COMMERCIAL ITEM DESCRIPTION

CLEANING COMPOUND, RUG AND UPHOLSTERY SURFACE

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification P-C-1632, Types I, II and III.

This description covers cleaning compounds for cleaning rugs and upholstery.

The cleaning compound shall be of the following types:

Type I - Granular
Type II - Liquid
Type III - Aerosol

Salient characteristics:

The type I Rug and Upholstery Cleaner shall be a fast drying product composed of granular cellulosic material mixed with diatomaceous earth, dry cleaning solvents, and detergents. The type II Rug and Upholstery Cleaner shall be a fast drying concentrated liquid product with a solvent and detergent base. The type III Rug and Upholstery Cleaner shall be similar to type II except that it shall be supplied in a concentration suitable for direct application from its aerosol container, as a foam, to the surface being cleaned.

REQUIREMENTS

Characteristics	Type I Min.	Type I Max.	Type II Min.	Type II Max.	Type III Min.	Type III Max.	Test Method
Nonvolatile matter (%)	55	75	15.0	--	10.0	--	ASTM D 820
pH (undiluted)	--	--	7.0	9.6	7.0	10.0	ASTM E 70
Surface Tension (dynes/cm)	--	--	24	37	24	37	ASTM D 1331
Alcohol Soluble organic matter (%)	--	--	6.0	15.0	4.3	9.6	ASTM D 820
Free Alkali	--	--	--	0	--	0	ASTM D 820
Distillation range (^{o}C)	90	190	--	--	--	--	ASTM D 1078

The issue of each ASTM method in effect on the date of the solicitation shall be used to determine compliance with stated requirements.

Foam stability (type II). The product shall have a minimum of 200 ml of foam after standing 1 minute, and still have a minimum of 150 ml of foam after standing 15 minutes when tested as follows:

Make a 20 grain hard water solution of the product in accordance with the use dilution ratio recommended on the product label. Place 50 ml of the solution in a 250 ml glass stoppered graduated cylinder. Stopper the cylinder and shake by inversion, for 1 minute. Place the cylinder in an upright position on a table, remove the stopper, wait 1 minute, and read the net column of foam. Measure the foam height again after 15 minutes.

Foam stability (type III). The product shall have some of the foam remaining after a period of 30 minutes and 75 percent of the test paper shall be wet after 30 minutes, when tested as follows:

Spray the product for two seconds onto the center of a 6 $\pm$ 1/4 inch circular piece of Whatman No. 1 filter paper. Allow the foam to remain on the filter paper for 30 minutes. After 30 minutes, examine for presence of foam and for the amount of paper wetted by the product.

Color (all types). The product shall not impart any color to the fabric, when tested as follows:

Apply the product to swatches of unbleached, uncolored wool fabric in accordance with manufacturer's instructions on the label. Let the fabric stand for 1 hour and examine visually for any change in the color of the fabric.

Registration. When specified, the type II product shall be registered with the Environmental Protection Agency as a sanitizer in accordance wtih 40 CFR 162, Regulations for the Enforcement of the Federal or bacteriostat Insecticide, Fungicide and Rodenticide Act.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same product sold in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Packaging, packing, and marking. Packaging, packing, and marking shall be as specified in the contract or order.

Note: The types of cleaners covered by this specification are intended for use in the general purpose maintenance cleaning of rugs and upholstery. The cleaning should be done in accordance with manufacturer's instructions.
