thread breaks; needle chews; skipped stitches not overstitched; seam pleated; stitch tension loose, resulting in an exposed bobbin or top thread; stitch tension tight, as evidenced by puckering on seams; chain portion of stitching indicated by "Z" on drawing shows on outside of bag; any part not cut in conformance with specified requirement; any component or required operation omitted; hems formed on outside of bag; drawstring not threaded through grommets or both ends of cord not threaded through grommet; ends of drawstring not overhand knotted; handles not constructed as indicated on drawing; body formed with more than two pieces of fabric; marking missing, incorrect, or illegible; grease or oil stains; measurement of item not as specified.

Dimensional Examination. The finished bags shall conform to the dimensions specified. Any dimension that is not within the established tolerance shall be classified as a defect. The sample unit shall be one bag; the inspection level shall be S-3

and the AQL, expressed in terms of defects per hundred units, shall be 6.5.

Packaging Examination. The fully packaged shipping containers shall be examined in accordance with defects listed below. The lot size shall be the number of shipping containers in the inspection lot. The inspection level shall be S-2 and AQL, expressed in terms of defects per hundred units, shall be 2.5.

EXAMINE	DEFECT
Marking (exterior and interior)	Omitted; incorrect; illegible; of improper size, location, or method of application
Materials	Any component missing, damaged, or not as specified
Workmanship	Inadequate application of components, such as: incomplete closure of container flaps, loose strapping, improper taping, or inadequate stapling
Content	Number of items in container is more or less than required
	NSN shown on one or more items not as specified on shipping container
Palletization	Length, width, or height exceeds specified maximum requirements
	Pallet type not as specified
	Load not bonded as specified

Regulatory Requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

PACKAGING

Overseas.

Packaging. Each bag shall be folded.

Check the source to verify that this is the current version before use.

Packing. Fifteen bags shall be packed in a fiberboard box conforming to style RSC-L, grade 275 of PPP-B-636. The box shall be closed in accordance with the appendix of PPP-B-636.

Palletization. Boxes shall be palletized on a 4-way entry pallet in accordance with load type Ia of MIL-STD-147. Each prepared load shall be bonded with primary and secondary straps in accordance with bonding means C and D, or film bonding means F or G. Pallet pattern shall be in accordance with the appendix of MIL-STD-147.

Marking. Marking shall be in accordance with MIL-STD-129.

Domestic.

Packaging, packing, palletization and marking. Packaging, packing, palletization and marking shall be in accordance with ASTM D 3951.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

INSTRUCTIONS

1. The preparing activity must complete blocks 1, 2, 3, and 8. In block 1, both the document number and revision letter should be given.
2. The submitter of this form must complete blocks 4, 5, 6, and 7.
3. The preparing activity must provide a reply within 30 days from receipt of the form.

NOTE: This form may not be used to request copies of documents, nor to request waivers, or clarification of requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
