MILITARY SPECIFICATION

TRANSMITTER, RATE OF FLOW, FUEL, TRU-26/A
(300 to 10,000 PPH)

This amendment forms a part of Military Specification MIL-T-22030(AER) of 1 May 1959 and has been approved by the Bureau of Naval Weapons, Department of the Navy.

By this amendment basic MIL-T-22030(AER) is changed to MIL-T-22030(WEP) and throughout the specification Bureau of Aeronautics shall be changed to Bureau of Naval Weapons.

Page 6, paragraph 4.3.1.2 Add the following after the table on frequency and amplitude

"For flows in the 300 to 5000 pph range, three resonance peaks shall be allowable when tested in all three mutually perpendicular axes. The maximum variation or oscillation tolerance of these peaks shall be ±150 pph, only if the oscillation and variation peaks do not occur simultaneously."
