COMMERCIAL ITEM DESCRIPTION

SCALE REMOVING COMPOUND (POWDER, SULFAMIC ACID)

The General Services Administration has authorized the use of this commercial item description, for all federal agencies.

1. SCOPE. This CID covers a powder form scale removing compound, hereafter referred to as "compound", intended for removing scale deposits normally found in salt water evaporators, fresh water cooling and distribution systems, and water side scale found in heat transfer units. This compound can be used for removing scale deposits normally found in commercial dishwashing machines.

2. SALIENT CHARACTERISTICS.

2.1 Materials. Unless otherwise specified herein, materials shall be in accordance with the manufacturer's material specifications. The compound shall be a clean, water-soluble, uniform free-flowing (lump-free) powder, and shall contain an anti-corrosion agent, an anti-caking agent, and a dye and dye stabilizer to indicate when the compound is spent during the descaling process. Metanil yellow is one acceptable dye.

2.1.1 Sulfamic acid. The compound shall contain not less than 90 percent (%) sulfamic acid by weight when determined by acid-base titrimetry or equivalent.

2.1.2 Hydrogen-ion concentration (pH). The compound shall have a pH of not more than 1.2 in a 1% solution in distilled water when determined in accordance with ASTM E70.

2.1.3 Excluded ingredients. The compound shall not contain sulfuric acid or organic solvents.

2.2 Corrosive effects on steel. The compound, in a 1% distilled aqueous solution, shall have a corrosive effect on steel of not more than 0.15% loss of mass on 2 inch by 2 inch by 0.035 inch thick (51mm X 51mm X 0.89mm thick) coupons of UNS G10200 hot rolled steel after a 24 hour period of immersion in the solution.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data that may improve this document should be sent to DLA Aviation, VEB, 8000 Jefferson Davis Highway, Richmond, VA 23297-5616 or e-mailed to STDZNMGT@dla.mil. Since contact information can change, you may want to verify the currency of this address information using the ASSIST database at https://assist.dla.mil

Check the source to verify that this is the current version before use.

2.3 Nonvolatile matter. The compound shall have a nonvolatile matter content of not less than 30.0% when determined in accordance with ASTM D2834 using a 2 to 3 gram sample weight, 100 mm diameter glass Petri dishes, and a forced draft oven set at 221 ± 4°F (105 ± 2°C) for 16 hours.

3. REGULATORY REQUIREMENTS.

3.1 Safety data sheet (SDS). Manufacturers shall prepare and submit a SDS in accordance with FED-STD-313, "Material Safety Data, Transportation Data and Disposal Data for Hazardous Materials Furnished to Government Activities", and meeting the requirements of 29 Code of Federal Regulations § 1910.1200, "Occupational Safety and Health Standards: Hazard Communication".

3.2 Marking, packaging, and labeling. The product shall be labeled, packed and marked in accordance with 49 CFR parts 100 to 185.

3.3 Recovered materials. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

4. PRODUCT CONFORMANCE PROVISIONS.

4.1 Product conformance. The product shall meet the salient characteristics of this CID, conform to the producer's own drawings, specifications, standards, and quality assurance practices, and be the same product offered for sale in the commercial market. Any certificate of analysis (COA) offered with the product to the commercial market shall be provided with each lot or batch of product. The lot or batch number and the date of inspection/analysis from the offer shall be on each COA. A full COA proving the salient characteristics of the product meets government requirements shall be provided upon request. The Government reserves the right to require proof of such conformance.

4.2 Market acceptability. The product offered must have been sold to the Government or commercial market.

5. PACKAGING. Preservation, packaging, and marking shall be as specified in the contract or order (see 6.2).

6. NOTES.

(This section contains information of a general or explanatory nature that may be helpful but is not mandatory.)

6.1 Source of documents.

6.1.1 Electronic copies of CFR documents can be obtained from https://gov.ecfr.io/cgi-bin/ECFR.

Source: https://assist.dla.mil -- Downloaded: 2026-10-24T02:56Z
Check the source to verify that this is the current version before use.

6.1.2 Electronic copies of FAR documents may be obtained from https://www.acquisition.gov/browse/index/far.

6.1.3 Copies of FED-STD-313 can be obtained from https://quicksearch.dla.mil.

6.1.4 Electronic copies of ASTM documents may be obtained from https://www.astm.org/.

6.2 Ordering data. Acquisition documents must specify the following:

a. Title, number, and date of this CID.
b. The specific issue of individual documents referenced, if required.
c. Packing requirements.

6.3 National stock number (NSN). 6850006376142 and 6850011749548 correspond to this CID. These may not be the only NSNs associated with this document.

6.4 Cross-reference data. Scale removing compound conforming to this CID is interchangeable/substitutable with scale removing compound conforming to P-S-120B, type I, dated April 8, 1977 (cancelled October 17, 1997 with supersession by this document).

6.5 Key Words.

Dishwashing machines
Salt water evaporators
Water cooling and distribution systems

6.6 Changes from previous issues. The margins of this specification are marked with vertical lines to indicate where changes from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the previous issue.
