COMMERCIAL ITEM DESCRIPTION

CURTAIN, BEDSIDE SCREEN

The General Services Administration has authorized the use of this Commercial Item Description as a replacement for Federal Specification DDD-C-800A, which is cancelled.

This Commercial Item Description covers a washable cotton curtain for a bedside screen.

Salient characteristics:

The bedside screen curtain shall be made of dyed cotton jean cloth with the following physical requirements:

Weight per square yard (minimum)	4.3 ounces
Yarns per inch (minimum)	
Filling	40
Breaking strength (minimum)	
Filling	40 pounds

The curtain shall be dyed sand color (No. 70136, of the Standard Color Card of America, 9th edition, for shade guide only). The dyed cloth shall show good odor fastness to laundering, bleaching, and light, when tested.

The curtain shall be constructed in accordance with Figure 1, and as outlined below:

a. The overall width shall be a minimum of 41 inches.

b. The 3 inch hems shall have a plus or minus 1/4 inch tolerance.

AMSC N/A FSC 6530

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

c. The 55-1/2 inch length between inner rows of stitching on hems shall have a plus or minus 1/2 inch tolerance.

d. The overall length of 61-1/2 inches shall have a plus or minus 1/2 inch tolerance.

One piece construction shall be maintained.

All stitching shall be machine stitching conforming to stitch Type 301. There shall be a minimum of 10 stitches to the inch. When machine stitching is not a continuous thread, it shall be backstitched not less than 1/2 inch at each break. All stitching shall be backstitched at the ends to prevent raveling, except where ends are turned under in a hem, or held down by other stitching. Thread tension shall be properly maintained so that lock will be imbedded in the center of the materials sewed. All edges which are not selvaged shall be hemmed with stitching Type EFb-1 (double fold with one row of stitches). All seams shall be straight and evenly spaced. The openings for the rods shall be reinforced with bar tacks as shown in Figure 1.

The thread shall be a soft cotton, unbleached, machine thread, ticket No. 50, 3 ply. As an alternate, the thread may be a suitable 50/3 spun polyester, in lieu of the cotton.

The finished curtain shall have no holes, cuts, tears, or any seriously weakening defects, such as smashes, floats, loose slubs and needle chews, which may develop into holes. The curtain shall have no mends, patches, or unsightly shade bars, which affect appearance. The curtain shall be furnished clean, with no stains or dirt marks.

Workmanship. The bedside screen curtain shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Each (EA). One curtain, as specified, constitutes one unit. Each curtain shall be neatly folded to approximately 15 inches by 15 inches. Each folded curtain shall be supplied in a snug-fitting, clear, polyethylene bag having an average wall thickness of 2.5 mil. A 1/4 inch diameter hole shall be made at one corner of the bag to allow excess air to escape. The bag shall be closed by heat sealing or by a tuck or reverse flap.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Tests. Tests shall be conducted to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard 376, and all other requirements of this document are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Contractor certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this Commercial Item Description, and that the product conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

Ordering data. Intermediate/exterior package quantities, labeling, and marking must be specified in the contract and/or order.
