DATA ITEM DESCRIPTION

Title: SOFTWARE ATTACK SURFACE ANALYSIS REPORT

Number: DI-IPSC-82250
AMSC Number: 9999
DTIC Applicable: No
Preparing Activity: MDA
Applicable Forms: None

Approval Date: 20190124
Limitation: N/A
GIDEP Applicable: No
Project Number: IPSC-2019-002

Use/Relationship: The Software Attack Surface Analysis Report documents the results of the attack surface analysis activities.

This Data Item Description (DID) contains the format and content preparation instructions for the data product generated by the specific task requirement included in the contract.

Requirements:

1. **Format.**

    a. The report shall be in contractor format unless otherwise specified on the Contract Data Requirements List (CDRL) (DD 1423).

    b. Security classification and distribution markings shall conform to the requirements of the contract, purchase description, and security requirements checklist, as applicable.

2. **Content.**

The Software Attack Surface Analysis Report shall:

a. Document or reference the process used to perform the software attack surface analysis.

b. Document the results of the attack surface analysis.

i. Define the attack surface of the software application to include:

1. All paths for data/commands into and out of the application

2. The code that protects these paths

3. All critical data used in the application

4. The code that protects this critical data
