COMMERCIAL ITEM DESCRIPTION

BINDING ASSEMBLY, SKI, DOWNHILL AND CROSS COUNTRY

The General Services Administration has authorized the use of this commercial item description.

1. SCOPE. This document covers ski binding assemblies. The commercial ski binding is for use in both downhill and cross country military skiing.

2. SALIENT CHARACTERISTICS

2.1 Design and construction. The ski binding shall be of steel construction. The binding shall be a dual purpose downhill/cross country cable type binding (see Figure 1). For setting of the binding in the downhill position, the cable shall be placed under the two hitch hooks located on the sidewalls of each ski. For setting of the binding in the country position, the cable shall be unhooked from the two hitch hooks on the sidewalls of each ski. The cables shall be easily removed by hand for interchangeability for different size boots. The front throw clamping mechanism shall be spring loaded and have a safety release feature for release in a forward fall. The binding shall articulate at a hinge located just forward of the toe piece when set in the cross country position. The binding shall have a plastic heel pad, 2.125 $\pm$ 0.0625 inches wide, 1.375 $\pm$ 0625 inches long and 0.165 $\pm$ 0.015 inches thick. The binding shall have a 0.156 $\pm$ 0.015 inch diameter steel wire toe piece that will be compatible with the standard military white and black vapor barrier boots (MIL-B-41816) and the standard ski mountain boot (MIL-B-43739). The binding shall be furnished in pairs with all the necessary mounting hardware and instructions. The ski binding shall be free of burrs and sharp edges and all rivets properly peened. The ski binding shall be steel in construction in the size/color code specified. The cable shall be capable of being set in the cross country and downhill position. Instructions shall be contained with the binding. The forefoot plate of the ski binding shall rest flat against the ski. The ski binding shall be compared to standard guide sample (Silveretta 125), Alpine Research Corporation.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: Defense Personnel Support Center, Clothing and Textiles Directorate, Attn: DPSC-FNS, 2800 South 20th Street, Philadelphia, PA 19145-5099.

Check the source to verify that this is the current version before use.

2.2 Sizes and colors. The cable shall be available in three sizes and color coded with plastic heel protection tubes around the cable in the following colors:

Red	Size 35-1/2 ± 1/2 inches
Green	Size 37-1/2 ± 1/2 inches
Yellow	Size 39-1/2 ± 1/2 inches

Note: The cables shall be measured from end to end with cable removed from the binding.

2.3 Label. The label shall be the same as normally used by the contractor for retail distribution.

2.3.1 Label/tag. Each item shall be individually bar-coded with a paper tag for personal clothing items. The paper tag shall be standard bleached sulfate having a basis weight of 100 pounds. The paper used for the tags shall have a smooth finish to accept thermal transfer and direct printing. The tags shall have a hole and shall be attached to each item by a fastener, clearly legible and readable by a scanner. The bar coding element shall be a 13 digit national stock number (NSN). The bar code type shall be a medium to high code density and shall be located so that it is completely visible on the item when it is folded and/or packaged as specified and so that it causes no damage to the item.

3. REGULATORY REQUIREMENTS. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

4. QUALITY ASSURANCE PROVISIONS

4.1 Certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this commercial item description and conforms to the producer's own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

4.2 Market acceptance criteria. The item offered, or a generic equivalent, must have been sold to the commercial market or to the Government for at least two years.

4.3 Warranty. The item offered shall include the standard warranty given to the commercial market beginning with the date of delivery of the individual items.

4.4 Acceptance criteria. Acceptance criteria shall be as specified in the contract or purchase order.

4.5 Visual examination. Each ski binding shall be examined for the defects listed below. The lot size shall be expressed in units of ski binding. The sample unit is one ski binding.

4.5.1 Defects. Any hole, cut, or tear; size and color not as specified; any part shaded; any spot or stain (outside); any material defects, distorted parts or poor workmanship; any component part omitted; label missing, incorrect, or illegible; measurement of item not as specified; binding not free of burrs/sharp edges; toe hinge not compatible with boots specified; threaded adjustment and throw do not move easily by hand all all rivets not properly peened; cables not easily remove from cable guides; bindings not furnished in pairs; all necessary mounting hardware not furnished; instructions not contained with binding; bar code omitted or not readable by scanner; human-readable interpretation (HRI) omitted or illegible; bar code not visible on item; bar code causes damage to the item; any items not packaged in accordance with the contract or purchase order.

4.6 Dimensional examination. The finished ski binding shall conform to the dimensions specified. Any dimension that is not within the established tolerance shall be classified as a defect. The sample unit shall be one ski binding.

5. PACKAGING

5.1 Preservation, packing, and marking. The preservation, packing, and marking shall be as specified in the contract or order.

5.2 Source of Government documents. Copies of military and Federal documents are available from:

Standardization Documents Order Desk
Bldg. 4D
700 Robbins Avenue
Philadelphia, PA 19111-5094

5.3 Sources of supply. Competition is not limited to manufacturer listed below.

5.4 Ski Binding manufacturer. The company manufacturing commercial ski bindings that has the capability to meet this commercial item descriptions requirements is Alpine Research Inc., 765 Indian peaks Rd., Golden, CA 80404-9417, Attn: Mr. Paul Ramer, telephone number (303) 642-7844.

6. NOTES

6.1 Ordering data.

a. Title, number, and date of this document.
b. Size of cable required (see 2.2).
