DATA ITEM DESCRIPTION
Title: ACCIDENT INCIDENT REPORT

Number: DI-MGMT-82188
AMSC Number: N9905
DTIC Applicable: N/A
Preparing Activity: SH
Applicable Forms: N/A

Approval Date: 20180322
Limitation: N/A
GIDEP Applicable: N/A
Project Number: MGMT-2018-018

Use/Relationship: The Accident Incident Report provides the government with notification of incidents that happen accidentally, are not in the usual course of operations, are not according to expectations, and are not routine. The report covers incidents resulting in any one or more of the following: personnel injury, property damage, security violation, or other significant incidents.

This data item description (DID) contains the format and content preparation instructions for the data product generated by the specific and discrete task requirement as delineated in the contract.

Requirements:

1. **Format**. The report shall be presented in a format similar to that in Figure 1.

2. **Content**. The report shall contain all of the information in Part 1 through Part 4 of Figure 1.

2.1 The Report shall identify incidents resulting in any one or more of the following:

a) Personnel Injury
Any incident that involves injury that could result in loss of time from work and requires medical treatment beyond first aid.

b) Property Damage or Loss
1) All property damage or loss regardless of dollar value.
2) Any accident that involves vehicle damage or property damage caused by a vehicle.

c) Security Violation / Incident
1) Any incident involving protection of Tactical Training Range facilities, computer networks, or computer environments.
2) Any incident that involves the loss, compromise, or suspected compromise of classified or sensitive information.
3) Any incident that involves unauthorized changes to the Information Assurance posture of a computer network as defined in the respective SSAA will be considered a violation.

d) Other:
1) Any incident the submitter is unable to resolve under the three other categories.
2) Any incident that occurs on the range where the Contract Site Manager (CSM) or Range System Manager (RSM) determine that an Accident/Incident Report is

warranted to preclude a similar occurrence on the Combined Tactical Training Ranges (CTTR).

2.2 A summary of what happened in the incident shall be included.

2.3 The events preceding the investigation shall be specified in reverse order of occurrence, starting with the event and moving backward in time. A reconstruction of the steps that led to the investigation shall also be included.

2.4 Causal factors of the chain of events leading to the accident or incident shall be included.

2.5 The report shall include actions and corrective actions that have been or will be taken to prevent re-occurrence, the timeframe for performing all actions and corrective actions, as well as the associated work order that will be used to track cost.
